U24E850R

23.5" UHD desktop monitor

Combine the incredible image quality of UHD with 100% sRGB color compliance, and you have a display that delivers true image fidelity. Designed for photographers and anyone who needs great picture quality, including designers, engineers and programmers, the Samsung U24E850R desktop monitor enables the user to make more accurate decisions and produce superior work. With four times the resolution of a standard 1920x1080 FHD monitor, along with Samsung's PLS panel technology that improves the viewing experience even up to 178 degrees on both the vertical and horizontal axes, the Samsung U24E850R desktop monitor can display the finest details. Composed of approximately 30% recycled material and using under 0.3 watts while in off-mode, it can also help your business meet its environmental and energy targets.

Key features

UHD 3840x2160 resolution

Four times the resolution of standard monitors empowers users to view texts and images with greater accuracy. The increased resolution transforms small, hard-to-read fonts into legible text while the details in photos, videos and illustrations can be seen with increased discernibility.

Enhanced image quality

UE850 series monitors support 60Hz over HDMI and AMD FreeSync™. The result is smooth, stutter-free and tear-free video. Combined with a PLS panel and 100% sRGB color mode, the U24E850R delivers bright, vivid, critically accurate color.

Multi-source capability

Simultaneously display up to two separate input sources using such features as Picture-In-Picture (PIP) and Picture-By-Picture (PBP), the Samsung U24E850R is ideal for financial and security applications.

Newly designed ergonomic, adjustable stand

The monitor swivels, tilts, pivots and is height-adjustable to the most comfortable and ergonomic position, enabling users to reduce the strain that can come from long work hours. The VESA compatible monitor can also be easily installed on a wall or separate mounting arm.

Gain fast, easy connectivity

Choice of HDMI, DisplayPort and Mini DisplayPort enables users to easily configure for high-speed connectivity, while a built-in USB hub and cable management system simplifies connecting to peripherals. You can also easily add the optional Samsung SPU 10 speaker bar (sold separately).

Easy on the eyes

When Eye Saver Mode is active, blue light levels are lowered, for reduced eye strain during long work hours. Flicker-free technology adds further viewing comfort by eliminating flickering at all levels of brightness.
