THE NEW
BUSINESS
EXPERIENCE

SAMSUNG MPS AND SOLUTIONS: STREAMLINING YOUR BUSINESS

The faster you can get things done, the more efficient the workday can be. That's the simple idea behind Samsung's powerful MPS and solutions.

Samsung offers businesses of all types a fully customized print management program. With proprietary Samsung software and hardware, and in partnership with a select group of proven solutions providers, Samsung offers company directors and IT managers integrated solutions tailored specifically for their unique requirements.

Need a highly secure system for financial, government or healthcare sectors? We can provide it. Need a versatile system for education, retail or a fast-moving SMB? Done.

Samsung provides a reliable MPS system and solutions that integrate seamlessly into your workflow to produce professional results, while allowing you firm control of costs.

What do you demand of your business solution? It's time to demand more. It's time to demand Samsung.

HOW SAMSUNG MPS AND SOLUTIONS HELP SPECIFIC BUSINESSES

SMB

With Business Core™ printing solutions, SMB customers can take advantage of the same kinds of strategies that large enterprises use without having to build expensive and complicated IT organizations.

- Serverless solutions
- Reduce print costs
- Reduce print management costs
- Decrease energy consumption
- Reduce environmental footprint
- Security
- Workflow
- Print, scan and fax easily with our Mobile Print app

Education

Samsung can help education professionals balance the need for large volumes of print production with the reality of ultra-tight budgets. Our MPS and solutions offer high security, along with features that help streamline work processes while integrating seamlessly into your existing system.

- Meets: FERPA, OSHA, Section 17
- Pre-paid card support
- Secure user access controls
- Education-specific back-end system integration
- Custom solutions with a wide range of partners (via Samsung XOA open architecture)
- Print, scan and fax easily with our Mobile Print app

Healthcare

The healthcare industry has its own unique challenges. Samsung helps meet them by providing workflow and cost accounting solutions that facilitate the smooth dissemination of information, while adhering to strict confidentiality guidelines.

- Meets: HIPAA
- Secure Samsung solutions (and other specialty partners via Samsung XOA) provide significant assistance with compliance
- Manage expenses, decrease cost per page
- Easily digitize patient records
- Improve workflow
- Manage environmental footprints
- Print, scan and fax easily with our Mobile Print app

Retail

Samsung solutions deliver the management tools retail IT administrators need.

- Simple, reliable, effective ways to reduce wasted prints, limit print-related expenses and enforce management of print policies
- Reduce cost per copy
- Reduce environmental footprint
- Print, scan and fax easily with our Mobile Print app

Government

Samsung solutions can help government agencies who have secure, large-volume print needs, but are restricted by tight budgets. They'll easily integrate into legacy systems, so you can upgrade as you are able, while still realizing significant benefits immediately.

- Meets: Section 508, Energy Star, CC, IEEE 2600-2008, IEEE 2600-2009.2, HSPD12-CAC, FIPS 140-2, TAA, DOD 5002.2*
- Secure login with CAC or PIV cards*
- Highly secure and greatly enhanced control over your printing environment
- Card authentication and secure fax meets Federal and DoD requirements*
- More efficient workflow
- Decrease costs per page
- Lower your environmental signature

Finance

Samsung gives financial professionals the ability to manage large volumes of documents quickly and efficiently, while also adhering to strong regulatory requirements related to privacy, records management, security and information.

- Meets: GLB, SOX, FDIC
- Highly secure printing and scanning
- Effective document capturing and manipulation
- Reduce print costs while working more efficiently
- Print, scan and fax easily with our Mobile Print app

*For some devices

AN INTEGRATED, COMPREHENSIVE SOLUTION

The Samsung Managed Print Services (MPS) Program provides you with a complete suite of tools to optimize and manage printer, MFP and copier fleets, while lowering operating costs. This comprehensive program will substantially increase productivity and lower cost per copy (CPC), beginning with a detailed analysis of print, scan, copy and fax systems and requirements. Fleets can then be reconfigured and optimized to take full advantage of the leasing, monitoring, supplies fulfillment and service programs from Samsung and our selected best-in-class MPS solution partners.

And, of course, at the heart of the Samsung MPS program lie Samsung printers and MFPs, renowned for their performance and reliability.

Print Assessment

The best way to assess your business print needs is to visit your business. As part of our MPS program, Samsung meets with your team to conduct an on-site assessment. It's the best way to ensure our solution is exactly what you need.

Print Monitoring

Samsung provides ongoing print monitoring through the most efficient print management software on the market, PrintFleet. Print usage is collected automatically, and is easily accessible via a custom web portal.

Sales Tools and Proposals

Samsung has partnered with Compass Sales Solutions to provide you with the copy and print industry's premier sales force automation and print management software. This premium solution includes the Proposal Generator, to help you become even more efficient.

Cost Reduction and Efficient Solutions

In conjunction with key solutions providers in specific industries, Samsung offers a customized solution that will improve your business processes like never before. New systems will provide options you never had. Workflow and efficiency are both greatly improved.

Turnkey MPS Program

Samsung can also provide a one-stop, turnkey package that includes everything needed to deliver a comprehensive MPS program. It's a seamless experience, backed by Samsung expertise and our leading MPS provider partners.

Discounted Samsung Supplies

Designed and produced to the same world-class standards as our printers, copiers and MFPs, genuine Samsung supplies are precisely engineered to the print characteristics of Samsung equipment. You'll always get the highest-quality, most professional results.

Discounted Non-Samsung Supplies

Your solution may include existing printers and MFPs from brands other than Samsung. To help those machines produce the most professional results, we've partnered with LMI Solutions, an excellent source for non-Samsung supplies.

0% Finance Leasing Program

One of the crucial keys for any business is cash flow. We've partnered with GreatAmerica Leasing Corporation, De Lage Landen and GE Capital to provide a 0% finance and leasing program. We don't want to let finances stand in the way of the perfect solution for your business.

TURNKEY MPS SOLUTIONS

SIMPLIFYING OPERATIONS

In conjunction with our partners, Samsung also offers a Turnkey MPS program. It provides everything a business needs to help manage its fleet, reduce operation costs and improve efficiency. Our Turnkey MPS program also takes the worry out of routine, but important, operations such as supply fulfillment, service, call centers and billing.

MPS Program Flow

Supplies

The program offers proactive supplies fulfillment and more. For the Samsung machines that are part of the MPS solution, we offer genuine Samsung supplies. For qualifying MPS accounts, we also offer discounted prices.

National Service Dispatch

The nationwide service footprint includes most zip codes in the United States and most provinces in Canada.

Fleet Monitoring

State-of-the-art, cloud-based software helps in the management of equipment.

Call Center

The program includes the support of a professional call center, aiding in requests for information, product support and customer interaction.

0% Leasing (Optional)

0% leasing for 36 months is available to qualified users of Samsung devices.

Billing Options

Because a crucial element for any business is cash flow, the program offers a number of flexible options.

Dedicated Account Representative

The program provides a dedicated account representative, so there's a single point of contact.

Monthly/Quarterly Reporting

Ongoing information on end-user printing will be provided, from monthly meter reads, toner usage and service metrics, to quarterly business reviews.

PRINT MANAGEMENT SOFTWARE

PRINTFLEET ENTERPRISE ON THE CLOUD

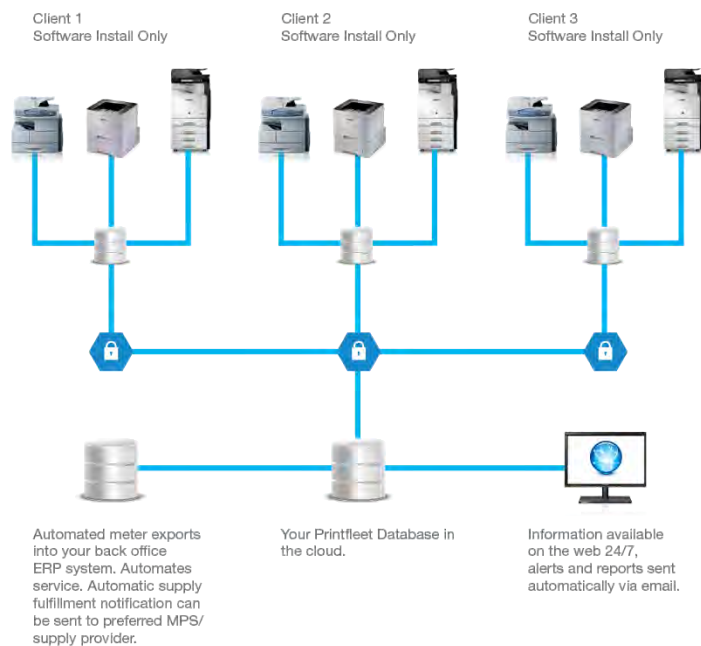

Samsung partners with specialists who are best-in-class in their fields. For print management software, we chose to partner with the most efficient, most effective print management software on the market, PrintFleet Enterprise.

PrintFleet Enterprise's cloud software has been proven in thousands of companies, helping them to manage their printing systems through unparalleled data collection, unmatched data integrity and extensive information reporting capabilities.

With PrintFleet Enterprise cloud software, Samsung offers a low-cost, reliable and scalable platform that will deliver cost savings to businesses through enhanced productivity.

How it Works

The software and its associated data are hosted in the cloud. The software collects critical printing data directly from each device every few programmable minutes and sends it to a central database server, where it becomes easily accessible via a custom web portal. Data is completely secure, and access is controlled via user-based security control protocols.

Agnostic and Comprehensive Model Database

PrintFleet Enterprise simplifies the complexity of managing an infrastructure of printers and MFPs that must be monitored, maintained, serviced and supplied with consumables. Regardless of manufacturer, PrintFleet provides a single tool for control and accountability.

Solid Foundation

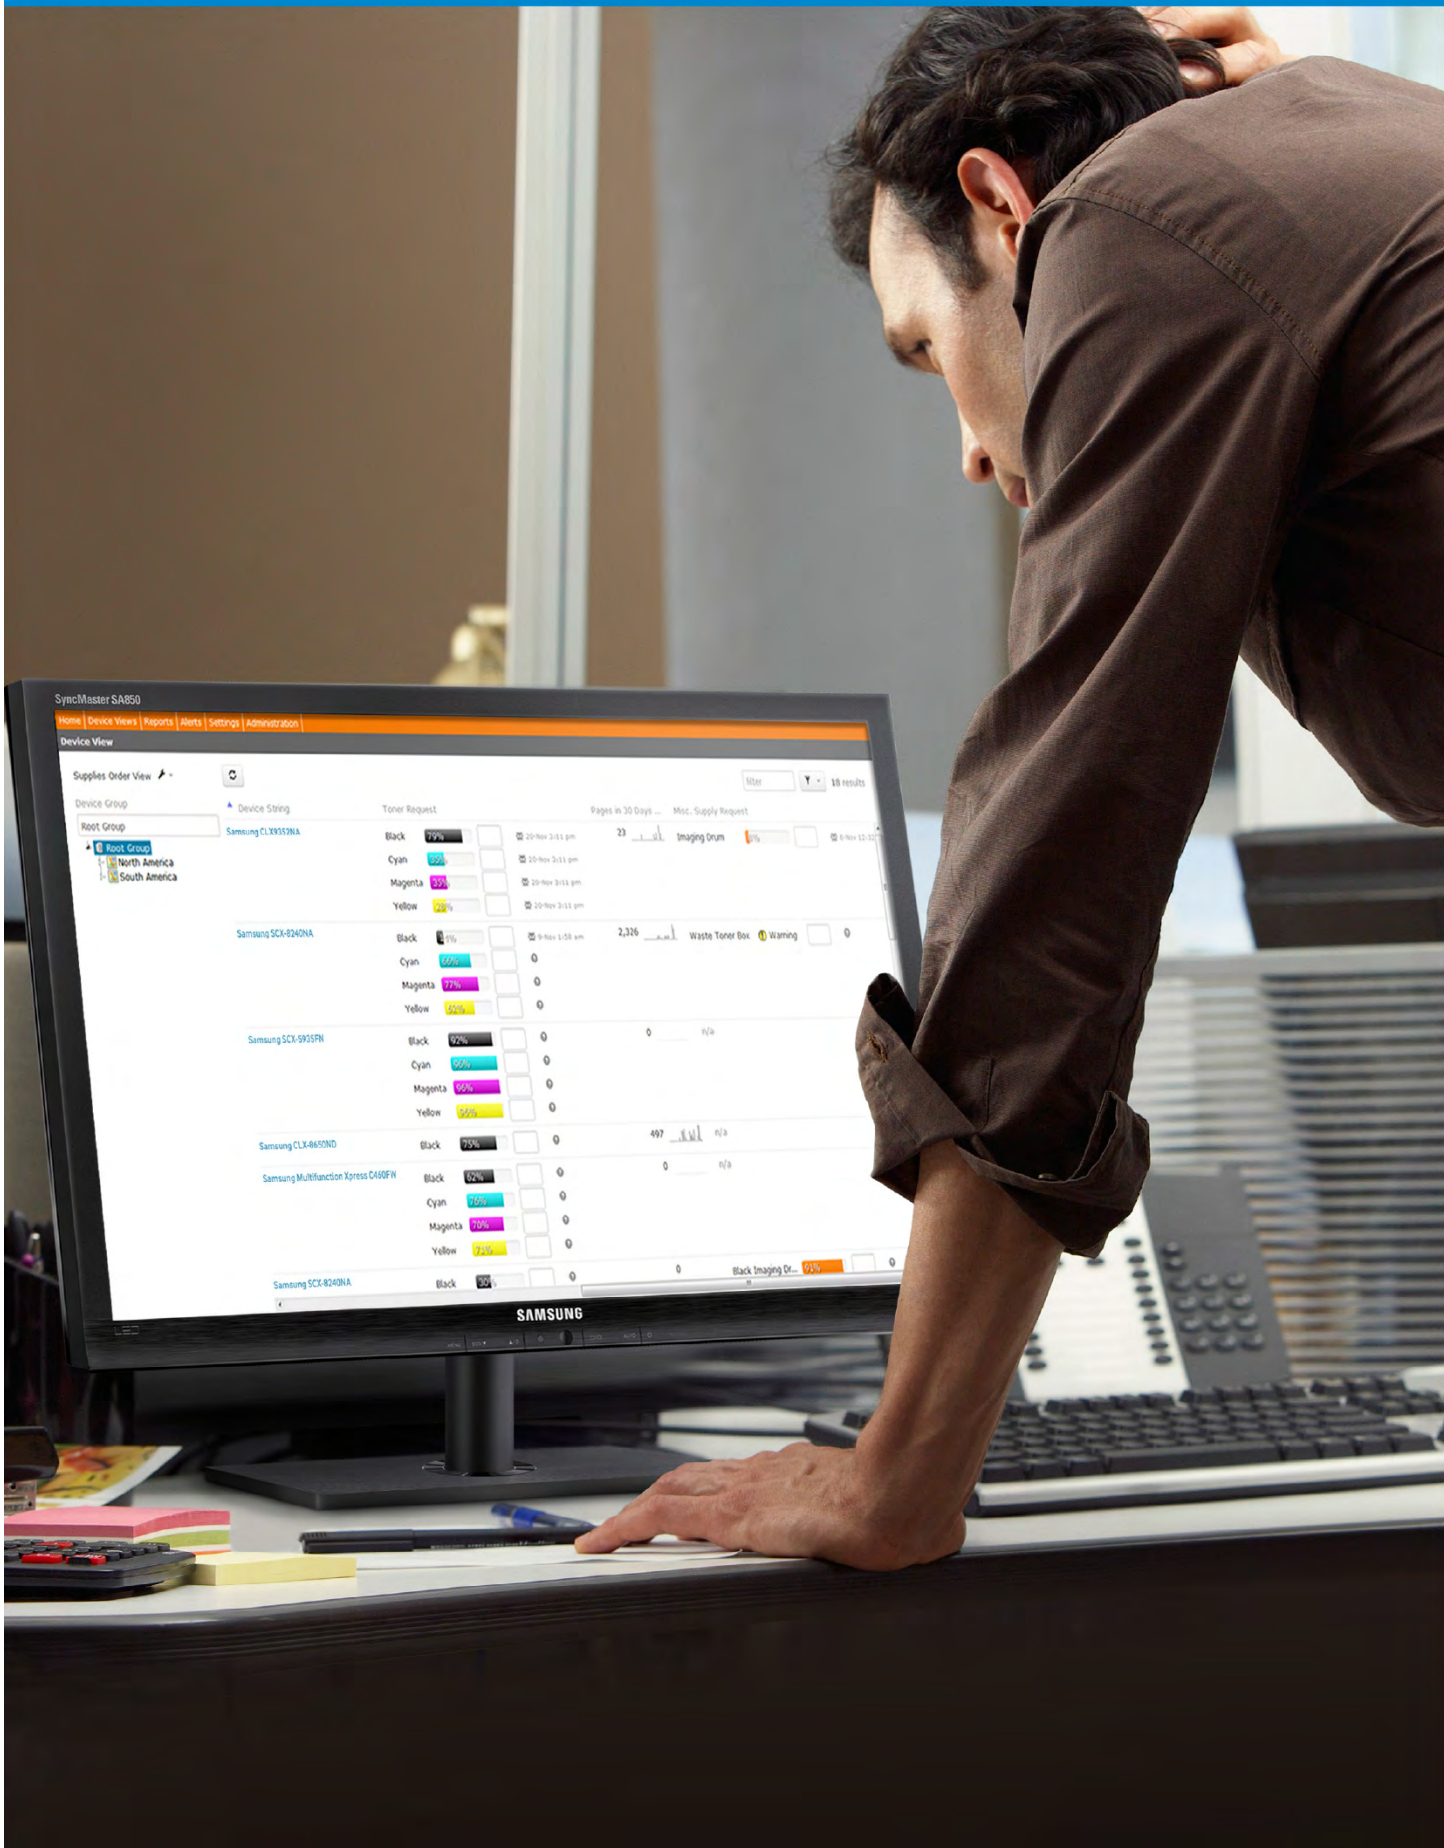

With rapid device discovery and polling, PrintFleet Enterprise can manage hundreds of thousands of devices from the cloud. And it's designed specifically for easy and simplified integration into ERP solutions, and MPS service and supply providers.

Create Reports for Internal and External Use

Improve decision-making capabilities with detailed reports easily created and displayed in a variety of formats, including CSV for easy data manipulation. Reports can be scheduled to inform of such things as when and where supplies or service are required most. The customizable reports can be sent automatically to one or more email recipients on a regular basis, or can be downloaded as PDF documents directly from a web interface.

Develop Proactive Supplies and Service Programs

Create status alerts based on event and occurrence thresholds, triggers, standard and vendor error codes, and even LCD screen text. The software can also notify users when select alert conditions occur multiple times over a specified time period. This can help avoid sending a technician for trivial issues (paper jams), and can alert users to send a technician when a device has multiple incidents within a given time period.

BUSINESS CORE™ PRINTING SOLUTIONS

DEVICE MANAGEMENT AND DOCUMENT PROCESSING

Samsung's Business Core printing solutions offer the ideal combination of security, workflow, device management and document processing to meet the needs of small-to-medium sized business (SMB) customers, who are looking for productivity and cost efficiency (serverless) without an extensive IT investment. Designed to run on Samsung's new generation multifunction printers, the new Business Core printing solutions provide an essential suite of offerings to create efficient and customizable workflow experiences.

Cost-Effective

- No additional cost for server and maintenance (All Solutions)
- Reduce the cost of print environment (SecuThru™ Lite 2 and SmarThru™ Workflow Lite)
- Easy print cost management (Usage Tracker)

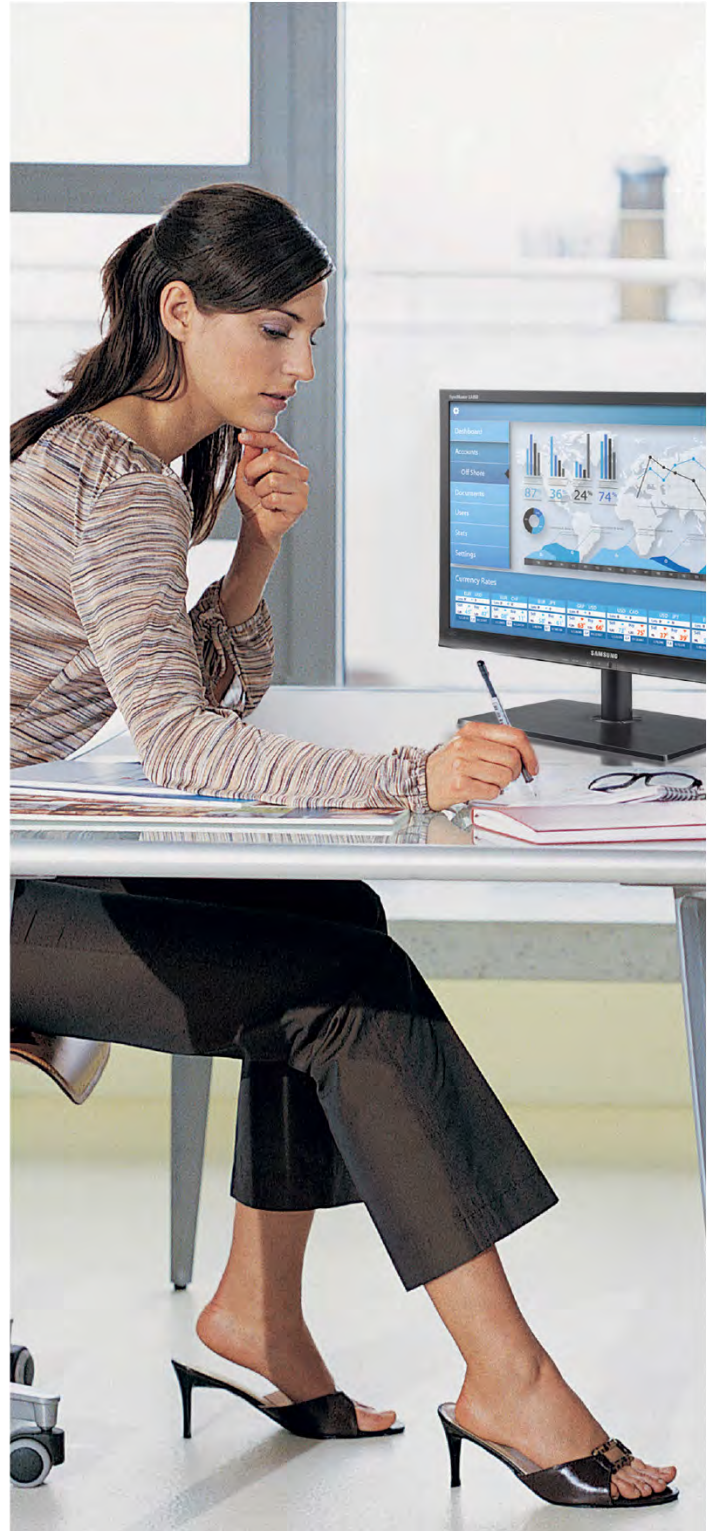

Secure and Productive

- Secure pull printing (SecuThru™ Lite 2)
- Digitized and automated workflow (SmarThru™ Workflow Lite)
- Access to cloud service (GoogleDrive and SharePoint with Cloud Connector)
- Secure login (Secure Login Manager)

Easy To Install and Use

- Simple installation with SyncThru™ Web Service
- Minimal steps to operate with all solutions
- Easy to access (card login with Secure Login Manager and SecuThru™ Lite 2)

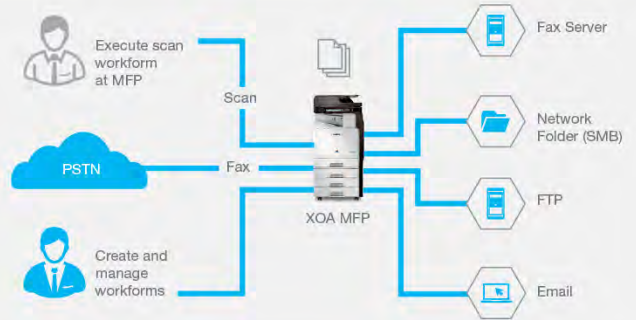

WORKFLOW AND DOCUMENT MANAGEMENT

SmarThru™ Workflow Lite

Increase productivity with a cost-saving automated workflow solution.

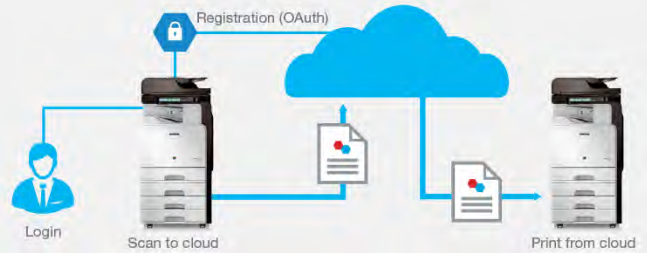

- One-touch scan for simple distribution to multiple locations
- Send docs to destinations based on text content (OCR) or barcode scans
- Automatically route incoming faxes based on Caller ID number

Cloud Connector

Scan to and print from the cloud with easy, secure access.

- Supports SharePoint, Google Drive, Evernote* and Skydrive*
 - Scan PDF, TIFF, JPG and XPS, print PDF, TIFF, JPG and Google docs
- *Q1 2014

Secure Login Manager

Guard valuable data and devices from unauthorized use.

- Documents released only to authorized users
- Customized authentication via LDAP

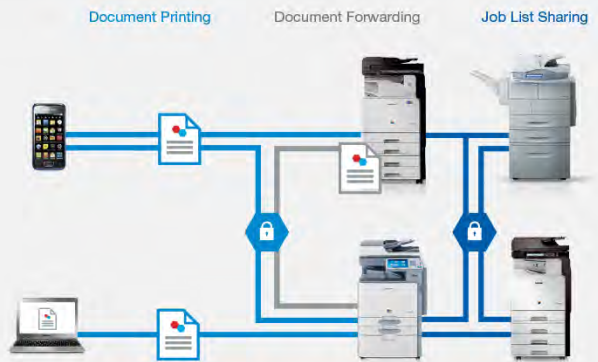

OUTPUT MANAGEMENT

SecuThru™ Lite 2

Enhance document security and reduce costs with user authentication.

- Serverless pull printing solution
- No additional server means costs up to 70% lower (vs. traditional server based pull printing investment)
- Reduced print costs from unclaimed printouts
- Delivers printouts to up to 500 authorized users from up to 10 devices
- Authenticate by ID/PW, proximity card and PIN

*Networked MFPs with XOA + SecuThru™ Lite 2 + Card Reader

Usage Tracker

Control printing expenses by easily tracking device functions.

- Track each user's print, copy, scan and fax counts on up to 10 devices without a server
- Delivers notifications about usage report by email
- Can aggregate reports on up to 10 devices

SYNCTHRU™ ADMIN 6 SERVICE

FLEET MANAGEMENT FOR MULTIPLE NETWORK PRINTERS

Samsung SyncThru™ Admin 6 is a robust printer fleet management solution that helps organizations increase their efficiency and productivity. This tool is easy to install, and allows IT administrators and support staff to manage, monitor and diagnose multiple printing devices remotely. In addition, SyncThru™ collects summary data on an ongoing basis and can deliver status and analysis reports that can assist a user in monitoring their print infrastructure. It also maintains an advanced, professional performance level.

Interactive Widgets Enable Administrators to Manage Fleets with Greater Ease

The SyncThru™ Admin 6 PC Dashboard uses visually stunning interactive widgets to help users manage multiple devices across their entire print infrastructure. Up to 5,000 printing devices can easily be monitored on a single screen. Each widget is displayed as an image, pie chart, table or columns, ensuring that your data is always legible and easy to analyze. In addition, every widget is directly linked to a related report or printing device list which can be viewed on demand.

Mobile Dashboard Displays the PC Interface on your Mobile Device

Users can monitor printers with ease even when away from the office, thanks to the Mobile Dashboard. This feature helps increase efficiency and productivity by displaying select PC Dashboard widgets on a wide range of smartphone and tablet devices connected to the company's intranet. With the capability of managing print devices on the move, administrators can respond quicker than ever to events and errors. Real-time SNS notifications are sent to a registered PC or mobile device, alerting administrators to interruptions or print-related issues.

Automate Repetitive Tasks Using the Automated Task Manager

The SyncThru™ Admin 6 Automated Task Manager saves users time by streamlining the processing of recurring tasks. When devices are added or removed from the fleet, their state changes, or they issue an error message. SyncThru™ can react automatically by sending a Tweet or email message, or by applying a predefined configuration. This feature simplifies Install, Move, Add, Change and Disposal (IMACD) processes, meaning a new device can be integrated into or withdrawn from the appropriate device group automatically and seamlessly. Rules are simple to set through an automated Wizard process.

SMARTHU™ WORKFLOW 3

DOCUMENT MANAGEMENT SOFTWARE

DIGITAL DOCUMENT-SENDING SOLUTION

SmarThru™ Workflow is a digital document-sending solution that streamlines and simplifies document workflows, from capturing paper and electronic documents, to distributing them to predefined destinations and processes.

The key to customized workflow for the scanned document is Workform, which enables settings for one-stop transmission from the device to final destinations. This solution is a web-based application supporting multiple users and devices. Functionality of SmarThru™ Workflow can be extended with various plug-ins.

Cost-Effective

- Reduces business costs by digitizing hard copies of documents

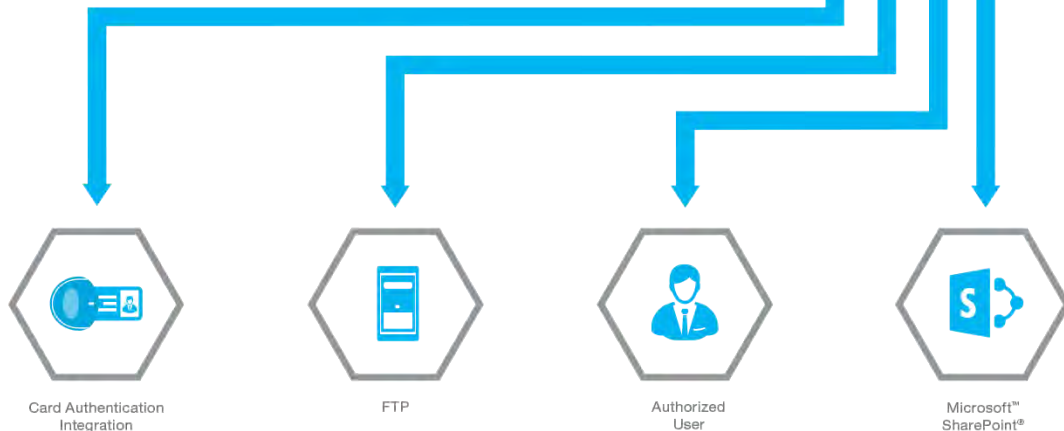

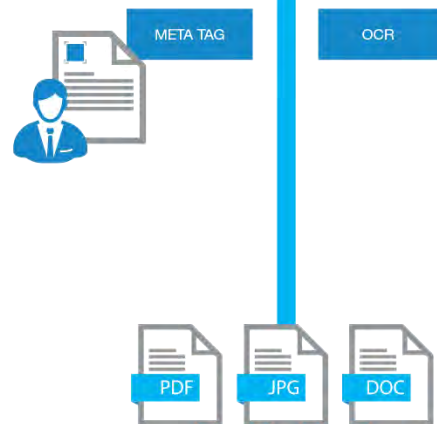

Secure and Productive

- Improves business efficiency
- Provides a secure data transferring system
- Verifies users with authentication
- Serves as a SharePoint® connector
- Provides card authentication integration
- Works with Business Core™ Solutions

Easy To Install and Use

- Easily integrates into your existing infrastructure
- Enables automatic workflow based on OCR

CAC: COMMON ACCESS CARD*

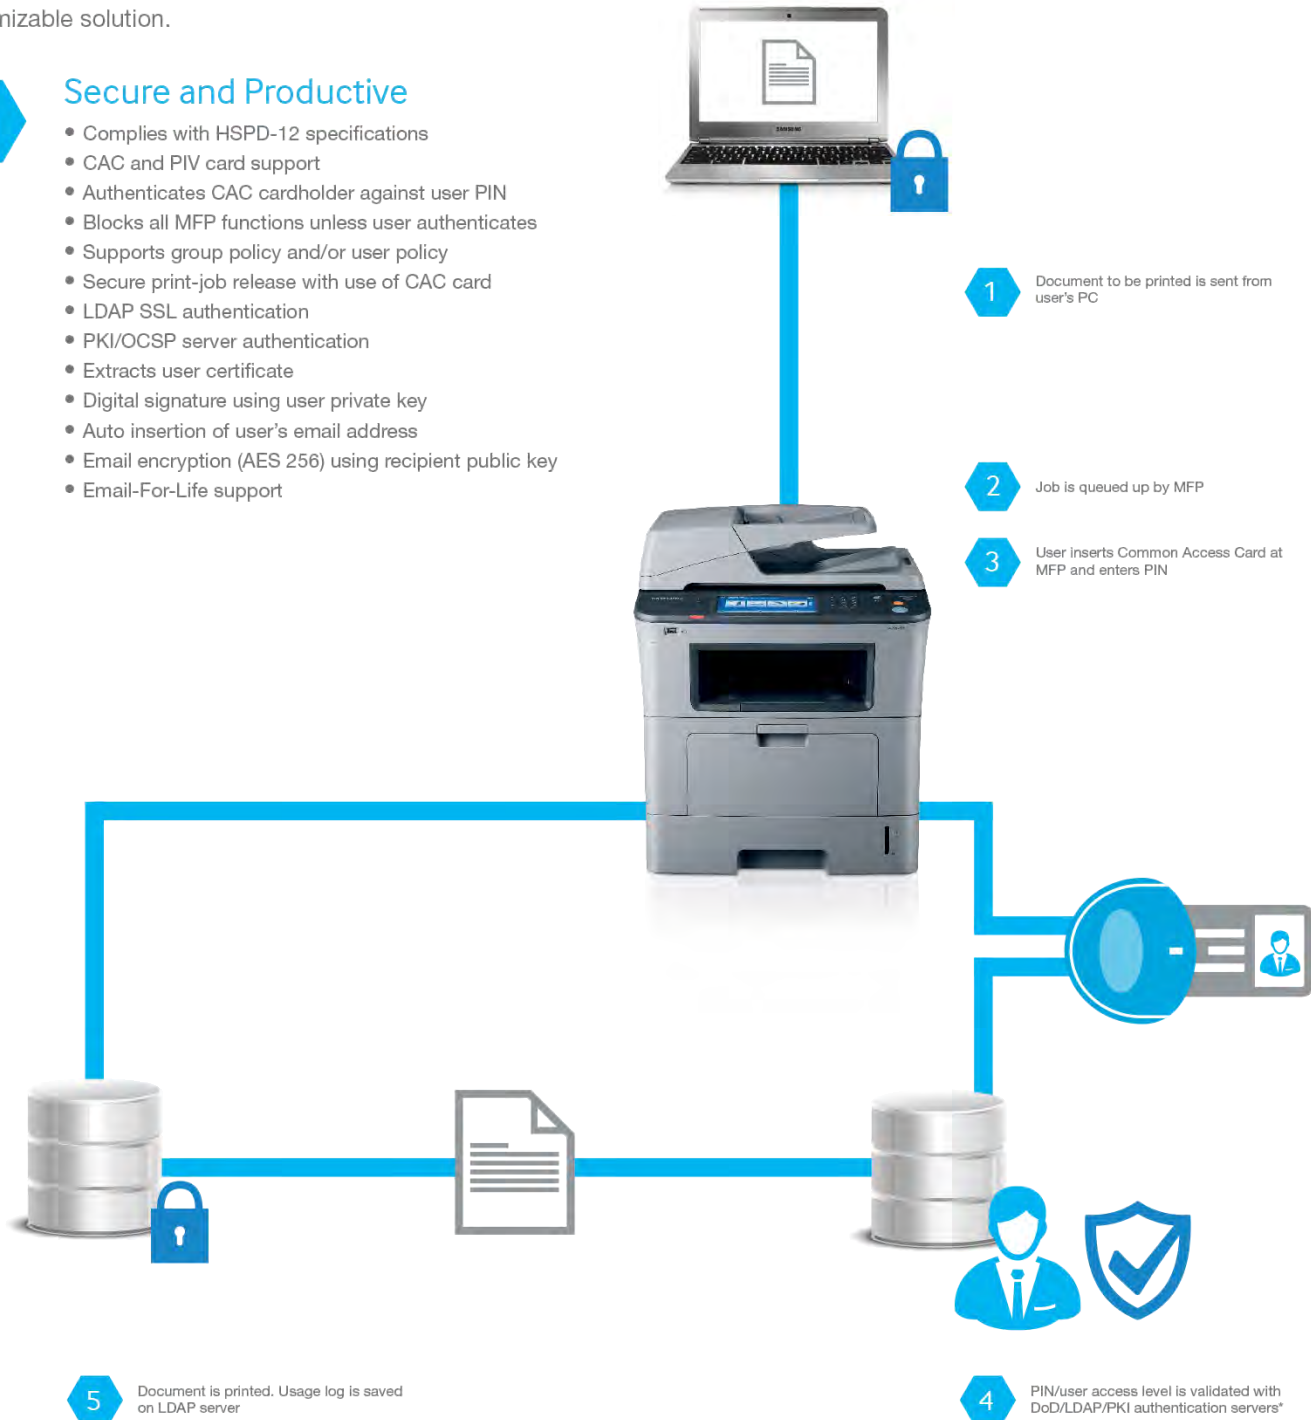

Samsung printer solutions support Government needs for CAC (Common Access Card) Authentication with a simple, secure, customizable solution.

Secure and Productive

- Complies with HSPD-12 specifications
- CAC and PIV card support
- Authenticates CAC cardholder against user PIN
- Blocks all MFP functions unless user authenticates
- Supports group policy and/or user policy
- Secure print-job release with use of CAC card
- LDAP SSL authentication
- PKI/OCSP server authentication
- Extracts user certificate
- Digital signature using user private key
- Auto insertion of user's email address
- Email encryption (AES 256) using recipient public key
- Email-For-Life support

Typical Workflow to Release Print Jobs

*For some devices

AN INTEGRATED SOLUTION

The XOA (eXtensible Open Architecture) is an open architecture platform that supports full customization of components. With it, all Samsung multifunction printers/copiers can provide a uniform look and feel. XOA allows users to develop and install custom applications onto their Samsung MFPs, which can then be developed by Samsung or solutions partners.

The XOA is based on Java™ and Web technologies. It provides Java APIs and Web Services to extend the functionality of Samsung MFPs. Solutions partners can create their applications with Java as embedded applications and develop external applications with Web Languages.

INTEGRATE THIRD PARTY SOFTWARE

The Samsung XOA Platform allows organizations to integrate third party software solutions with Samsung devices, instantaneously extending the functionality of the devices and reducing or even eliminating the need for further hardware investment. Such flexibility ensures uninterrupted productivity and minimal downtime during integration and installation.

The benefits of XOA include:

- Enables intelligent integration across a wide range of network services
- Easy integration means minimal downtime during installation
- Provides a flexible solution for continuous productivity
- Maximizes extensibility and customizability
- Solutions can be easily updated anytime

PRODUCTIVITY IS NOW DOWNLOADABLE

The smartphone makes businesses more productive than ever. People are reachable no matter where they are. Critical questions can be answered immediately. Emails no longer pile up. About the only thing that could increase the smartphone's productivity is the ability to print important emails, PDFs and Microsoft® Office documents.

That's exactly what the Samsung Mobile Print app does. With this free download, businesses have the power to print, fax and scan directly to and from any Samsung printer or MFP on a wireless local-area network with a secure Wi-Fi access point, or via Wi-Fi Direct on select models.

Documents can be printed and shared. Time-sensitive papers can be printed, signed, scanned or faxed and emailed back. All without the need for an external server or PC.

Google Cloud Print Lets you Access your Printers from Anywhere

Google Cloud Print allows business users to print to their Samsung printers and MFPs from any device, at any time, from any place. This gives unparalleled flexibility, greatly enhancing the ability to work on the move. It also supports driverless printing from smartphones, tablets, and a growing list of devices and web applications. And it's the best way to print from Chromebooks, as the functionality is built right into the Chrome OS.

Scan to a Smartphone or Tablet

Using a Samsung Multi-Function Printer, documents can be scanned directly to a smartphone or tablet as PDF, JPG or PNG files. It's perfect for importing signed contracts.

Print From a Smartphone or Tablet

Print directly to any Samsung printer or MFP on a wireless local-area network with a secure Wi-Fi access point, without the need for an external server or PC.

Fax From a Smartphone or Tablet

A range of documents can be faxed directly from the Mobile Print app. Fax from documents in Google™ Drive and/or email attachments, and Microsoft® Office documents through your Samsung MFP.

Works Automatically

Download the Mobile Print app from Google Play on Android or the App Store. Launch it, and it automatically detects Samsung printers on the network, both wireless printers and network printers.

Print Emails, Attachments, MS Office Documents and More

This versatile and powerful app can print emails, photos, web pages, PDF documents, Google™ Docs documents, Salesforce.com® documents, documents from the cloud and MS Office documents.

Compatible with Virtually Every Smartphone or Tablet

The Samsung Mobile Print app is compatible with Android, iPhone and iPad. It makes every smartphone smarter.

Near Field Communication

NFC* technology makes mobile printing easier than ever. With just a simple tap of the NFC tag with a mobile device, the user is authenticated with the printer and the Mobile Print app is launched, eliminating the manual process and allowing users to print immediately.

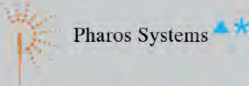

*Only for NFC enabled devices

Take Full Advantage of Printer Features

The Mobile Print app can take full advantage of an individual printer's options, including duplex printing, color, orientation, paper type selection, multiple copies and printing a select page from a large document.
