

Samsung Wireless Enterprise™

Designed with Mobility in Mind

KEY FEATURES

Intelligent Beam Selectable Antenna (IBSA): expands service coverage and increases receiving sensitivity

AirMove: Provides seamless service and greater throughput

AirEqualizer: guarantees airtime fairness between multiple devices

Self-Organizing Network (SON): automatically optimizes cell configuration and coverage to suite specific network requirements

Voice Aware Traffic Scheduling (VaTS): schedules voice traffic to ensure crystal clear voice in high density environments

Dedicated Security RF Monitoring: provides continuous real-time monitoring of data service

Wireless/Wireline Integrated Management: supports access switch management and efficient wireless infrastructure control

Remote Management Using Smartphones: allows remote monitoring of the wireless network and quick response anytime, anywhere

Samsung Wireless Enterprise presents a whole new level of wireless with an end-to-end solution that addresses the complex demands of mobility and brings together enterprise-ready devices, security frameworks, wireless infrastructure and voice over wireless LAN for more Efficient and Collaborative Work Environment.

From optimized WLAN infrastructure, enterprise-grade applications, and robust phone systems to full-featured IP phones, gateways and routers; Samsung Wireless Enterprise™ portfolio provides a dynamic system architecture that scales to accommodate growth and meets a variety of business communications needs.

Samsung Wireless Enterprise Benefits

- Optimized wireless environment that makes the most of mobility in the workplace
- Seamless and secure mobile experience ensured by seamless handoff from access point to access point with no latency
- High-quality voice, video and data on more devices within a wider range
- User-friendly WLAN management tools provide stability and operational convenience
- Robust and cost effective wireless infrastructure
- Short design schedule and reduced design cost
- End-to-end solution that simplify deployment, installation and management

Discover our comprehensive communication solutions and let your business gain the benefits of Samsung's leading technology.
