

# Multiple monitors help employees get more done

Even with today's highly mobile workforce, multiple monitors make the most of the time employees spend at their desks.

Daily screen time<sup>1</sup>

Although smartphone and tablet use is on the rise, today's workforce still **spends most of their day working on their laptops.**

laptops

smartphones

tablets

By connecting additional monitors to those laptops, employees can be more productive.

## Multiple displays, multiplied productivity<sup>2</sup>

"Respondents got on task quicker, did the work faster and got more of the work done with fewer errors in multi-screen configurations."

Respondents reported:

## See more and do more

Switching back and forth between documents with one monitor is inefficient. Multiple monitors let employees **see the whole picture, at once.**

## ROI on day 1

Unlike other investments companies can make, multiple monitors deliver increased productivity right away.

multiple monitors - **1 day**  
software upgrade - **1 week**  
hardware installation - **1 month**

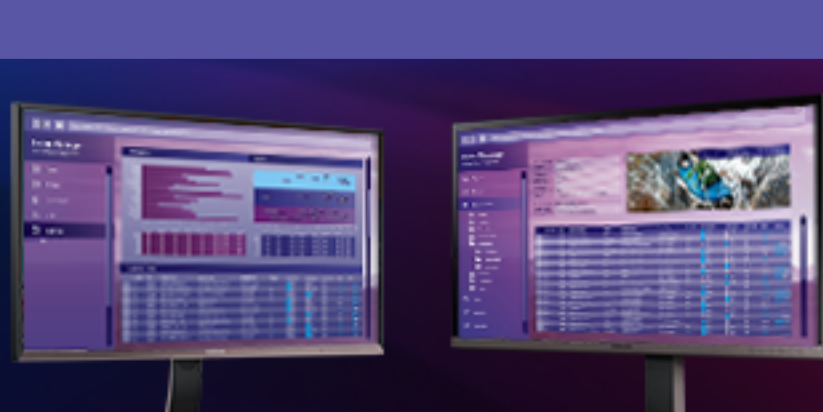

Declining monitor costs make realizing ROI even faster.

## Curved monitors give you even more

Samsung curved monitors provide an immersive experience, greater productivity and reduced eye strain for employees. Multiple curved monitors create an effective work space.

Comfortable, equidistant viewing from edge to edge

Multiple monitors for multiple needs. Samsung offers a wide selection of monitors to meet specific workforce needs and requirements.
