

SAMSUNG
KNOX

THE BEST AVAILABLE SECURITY EXPERIENCE

Why are Samsung Galaxy mobile devices, featuring KNOX Workspace, the most secure¹ Android solution in the marketplace?

Here are six reasons:

1

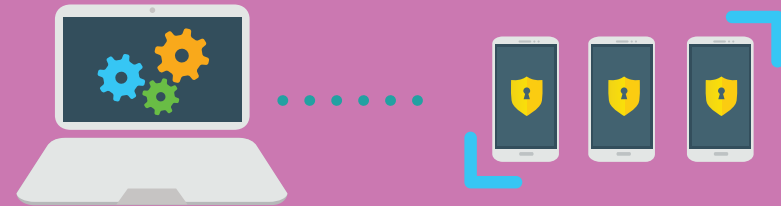

Trusted by governments and top security organizations

Awarded best security product at the 2015 Mobile World Congress, KNOX Workspace meets and exceeds stringent security standards required by government agencies and regulated industries such as healthcare and finance.

2

Can be customized for any business

Offers IT admins granular control with more than 600 policies and 1,500 APIs, giving businesses flexibility to customize a unique solution to fit their needs.

3

Provides a complete security solution for the business

Provides defenses against boot-time (persistent) rooting of devices, run time attacks, and a FIPS-certified VPN to protect data-in-transit.

4

Fully enterprise-ready, with extensive support and integration

Integrates deeply with key MDM solutions, and features a wide-range of VPN support. It also features single sign-on capabilities and rich integration with Exchange email. (Active Directory for single sign-on).

5

Easy to deploy and allows for cost-control

IT admins can enroll hundreds of Samsung devices into their business at once with KNOX Mobile Enrollment. And Enterprise Billing capabilities make a distinction between data costs incurred from apps within the container to those incurred in the personal space.

6

Access Enforcement via Active Directory

Allows for Active Directory integration, so users can simply use their corporate credentials to access the secure container. This gives IT more control over access and users one less password to remember.
