

Displays in healthcare

Easy patient access to information, education and entertainment materials

The patient experience no longer resides just with the doctor but also with the infrastructure around the doctor. Whether it is the initial visit to the doctor's office, visitors needing directions within the hospital, relatives seeking patient updates, or patient room engagement, Samsung's vast portfolio of displays provides the visual solutions that touch every aspect of a hospital visit and stay.

These solutions can cover the patient room, the hospital cafeteria, the waiting room, hallway navigation, donor walls, as well as teaching centers. And the solutions are easy to implement, update, or change because of display features such as integrated Wi-Fi, modular touch overlays, and an embedded media player.

Stunning picture quality, up to 50% energy savings, hospital compliant features and a full portfolio of easy to use solutions make Samsung displays and monitors the choice for hospitals and long-term care.

Why Samsung Displays?

Internal smart signage platform media player offering ease of use and no additional cost for external box

Touch overlay for interactive wayfinding and eboard conference room solution

Full array of sizes (10"-105") to meet hospital requirements in any space

Displays in healthcare

Making Your Room Intelligent

Samsung eboards can display a wide variety of information for a patient to read in their room, such as room phone number, names and photos of their caretaker team, and their schedule for the day. Combine the eboard with Samsung TVs and tablets and the patient has an integrated intelligent room at their fingertips for increased patient satisfaction during their hospital stay.

Waiting Room Anxiety

Waiting for a loved one who is undergoing surgery and trying to find out their status can be very stressful. Real-time communication to family members and friends is extremely beneficial to them, as well as to the hospital and their patient satisfaction scores. Samsung reliable and energy efficient displays communicate the latest up-to-date patient information to families, friends, and medical staff.

Navigating The Hospital Maze

Hospitals are becoming more aware that patients and visitors struggle to navigate the maze of the modern medical complex. This only adds to patients' anxiety at a time when many are feeling ill. Samsung interactive wayfinder displays with modular touch overlays assist those who are seeking out their doctor or testing location. Our display solutions also provide security and emergency alerts, as well as communicating hospital events and programs.
