SAMSUNG MOBILE PRINT APP AND GOOGLE CLOUD PRINT

THE POWER TO PRINT, SCAN AND FAX ANYWHERE.

The Samsung Mobile Print App makes the smartphone smarter.
Increase your productivity with the Samsung Mobile Print App, available as a free download for Android and iOS platforms. You can print, scan and fax directly to and from any Samsung printer or MFP on your local wireless network or via Wi-Fi Direct on select models. Print important emails, PDFs and Microsoft® Office documents, all without the need for an external server or PC. It's no wonder it was awarded BLI's 2012 Pick for Outstanding Mobile Print App.

Google Cloud Print lets you access your printers from anywhere.
Google Cloud Print allows business users to print to their Samsung printers and MFPs from any device, at any time, from any place. This gives unparalleled flexibility, greatly enhancing your ability to work on the move. It also supports driverless printing from smartphones, tablets, and a growing list of devices and web applications. And it's the best way to print from Chromebooks, as the functionality is built right into the ChromeOS.

The Samsung Mobile Print App and Google Cloud Print. They'll benefit businesses everywhere.

Samsung's Mobile Print solution earned the Summer 2012 Pick as "Outstanding Mobile Print App" from Buyers Lab, Inc.

Samsung Mobile Print App

Print Emails, Attachments, Microsoft® Office Documents and More

Print directly to any Samsung printer or MFP on a wireless local-area network with a secure Wi-Fi access point, or via Wi-Fi Direct on select devices, without the need for an external server or PC. Print emails, attachments, photos, web pages, PDF documents, Salesforce.com® documents, documents from the cloud via Google™ Drive, and even Microsoft® Office documents.

Scan or Fax to a Smartphone or Tablet

Using a Samsung MFP, documents can be scanned directly to the smartphone or tablet as PDF, JPG or PNG files. Documents can even be previewed before scanning. You can also fax a range of documents directly from the Mobile Print App.

Take Full Advantage of Secure Printer Features

The Mobile Print App can take full advantage of an individual printer's options, including duplex printing, color, orientation, paper type selection including ledger, multiple copies, authentication, job accounting, secure print and printing a select page from a large document.

Compatible with Virtually Every Smartphone or Tablet

The Samsung Mobile Print App is compatible with Android, Windows Mobile™, iPhone® and iPad®. It makes every smartphone smarter. And a special landscape view for tablets brings greater flexibility and easier operation.

Works Automatically

Samsung Mobile Print functionality is built right into the latest Samsung Galaxy Devices, including the Galaxy S4, Note 3 and Tab 10 3.0. Users can print from compatible apps directly through the Android menu. In addition, many of our printers and MFPs are compatible with Apple AirPrint, giving iOS users the same functionality built directly into their devices, without the need for downloading the App.

Google Cloud Print

Convenient

With Cloud Ready printers, the Google Cloud Print experience is ready right out of the box. After registering your printer with Google Cloud Print servers, it's always available; whether you're in the office or on the road.

Safe

Google Cloud Print takes the security of your files very seriously. Documents are transferred over a secure HTTPS web connection. After a job is completed, the associated document is deleted from the servers. In addition, you can delete jobs and their history at any time through the Google Cloud Print management page.

Shared

Google Cloud Print allows you to share printers with friends, family or coworkers as easily as you would share a Google Doc file. From the Google Cloud Print management page, it takes only a single click to share printers that you own with trusted individuals. You can also track print jobs on your shared printers, and modify or revoke share rights at any time.

Chromebook Ready

Google Cloud Print is the standard printing technology used by ChromeOS on Chromebooks. You can print any web page directly on a Chromebook by hitting Ctrl + P, or you can print from within your web apps by looking for the Print with Google Cloud Print button. revoke share rights at any time.
