

Robust Security. Stronger Business.

Our proactive services ask “What next?” so you don’t have to ask “What now?”

In a rapidly evolving mobile environment, finding the right balance for your mobile security can be challenging. Too little or outdated security can leave your company vulnerable to threats. Too much, and security becomes a burden to innovation. Whether you’re deploying new technology, undergoing a merger or reconstruction, or need a health check on your company’s risk potential, our security assessments can help.

Samsung analyzes your current mobile environment to create a cohesive security solution tailored to your goals. We help ensure you have the people, processes and technology in place necessary for success.

Over 64% of companies with mobile workforces expect their mobile security budget to increase.

Mobile Security Must Move Beyond MDM, a commissioned study conducted by Forrester Consulting on behalf of Samsung, October 2014.

Take It From The Experts.

Samsung Business Services and Booz Allen Hamilton have partnered to develop a unique Mobile Security Assessment Model to assess and improve the effectiveness of corporate mobile security programs. This cutting-edge model is based on trusted FS Shared Assessment Methodology, ISO 27001, COBIT, FedRamp, CSA and other international security standards.

Using this master framework, we untangle your mobile security to identify and remove bottlenecks in efficiency. Depending on your company’s specific needs, we can review any combination of nine specific control areas at a high level or in depth.

Samsung Business Services: Security Services

Two-Day Mobile Security Workshop

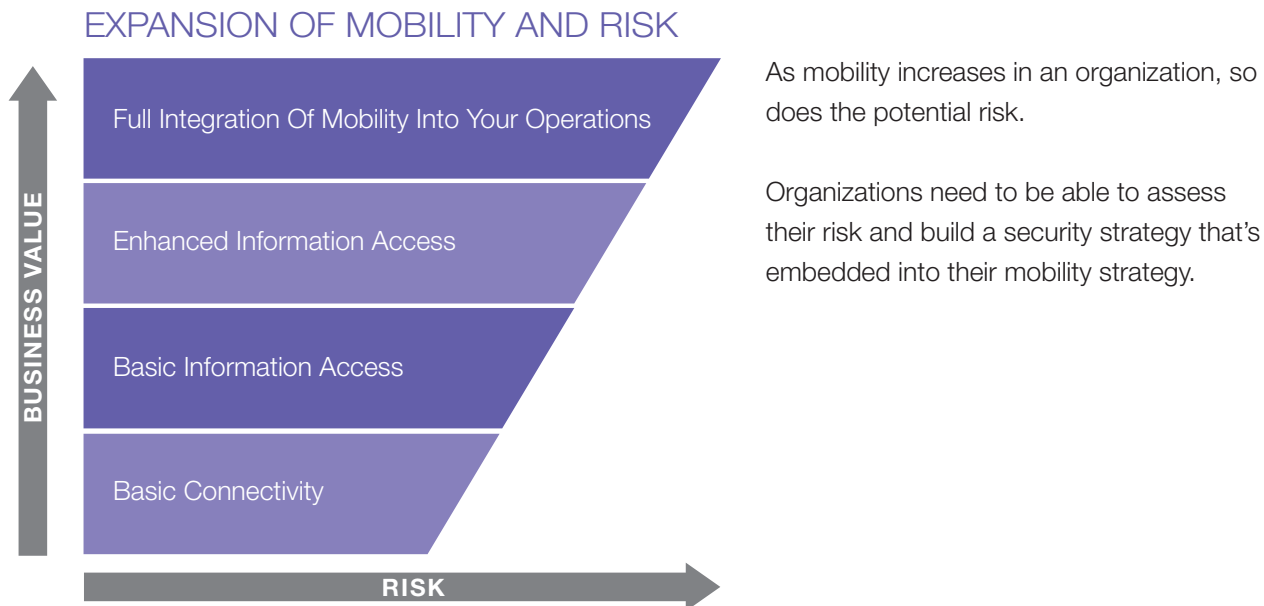

This onsite workshop is a high-level assessment of your security framework, mobile device management implementation, log and control settings, mobile application development strategy, mobile portal and more.

We review findings with you, highlighting strengths and opportunities. When needed, we identify areas that require further analysis.

Comprehensive Security Assessment

This assessment takes a deep-dive into your mobile security strategy. We review specific security policies as they relate to the environment, as well as the impact on the management of security risks. Beyond traditional IT functions, this assessment includes mobile and wireless security, policies and standards, and a legal and regulatory compliance review.

The outcome of this assessment is an actionable plan driven by deep insights from your business that sets you up for success.

Mobile security drives innovation, efficiency and improved customer satisfaction across diverse industries.
