MEET THE EZEE SHED®

*A STRONGER SHED with
EASIER ASSEMBLY*

WHEN IT COMES TO CHOOSING YOUR NEXT SHED OR GARAGE, WHAT IS MOST IMPORTANT FOR YOU WHEN MAKING YOUR PURCHASE?

- 1 Do you look for something that's fast and easy to assemble?
- 2 Do you want something in an attractive color that won't clash with the exterior of your backyard and garden?
- 3 Do you want a shed that will give you many years of reliable, attractive storage at an affordable price?

For most customers, finding a reliable outdoor storage shed that is attractive, affordable, reliable and easy to assemble is hard to find.
That's why we've created the EZEE Shed®.

Meet the EZEE Shed®

When our engineers set out to develop a shed that would check off all these boxes, they didn't just design a brand new shed; they reinvented the steel shed assembly system.

Unlike most sheds on the market today, the EZEE Shed® has a variety of features that makes it truly unique.

Up to 50% Less Hardware and 50% Faster Assembly

Our customers have spoken... and we've responded. We've cut down on the amount of hardware and developed a durable shed that assembles faster and more easily than before!

2X Stronger Design Compared to Leading Steel Sheds on the Market Today

The unique profile of the panels reinforces the shed's connection points, forming a heavy-duty fixed bond for a stronger, more durable shed that'll take on tough weather and resist impact. Wall panels overlap every 12 inches adding strength and an average of 15% more steel to the structure.

Attractive, Updated Color Pallet for Beautiful Storage

Aesthetics are important, and most customers look for an outdoor storage shed that will give their backyard an upgrade – adding to the allure of your garden and patio. Reliable storage it great to have, but why should it be an eyesore? With the EZEE Shed® we've not only introduced a new assembly system, we've also introduced an attractive and updated new color pallet.

Roof Assembly Made Simple

The EZEE Shed®'s unique ridge design makes roof assembly easy and cuts down on assembly time. Simply pre-build the roof on the ground and attach the roof to the side panels by fastening them securely into place.

Spacious Interior, Extra Storage Space

The EZEE Shed® features a higher roof design on the 8 x 7 ft. unit and an all-new extra high roof on the 10 x 8 ft. for more headroom and storage space. Both the 8 x 7 ft. and the 10 x 8 ft. offer 72 in. wall heights.

EZEE SHED® AND THE SNAP-IT™ QUICK ASSEMBLY SYSTEM

One of the features that makes the EZEE Shed® truly stand out is its revolutionary quick assembly system.

One of the biggest complaints we hear from customers about steel sheds is the amount of time it often takes to assemble these storage units. While reliable, these units can have a complicated assembly process with a lot of nuts, bolts and screws.

In a side-by-side comparison the EZEE Shed® features 50% faster assembly thanks to 50% fewer parts. With the EZEE® Shed, you can “build your shed in half the time.”

The EZEE Shed's Snap-IT™ Quick Assembly features the Snap-IT™ Lock which connects the steel wall panels of your shed together by snapping into place. Once snapped, the two panels are locked in and create a layered wall effect that increases the strength of your unit.

Once your wall panels are locked together every 12”, you’ll use the Snap-IT™ Channel to reinforce the connection of your steel panels with a steel channel.

THE RESULT IS A STRONGER SHED WITH EASIER ASSEMBLY

Arrow’s new unique steel geometry is more impact resistant, and with an overlapping Snap-IT panel every 12”, is a stronger overall building design.

Patent No. 6,543,197, B2
Patented in Canada

HOW ELSE DOES IT COMPARE TO STANDARD STEEL SHEDS ON THE MARKET TODAY?

1 It Looks Better

- o No exposed panel ends and everything is framed
- o The EZEE Shed® features an attractive door designed to match the shed

2 Assembly Is Easier

- o We've reduced screw heads across walls, roof and doors.
- o No more difficult nut/bolt connections!

3 Stronger Features for a More Durable Shed

- o Heavy Duty framed out design
- o 3 door hinges for increased durability

If you're looking for an affordable shed that is built strong, features an improved assembly system, and is an overall stronger and more reliable shed, consider the EZEE Shed®.
