

All purifiers are not created equal.

Highly Durable Polycarbonate

We utilize UV stabilized, V0 fire rated polycarbonate. This strong thermoplastic material can withstand extremely low and high temperatures, self extinguishes in case of fire, & will not degrade in the presence of UV. In other words, the Bi-Polar® 2400 is built tough to outlast your Air Conditioner.

Easy Installation

The Bi-Polar® 2400 can be installed in less than 10 minutes. It can be installed using included screws, zip ties, or clear adhesive strips.

Produces No Ozone

Our Bi-Polar® 2400 produces a high concentration of both positive and negative ions without the production of ozone.

Installs Directly inside AC Units

Can be installed in almost any system ducted or not. Ceiling mount, wall hung, furnace, & ptac installations to name a few.

Multiple Mounting Options

With two mounting holes located on the face of the unit as well as the bottom, the mounting possibilities are virtually endless.

No Replacement Parts

Gone is the day of constantly replacing filters or UV Lamps.

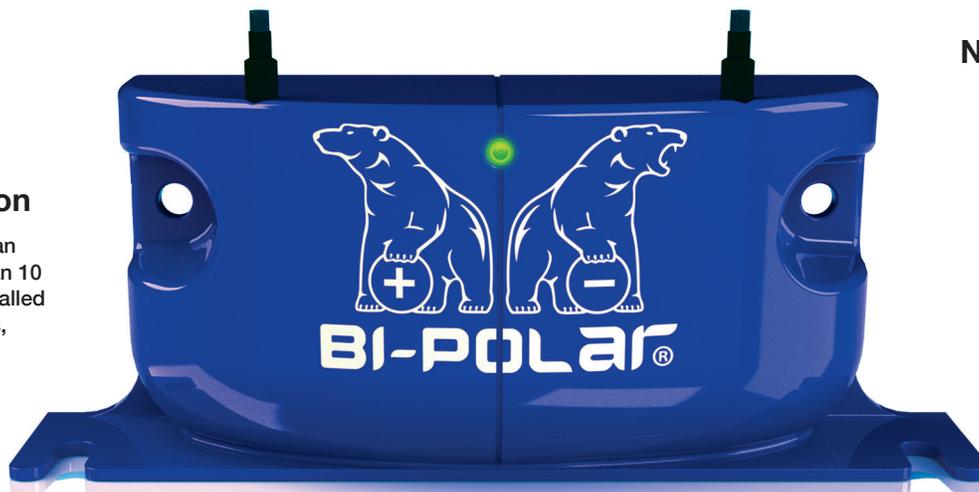

UL Listed

UL Listed to 867 Safety Standards

Energy Efficient & Environmentally Friendly

The Air Oasis® Bi-Polar® 2400 consumes less than 10 Watts of electricity, saving you money and saving the environment every day.

Highest Output

Bi-Polar® 2400 has the highest output of any Bi-Polar Ionizer in its class at 12 Kv! The Bi-Polar® 2400 is the size of a smart phone with the power to purify an entire home.
