High-Efficiency Comfort Solutions

Still Trusted After All These Years

A century is a long time to maintain a stellar reputation, but Bryant has achieved that and more since introducing its first product in 1904. From the start, Bryant earned its reputation of doing whatever it takes to deliver products of superior quality and performance. That continues today with the BA air conditioner models and the BH14 heat pump.

Energy-Saving Comfort*

Thanks to the ongoing commitment and dedication of our development and manufacturing teams, Bryant offers a wide range of indoor comfort solutions. Your builder has partnered with Bryant to offer the high-performing Model BA16 air conditioner. Depending on the Bryant furnace or fan coil match, these models can offer 14.5 SEER to 16 SEER configurations. Both of which are recognized by the U.S. Government's ENERGY STAR® program for low energy use.

*Only BA16 models qualify for ENERGY STAR®.

Peace of Mind

Having a great warranty helps you enjoy your comfort with confidence. Bryant builds trusted reliability into every product, then provides additional peace of mind with excellent warranty protection.

To the original owner, the Bryant® BA air conditioner models and the BH14 heat pump are covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Ask your Bryant dealer about optional extended warranties which may include labor.

*The limited warranty period is five years if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate at bryant.com for complete details.

Quality and Reliability

The BA air conditioner models and the BH14 heat pump are designed to provide years of lasting durability so you can focus on enjoying your new home. From initial design through product testing and an assembly process that includes our 5-step, 100% run test, we go beyond the industry's expectations for quality and reliability to be sure that every unit we make measures up to even tougher standards – yours.

We continuously look for new ways to create home comfort systems with just the right mix of technology, durability and performance.

1 ENVIRONMENTALLY SOUND, EXTRA-EFFICIENT
Our scroll compressor is designed for use with Puron® refrigerant to provide quiet, smooth-operating cooling and years of environmentally sound, trouble-free performance.

2 ENHANCED RELIABILITY
Bryant's Microtube Technology™ refrigeration system maximizes heat transfer to ensure efficient comfort while using less refrigerant. Coil materials and design minimize chances for rust and corrosion for enhanced reliability.

Model BA16 Air Conditioner

Before purchasing this appliance, please read the important energy cost and efficiency information available from your dealer. Manufacturer reserves the right to discontinue, or change, at any time, specifications or designs without notice and without incurring obligations.
