Extended Range Wireless Gateway

Overview

The Founten Extended Range Wireless Gateway has a wireless signal that reaches twice as far as the FS-GATEWAY. A single gateway is able to manage and communicate with up to 2000 Founten products. The gateway utilizes intelligent wireless technology to provide a secure and reliable connection. The gateway will automatically connect with any Founten products within range, which will then repeat the gateway's wireless signal to create a mesh network between all the Founten products installed at your property.

Founten Wireless Gateway
Part No. FS-GATEWAY-XR

Key Customer Benefits:

- **High-Speed Internet Connection**
- **Simplified Installation**
- **Small Footprint**
- **Affordable Solution**
- **No Extra Hardware to Install**
- **24/7 Email Customer Support**
- **Monday thru Friday, 9 - 5 PST Live Support**
- **3 Year Warranty**

Features:

- Wired Ethernet port and cable provided for easy connection into your Internet router or LAN
- Automatic Internet connectivity
- Wireless communication to your Founten products
- Encrypted high-speed connection for protection and reliability
- Removable command strips for product mounting
- Network connection status indicator light
- No interference with existing Wi-Fi Network
- Communicates outside of firewalled traffic

Specifications:
