

# MARS Surge Protective Device

MARS SERIES **795**

COMPONENT

## MARS HVAC Surge Protective Device

The MARS SPD is designed to protect your HVAC equipment for power surges, spikes and transients. Power surges can damage compressors, controls, sensors, logic boards and ECM motor electronics resulting in costly repairs. The MARS Surge utilizes state-of-the-art thermally protected MOV (TPMOV) technology to outperform competitive units while providing safe and reliable protection.

MARS SPD is designed to protect the entire HVAC unit and controls.

- Compressors
- Heat pumps
- ECM motors
- Control boards and sensors

### Features:

- Easy installation with weather proof enclosure
- Meets UL 1449 3rd edition standards
- LED protection indicator
- Fits ½ inch knockouts for ease of installation
- 18 inch leads for ease of installation
- Installation - type 1 and 2 (no additional overcurrent device required)
- TPMOV surge technology – thermally protected
- Max current surge 100KA
- \$7,500 connected device warranty
- 3 year warranty

### Specifications:

MARS NO	Voltage	Wire Configuration	Spd Type	MCOV	Enclosure	UL 1449 3rd Edition	Warranty
83900	120/240	L1,L2,L/N-G	1 or 2	150/300	Type 4X	YES-CSA	3 Years
