WELL-BUILT

since 1914

SINCE 1914, WE'VE BEEN DELIVERING ON OUR PROMISE TO CREATE SENSIBLE, AFFORDABLE PRODUCTS THAT DO WHAT YOU NEED THEM TO WHEN YOU NEED THEM TO. BECAUSE THE BOTTOM LINE IS THAT YOU JUST NEED HEATING AND COOLING FOR YOUR HOME - A COST-EFFECTIVE SYSTEM TO KEEP YOU COMFORTABLE. HOMEOWNERS WHO CHOOSE PAYNE ARE DELIGHTED IN THEIR DECISION BECAUSE IT IS SUCH A SENSIBLE CHOICE THAT SAVES THEM MONEY AT THE PURCHASE, AND KEEPS PERFORMING SEASON AFTER SEASON.

Right for you.

OUR PROMISE

The Well-Built Warranty.

Every packaged comfort system we build is covered with a 10-year parts limited warranty. This warranty applies to the original owner of the properly registered product. Heat exchanger carries a 20-year parts limited warranty.*

Visit payne.com for details.

WHAT IS SEER and AFUE?

Like a car's mpg, SEER (Seasonal Energy Efficiency Ratio) is the measure of cooling efficiency for a cooling system. It tells you how much heat is removed from your home in relation to how many watts per hour it takes to reach your set comfort level. To give you an example, the minimum SEER level for cooling operation in the U.S. is now 14. Payne offers models that exceed that, giving you even better efficiency.

AFUE (Annual Fuel Utilization Efficiency) is the measure of fuel efficiency for heating operation. It tells you what percentage of consumed heating fuel used actually goes into heating your home. For example, for each \$1.00 of heating fuel that the Payne PY4G uses, 81% (or \$.81) is used to actually heat your home. The higher the number the better, because when you waste energy you waste money.

PEACE OF MIND

When you purchase Payne® products, you will soon find out why they are right for you. Our packaged gas heating/electric air conditioning systems aren't just affordable – they're built to perform. And since packaged systems operate entirely outdoors, all components are designed for maximum durability.

- 1 Lasting protection** — Exterior cabinetry is coated with a rugged baked-on enamel finish to provide superior scratch and corrosion resistance.
- 2 Reliable R-410A compressor** — You want the most important part of the entire unit to stay running strong, right? With built-in protective features, our compressor operates quietly and reliably for years of cooling comfort.
- 3 Efficient heating** — Our Turbo-Tubular™ heat exchanger optimizes heat transfer from the unit. Before warm air is delivered to your living spaces, heated gases make multiple passes for increased efficiency. Plus, a tough, corrosion-resistant aluminum coating on the heat exchanger provides longer life.
- 4 Solid foundation** — Our durable, composite base features outstanding drainage to help inhibit mold, algae, and bacterial growth. Outside, metal base rails provide added stability, plus easier handling and rigging for the dealer.

PACKAGED GAS HEATING/ELECTRIC AIR CONDITIONING SYSTEM

ENVIRONMENTALLY-SOUND R-410A

This packaged gas heating/electric air conditioning system uses the EPA-approved and chlorine-free R-410A refrigerant, an environmentally-sound alternative to R-22, for minimal effect on the Earth's ozone layer.

PY4G-B*

14 SEER
81% AFUE

- Ground or rooftop installation
- Single-stage compressor
- R-410A refrigerant

For homes that are designed to use packaged units, these models have both the interior and exterior components of traditional split-system products combined in one outdoor unit.

*Tin-plated coil option available for improved protection.

PAINLESS PAYMENTS

Often the need for comfort doesn't always match the immediate ability to pay for it. So Payne makes life a little easier with 6 or 12 months of deferred interest, minimum monthly payment financing. There is a minimum monthly payment of 2.5% of the balance or \$30, but if you pay it off within the promotional period, you pay no interest.

Or, spread your payments over time with a reasonable fixed APR rate finance charge. Either way, you can enjoy comfort now when you need it with a Payne® dealer who offers GE Capital financing.
