DuPont[™] SUVA[®] 409A Refrigerant

Version 2.2

Revision Date 09/12/2011

Ref. 130000050843

This SDS adheres to the standards and regulatory requirements of the United States and may not meet the regulatory requirements in other countries.

SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product name Product Grade/Type	:	DuPont [™] SUVA [®] 409A Refrigerant ASHRAE Refrigerant number designation: R-409A
Tradename/Synonym	:	HCFC-22/HCFC-124/HCFC-142b BLEND
MSDS Number	:	13000050843
Product Use	:	Refrigerant
Manufacturer	:	DuPont 1007 Market Street Wilmington, DE 19898
Product Information Medical Emergency Transport Emergency	:	1-800-441-7515 (outside the U.S. 1-302-774-1000) 1-800-441-3637 (outside the U.S. 1-302-774-1139) CHEMTREC: 1-800-424-9300 (outside the U.S. 1-703-527-3887)

SECTION 2. HAZARDS IDENTIFICATION

Emergency Overview Misuse or intentional inhalation abuse may lead to death without warning. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. Rapid evaporation of the liquid may cause frostbite. Potential Health Effects : Contact with liquid or refrigerated gas can cause cold burns and frostbite.

Skin

Eyes

: Contact with liquid or refrigerated gas can cause cold burns and frostbite.

DuPont[™] SUVA[®] 409A Refrigerant Version 2.2 Revision Date 09/12/2011 Ref. 13000050843 Inhalation : Misuse or intentional inhalation abuse may cause death without warning symptoms, due to cardiac effects. Other symptoms potentially related to misuse or inhalation abuse are: Anaesthetic effects, Light-headedness, dizziness, confusion, incoordination, drowsiness, or unconsciousness, irregular heartbeat with a strange sensation in the chest, heart thumping, apprehension, feeling of fainting, dizziness or weakness. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. Carcinogenicity None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, or OSHA, as a carcinogen. SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS Component CAS-No. Concentration Chlorodifluoromethane (HCFC-22) 75-45-6 60 % 1-Chloro-1,2,2,2-tetrafluoroethane (HCFC-124) 2837-89-0 25 % 1-Chloro-1,1-difluoroethane (HCFC-142b) 75-68-3 15 % SECTION 4. FIRST AID MEASURES Skin contact : In case of contact, immediately flush skin with plenty of water for at least 15 minutes. Take off all contaminated clothing immediately. Consult a physician. Wash contaminated clothing before re-use. Treat for frostbite if necessary by gently warming affected area. Eye contact : In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Consult a physician if necessary. 2/12

DuPont[™] SUVA[®] 409A Refrigerant

Version 2.2

Revision Date 09/12/2011	Ref. 13000050843
Inhalation	: Remove from exposure, lie down. Move to fresh air. Keep patient warm and at rest. Artificial respiration and/or oxygen may be necessary. Consult a physician.
Ingestion	: Is not considered a potential route of exposure.
General advice	: Never give anything by mouth to an unconscious person. When symptoms persist or in all cases of doubt seek medical advice.
Notes to physician	: Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, that may be used in situations of emergency life support should be used with special caution.

SECTION 5. FIREFIGHTING MEASURES

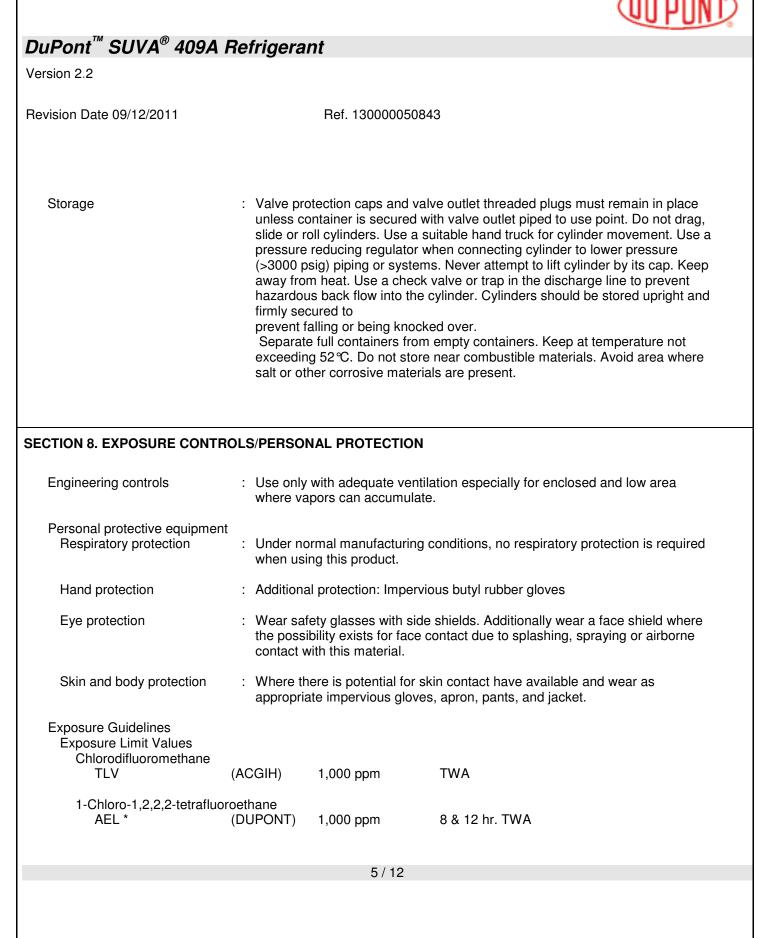

Flammable Properties Flash point	: does not flash
Lower explosion limit	: Method : None per ASTM E681
Upper explosion limit	: Method : None per ASTM E681
Fire and Explosion Hazard	: Cylinders are equipped with pressure and temperature relief devices, but may still rupture under fire conditions. Decomposition may occur. Contact of welding or soldering torch flame with high concentrations of refrigerant can result in visible changes in the size and colour of the torch flame. This flame effect will only occur in concentrations of product well above the recommended exposure limit. Therefore stop all work and ventilate to disperse refrigerant vapors from the work area before using any open flames.
	3 / 12

DuPont[™] SUVA[®] 409A Refrigerant Version 2.2 Revision Date 09/12/2011 Ref. 13000050843 This substance is not flammable in air at temperatures up to 100 deg. C (212 deg. F) at atmospheric pressure. However, mixtures of this substance with high concentrations of air at elevated pressure and/or temperature can become combustible in the presence of an ignition source. This substance can also become combustible in an oxygen enriched environment (oxygen concentrations greater than that in air). Whether a mixture containing this substance and air, or this substance in an oxygen enriched atmosphere become combustible depends on the inter-relationship of 1) the temperature 2) the pressure, and 3) the proportion of oxygen in the mixture. In general, this substance should not be allowed to exist with air above atmospheric pressure or at high temperatures; or in an oxygen enriched environment. For example this substance should NOT be mixed with air under pressure for leak testing or other purposes. Experimental data have also been reported which indicate combustibility of this substance in the presence of certain concentrations of chlorine. Suitable extinguishing media : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. **Firefighting Instructions** : Cool containers / tanks with water spray. Self-contained breathing apparatus (SCBA) is required if containers rupture and contents are released under fire conditions. Water runoff should be contained and neutralized prior to release. SECTION 6. ACCIDENTAL RELEASE MEASURES NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with cleanup. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up. Accidental Release Measures : Ventilate area, especially low or enclosed places where heavy vapours might collect. Self-contained breathing apparatus (SCBA) is required if a large release occurs. Avoid open flames and high temperatures.

SECTION 7. HANDLING AND STORAGE

Handling (Personnel)

: Avoid breathing vapours or mist. Avoid contact with skin and eyes. Use sufficient ventilation to keep employee exposure below recommended limits.

ECTION 9. PHYSICAL AND CH	IEMICAL PROPERTIES
Form Color Odor Boiling point % Volatile Vapour Pressure Specific gravity Water solubility Vapour density	 Liquefied gas clear, colourless slight, ether-like -34.4 °C (-29.9 °F) 100 % 8,021.1 hPa at 25 °C (77 °F) 1.22 at 25 °C (77 °F) not determined 3.4 at 25 °C (77 °F) and 1013 hPa (Air=1.0)
ECTION 10. STABILITY AND R	EACTIVITY
Stability	: Stable at normal temperatures and storage conditions.
Conditions to avoid	: Avoid open flames and high temperatures.
Incompatibility	: Alkali metals Alkaline earth metals, Powdered metals, strong oxidizers
Hazardous decomposition products	: Decomposition products are hazardous., This material can be decomposed by high temperatures (open flames, glowing metal surfaces, etc.) forming hydrochloric and hydrofluoric acids, and possibly carbonyl halides., These materials are toxic and irritating., Avoid contact with decomposition products
Hazardous reactions	: Polymerization will not occur.

SECTION 11. TOXICOLOGICAL INFO	RMATION
Chlorodifluoromethane (HCFC-22) Dermal	: not applicable
Oral	: not applicable
Inhalation 4 h LC50	: 220000 ppm , rat
Inhalation	: dog Cardiac sensitization
Skin irritation	 No skin irritation, rabbit Not expected to cause skin irritation based on expert review of the properties of the substance.
Eye irritation	 No eye irritation, rabbit Not expected to cause eye irritation based on expert review of the properties of the substance.
Skin sensitization	: Did not cause sensitization on laboratory animals., guinea pig Not expected to cause sensitization based on expert review of the properties of the substance.
Repeated dose toxicity	: Inhalation mouse No toxicologically significant effects were found.
Carcinogenicity	 An increased incidence of tumours was observed in some laboratory animals but not in others. Overall weight of evidence indicates that the substance is not carcinogenic.
Mutagenicity	: Did not cause genetic damage in animals. Did not cause genetic damage in cultured mammalian cells. Experiments showed mutagenic effects in cultured bacterial cells.
Reproductive toxicity	: Evidence suggests the substance is not a reproductive toxin in animals.
Teratogenicity	: Animal testing showed effects on embryo-fetal development at levels equal to or above those causing maternal toxicity.

Further information	: Cardiac sensitisation threshold limit : 175000 mg/m3
1-Chloro-1,2,2,2-tetrafluoroethane (HCF Dermal	C-124) : not applicable
Oral	: not applicable
Inhalation 4 h LC50	: > 230000 ppm , rat Anaesthetic effects Central nervous system effects
Inhalation	: dog Cardiac sensitization
Skin irritation	: No skin irritation, Not tested on animals Not expected to cause skin irritation based on expert review of the properties of the substance.
Eye irritation	: No eye irritation, Not tested on animals Not expected to cause eye irritation based on expert review of the properties of the substance.
Skin sensitization	: Does not cause skin sensitization., Not tested on animals Not expected to cause sensitization based on expert review of the properties of the substance.
	There are no reports of human respiratory sensitization.
Repeated dose toxicity	: Inhalation multiple species No toxicologically significant effects were found.
Carcinogenicity	: Animal testing did not show any carcinogenic effects.
Mutagenicity	 Did not cause genetic damage in animals. Did not cause genetic damage in cultured mammalian cells. Did not cause genetic damage in cultured bacterial cells.
Teratogenicity	: Animal testing showed no developmental toxicity.
Further information	: Cardiac sensitisation threshold limit : 140000 mg/m3
