Introducing
**THE NEW STANDARD FOR SIMPLE
CONNECTIVITY**

Lyric™ T6 Pro Wi-Fi

Honeywell T Series

The Honeywell T Series is a portfolio of non-connected and Wi-Fi connected thermostats designed with contractors in mind. With simple functionality that's easy to use, and smart features that are easy to love, the new Lyric T6 Pro Wi-Fi enables you to deliver in-demand connectivity without the complexity.

Fall and Winter Parts Stocking Program October 1, 2016 - March 31, 2017

Dear Valued Customer,

Welcome to the Gemaire 2016-2017 Fall and Winter Parts Stocking Program. Enclosed is an exciting offering of popular brands and products, including heating season related items, as well as new products - all with special pricing.

This season there are three pricing levels, locking you into the respective pricing between your initial order date (October 1, 2016 and later) and program conclusion (March 31, 2017).

- Stocking order of \$500 earns you Level 1 pricing
- Stocking order of \$1,000 earns you Level 2 pricing
- Stocking order of \$1,500 earns you Level 2 pricing *plus* 90 day terms
(contingent on credit approval)

In addition to special pricing, you'll also **receive monthly promotions** exclusive to program participants, and **advance notice of new products** as they become available at special pricing.

To participate in our bi-annual program, please contact your Territory Manager, visit your local branch, or call Gemaire at 1-800-226-2665. You can also visit Gemaire.com for full program details that are outlined in this booklet.

We look forward to partnering with you as your local Parts and Supplies provider!

Price Levels are identified herein. Some items, particularly tools and instruments, only have one price level. Program dates are October 1, 2016 through March 31, 2017. Prices subject to change.

If you're not a Nest Pro, you should be!

And, it's easy to become one.

Register as a Nest Pro

If you are not a Nest Pro, visit pro.nest.com to get registered. The process is quick, and only Nest Pros can:

- Offer the 5-Year Extended Pro Warranty
- Get contact information displayed on the thermostat
- Purchase Personal Use Units, deeply discounted units of each product
- Get free customer leads through the Nest Pro Finder
- Access exclusive training resources and marketing tools
- Get dedicated 24/7 Technical Support 855-VIP-NEST

If you are a Nest Pro

You should know your Nest Pro ID, a 6 digit code unique to you. To find your Pro ID, log in to the Nest Pro Portal and it will be displayed in the rightmost corner of the screen. Pro ID is needed to:

- **Activate 5-Year Warranty:** Input your Pro ID into 3rd gen Learning Thermostats upon installation to activate a 5-Year Pro Warranty. That is a three year extension to the standard two-year warranty.
- **Display your contact information:** When you input your Pro ID upon thermostat installation, your organization's contact information will be displayed on the screen when servicing is needed. This ensures you are the pro they will call when they need help.

ICM Surge Protective Devices

Common causes of power surges:

- Lightning Storms
- Downed Power Lines
- Substandard / Incorrect Wiring
- Power Outages/System Recovery Grid Overload
- Large Appliances Turning On/Off
- Old Electrical Components
- Short Circuits
- Loose Wiring

Why do you need protection?

All homes are constantly under attack from power surges and spikes, even though they may not always be apparent. These energy irregularities can be caused from just about anything, including weather, poor wiring, old parts, not to mention an aging power grid that has difficulty handling today's energy demands. Over time, these repeated energy surges will wear down your equipment and reduce its life expectancy. It is common for homeowners to place surge protectors on their televisions, personal computers and appliances. However, people often forget about their HVAC system, which represents your home's most valuable electronic investment.

Why ICM Controls?

You can't see the harmful surges and transients in your power lines, but ICM's products can! For more than 30 years, ICM Controls has been a recognized leader for manufacturing controls that protect your valuable HVAC equipment against today's most common and severe power threats. From basic surge protective devices to line voltage monitors to combination devices, ICM Controls has you covered. Consult your local HVAC contractor to determine which control is right for your application. Located in North Syracuse, NY, ICM's quality products are proudly manufactured in the USA.

Glossary of Terms:

- **Spike:** Fast, temporary voltage increases lasting a short duration.
- **Surge:** Fast, temporary, yet uninterrupted voltage increase lasting a few microseconds in duration.
- **Overvoltage:** When the applied voltage exceeds the rated voltage's upper design limit in a circuit.
- **Undervoltage:** When the applied voltage falls below 90% of the rated voltage in a circuit for a duration of one minute or longer. This condition commonly leads to brownouts.
- **Short Cycle:** When the system turns on and off again quickly.

LINEBACKER SURGE PROTECTION- SIMPLY THE BEST

When a surge protector is sold the homeowner believes they have surge protection, but that's not really the case.

In most cases, if the surge protector sacrifices itself, the green light goes out, but the unit keeps running with NO PROTECTION.. WHO'S WATCHING THE LIGHT?

No worries with the LBK10, the green light goes out and the LBK10 shuts down power to the equipment. Never leaving your equipment unprotected!

What happens when other surge protectors lose ground or neutral connection? NOTHING- again the unit runs with NO protection.

No worries with the LBK10, it shuts down power to the equipment and the green LED will indicate the loss of neutral or ground.

Does a standard surge protector protect equipment when there is low voltage or a brownout? NO!

No worries, the LBK10 senses low voltage and will shut power to the equipment, and the green LED will signal low voltage. By the way.. if the voltage corrects itself the unit will reset.

Other surge protectors do not protect equipment from overvoltage, but the LBK10 will shut power to the equipment when it detects an overvoltage condition, also indicating the overvoltage through its green LED. Again, if voltage corrects itself the unit will reset.

ULTIMATE SURGE PROTECTION

- ☑ Protect equipment from damaging surges
- ☑ Protect equipment when surge protector sacrifices
- ☑ Protect equipment with loss of neutral or ground
- ☑ Protect equipment from brownouts
- ☑ Protect equipment from overvoltage

TOOLS OF THE TRADE

FVCT4

Flexible Valve Core Tool

- 4.5 inches in length
- Flexible to over 120° angle
- CNC finished

HYB1YL

Hybrid Jumper

- 20" lead
- Used for low voltage troubleshooting
- For use up to 30 volts/ 5 amps
- Magnetic tips & Alligator clips

WS100

WiScope Wi-Fi Inspection Camera

- High speed Wi-Fi network
- High definition camera (720p)
- 8.5 mm diameter scope probe
- Waterproof camera and probe
- Integrated phone holder
- Android and iPhone apps easily downloaded
- 3 ft. camera probe included (p/n WSC3)

FOR INDUSTRY PROFESSIONALS

TradePro is proud to offer Hartland Controls, featuring the best in contactors, relays, motor run capacitors and transformers. Built on the foundation of superior quality, Hartland has the ability to service all companies local or international, large or small. Hartland Controls is also the preferred supplier of many large HVAC OEMs.

The company headquarters and distribution warehouse are located in the Midwest – which means east or west coast, you get your products quickly.

CONTACTORS

UL 508/Semco/CE, CSA

RELAYS

UL 508/Class B Insulation

MOTOR RUN CAPACITORS

UL 810/EIA-456-A Standards/
Operating life – 60,000 hours/
Multi-purpose 370 or 440vac

TRANSFORMERS

UL/CUL recognized/
No secondary fusing required
