

ALLIEDTM

Air Conditioners

2025 Compliant Refrigerant
Single-Stage and Variable-Speed
13.4 SEER2 to 17.1 SEER2

CHOOSE RELIABILITY AND
EFFICIENCY. RIGHT NOW.

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider a Allied™ system, quality and value are a given. You're getting peace of mind with great features and a smart design—and best of all, you get it right now.

For a cleaner tomorrow

We believe building for tomorrow is as important as building for today. The transition to low Global Warming Potential (GWP) refrigerants represents a positive step for the environment, as it significantly reduces the impact of harmful greenhouse gases.

The new refrigerant used in our products reduces global warming potential by 78%*. That helps all of us reduce our environmental impact and build toward a cleaner future for everyone.

Efficiency ratings

Consider the SEER and HSPF ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you. SEER2 and HSPF2 are new ratings that reflect changes to national testing standards. Think of it like highway vs. city gas mileage. SEER2 and HSPF2 more closely reflect energy efficiency in real life applications, which is why the rating is slightly lower.

Superior coil protection

For durability in harsh environments, Omniguard® Total Corrosion Protection Technology is featured on all Allied heat pumps, helping to protect against corrosive elements and extend the life of your heat pump for years to come.

Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates†. Your Allied professional can provide you with the latest information to help you take full advantage of available money-saving opportunities.

Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – Consider a new unit if your heat pump is 10-12 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use R-22 refrigerant that's scarce, expensive to recharge and harmful to the environment.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase might be in order.

*Global, national, state, and local GWP requirements may change at any time without notice.

WHATEVER YOUR NEEDS, AN ALLIED™ AIR CONDITIONER IS THE RIGHT CHOICE, RIGHT NOW.

LYNX® 7HP19V

Immediate relief with enhanced performance.

The LYNX® inverter heat pump is the perfect replacement upgrade for your HVAC system. With ratings of up to 17.1 SEER2 and 8.5 HSPF2 and matches that go beyond, this variable speed heat pump offers incredibly quiet performance—less than half the sound you typically hear from a single-stage air conditioner—and delivers higher-efficiency cooling and heating all at an accessible price. Its five operating modes allow you to set your preferred balance of comfort and efficiency. Plus, when paired with your furnace as a dual-fuel system, you'll enjoy immediate relief, greater energy savings and enhanced performance in any season.

QuickLink™ Inverter Technology uses intelligent algorithms to deliver a performance fit and fine-tuned temperature control with a wide range of existing indoor equipment.

7AC14F

Saving you more, month after month.

The 7AC14F delivers increased energy savings with efficiencies of up to 16.2 SEER2 when paired with a matched furnace or air handler. To help you get the most out of your HVAC system, your local dealer can recommend the right pairing for your home.

7AC13F

Worry-free and energy-efficient performance.

Enjoy season after season of worry-free operation with the 7AC13F with efficiencies ranging from 13.4 to 15.2 SEER2. Choose the highest level of reliability and dependable performance to ensure you'll be greeted by comfortable temperatures every time you come home.**

* Minimum levels of only 61 dBA, tested and rated in accordance with AHRI Standard 270

** Allied 13.4 SEER2 units are only available in the Northern U.S. and Canada per government regulations.

ALLIED: THE EASY DECISION

When you think about everything Allied delivers, your decision is easy. With Allied, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

Allied. The right choice. Right now.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.
