

# ALLIED®

# AIR CONDITIONER

Allied® air conditioners deliver reliable cooling performance designed for lasting comfort and dependable system operation. Engineered to integrate seamlessly with matched heating and indoor equipment, they support a wide range of residential and multifamily installations. With a focus on installation flexibility, serviceability, and long-term reliability, these systems provide a dependable solution for replacement projects and common residential applications. **The Right Choice. Right Now.**

## Energy Efficient

Designed to meet current regional efficiency standards, Allied air conditioners deliver dependable cooling performance and reliable system operation.

## Quiet Operation

Engineered fan design and sound-reducing features help minimize operating noise, supporting a more comfortable outdoor environment during cooling.

## Built To Last

Constructed with durable materials and Omniguard® Total Corrosion Protection Technology, Allied air conditioners are built to withstand everyday use and help protect critical components from common environmental exposure, supporting reliable performance over time.
