

Comfort Sync® A3
Ultra-Smart Thermostat

Precise Comfort Control

Perfectly controlled temperatures
throughout your home.

The Professional's Choice

The Comfort Sync® A3 Ultra-Smart Thermostat takes personalized comfort to the next level.

Pairing the Comfort Sync® A3 Ultra-Smart Thermostat with Pro Series™ equipment gives you exceptional energy efficiency and maximum control over your home's indoor environment.

App Controlled

Enables you to monitor and control temperatures and settings from anywhere in the world using an innovative app and your compatible smart device.**

Voice Activated

Compatible with Amazon Alexa® and Google Assistant†, the thermostat enables you to fine-tune your comfort with a simple voice command.

Allergy Sync™

Monitors the air quality and pollen levels in your local ZIP/postal code and automatically turns the fan on to help clean your home's air when outdoor levels are high.

Away Sync™

Uses the GPS in your smartphone to detect when you're leaving and automatically changes the temperature to a more energy-efficient setting. It also detects when you're coming back home, returning the temperature to its normal set point.

Schedule Sync™

Means you only need to program your thermostat once. Whenever there's a change in your routine, the thermostat adapts heating and cooling to match.

Climate Sync™

Monitors humidity levels, and removes excess moisture for cleaner, more comfortable air.

*Comfort Sync® A3 is compatible with Armstrong Air HVAC products and requires separate purchase of Amazon Echo or Echo Dot. As of the date of this publication, Amazon Echo devices are not available for purchase in all countries. This reference is intended for use with US-based thermostats only. Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates.

**Remote capability requires Wi-Fi or cellular data service.

Individual zones deliver personalized control from room to room.

When you add Comfort Sync zoning to a Pro Series system, you gain the ability to customize temperatures from room to room. Comfort Sync Zone Sensors divide your home into up to four areas, or zones, each with its own temperature control. The Comfort Sync A3 Ultra-Smart Thermostat acts as the master control for each program, with small in-zone sensors allowing for convenient temperature adjustments in the individual areas.

Temperature control that's perfectly in sync with your family.

Comfort Sync zoning helps keep every area of your home comfortable and energy efficient. So, the kids' upstairs bedrooms are just the way they want them, the downstairs keeps the entire family happy, and the guest room won't waste energy when it's empty.

Temperature Control

Each zone is under the control of its own individual thermostat, which uses a built-in digital sensor to report temperature changes to the Comfort Sync A3 Ultra-Smart Thermostat. The Comfort Sync thermostat then readjusts airflow to maintain the set temperature in each zone.

Precision Airflow

The Comfort Sync A3 Ultra-Smart Thermostat adjusts the temperature of a particular zone by opening or closing the dampers in the ductwork and adjusting the blower speed. By doing this, the Comfort Sync Zoning system can redirect air to specific areas, while reducing airflow to others.

Smart Energy Use

Zoning allows you to match your heating and cooling needs with your lifestyle and may reduce energy wasted by heating and cooling unused areas of your home.

Zoning can mean energy savings of up to 35% when used with a programmable thermostat.
