

CONCORD[®]
The Right Choice. Right Now.

Heat Pumps

2025 Compliant Refrigerant
Single-Stage and Variable-Speed
14.3 to 19 SEER2
7.5 to 11.9 HSPF2

CHOOSE RELIABILITY AND
EFFICIENCY. RIGHT NOW.

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider a Concord® system, quality and value are a given. You're getting peace of mind with great features and a smart design—and best of all, you get it right now.

For a cleaner tomorrow

We believe building for tomorrow is as important as building for today. The transition to low Global Warming Potential (GWP) refrigerants represents a positive step for the environment, as it significantly reduces the impact of harmful greenhouse gases.

The new refrigerant used in our products reduces global warming potential by 78%*. That helps all of us reduce our environmental impact and build toward a cleaner future for everyone.

Efficiency ratings

Consider the SEER and HSPF ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you. SEER2 and HSPF2 are new ratings that reflect changes to national testing standards. Think of it like highway vs. city gas mileage. SEER2 and HSPF2 more closely reflect energy efficiency in real life applications, which is why the rating is slightly lower.

Superior coil protection

For durability in harsh environments, Omniguard® Total Corrosion Protection Technology is featured on all Concord heat pumps, helping to protect against corrosive elements and extend the life of your heat pump for years to come.

Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates.† Your Concord professional can provide you with the latest information to help you take full advantage of available money-saving opportunities.

Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – Consider a new unit if your heat pump is 10-12 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use R-22 refrigerant that's scarce, expensive to recharge and harmful to the environment.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase might be in order.

*Global, national, state, and local GWP requirements may change at any time without notice.

WHATEVER YOUR NEEDS, A CONCORD® HEAT PUMP IS THE RIGHT CHOICE, RIGHT NOW.

LYNX® 7HP19V

Instant fix and immediate relief.

The LYNX® inverter heat pump offers premium comfort at a price point designed to fit your budget. With ratings up to 19 SEER2 and 8.5 HSPF2 and matches that go beyond, it offers superior performance and incredibly quiet operation—less than half the sound you typically hear from a single-stage heat pump. Other benefits include enhanced dehumidification and five operating modes to set your preferred balance of comfort and energy efficiency. Broad compatibility and long-term reliability can even help you save on replacement costs.

QuickLink™ Inverter Technology uses intelligent algorithms to deliver a performance fit and fine-tuned temperature control with the widest range of indoor equipment in its class.

7HP14F

Reliable heating and cooling.

The 7HP14F delivers increased energy savings with efficiencies of up to 16.2 SEER2 and 7.5 HSPF2 when paired with a matched furnace or air handler. To help you get the most out of your HVAC system, your local dealer can recommend the right pairing for your home.

* Minimum levels of only 61dBA, tested and rated in accordance with AHRI Standard 270

† Check with your local utilities to confirm eligibility. Rebates and incentives for efficiency vary by locality and utility. Allied Air Enterprises does not make any representation, warranty, guarantee, or other assurance as to whether each model qualifies or is eligible for rebates in your local area.

CONCORD: THE EASY DECISION.

When you think about everything Concord® delivers, your decision is easy. With Concord, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

Concord. The right choice. Right now.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.
