

CONCORD®
The Right Choice. Right Now.

PACKAGED UNITS

14 SEER; Electric/Electric, Heat Pump
and Gas/Electric Packaged Units

MAKE THE EASY CHOICE FOR
YOUR FAMILY'S HOME COMFORT.

A SIMPLE CHOICE FOR TOTAL COMFORT.

When you consider a Concord® system, quality and value are a given. You're getting peace of mind with great features and a smart design—and, best of all, you get it right now.

Efficiency ratings

A high-efficiency system means lower energy bills for you. Efficiency is measured in a number of different ways:

- **Seasonal Energy Efficiency Ratio (SEER)** is a measurement of the efficiency of cooling products. The higher the SEER, the greater the efficiency.
- **Heating Seasonal Performance Factor (HSPF)** is a measurement of a heat pump's heating efficiency. The higher the HSPF, the more efficient the heat pump's performance.
- **Annual Fuel Utilization Efficiency (AFUE)** is shown as a percentage and relates to natural gas usage. An AFUE of 90% means that 90% of the fuel was turned into actual heat energy, while only 10% was lost.

Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates. Your Concord dealer can provide you with the latest information so you can take full advantage of available money-saving opportunities.

Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – Consider a new unit if your HVAC system is 10-12 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use R-22 refrigerant that's scarce and expensive to recharge.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase might be in order.

WHATEVER YOUR NEEDS, A FULL-FEATURED CONCORD® PACKAGED UNIT IS THE RIGHT CHOICE, RIGHT NOW.

- Heavy-duty compressor is built tough for years of reliable, trouble-free performance
- Constant Torque blower motor helps reduce utility bills and provide a steady flow of air
- Sound-insulating cabinet reduces operating noise, so your home environment stays quiet
- 10-year limited warranty on the compressor and other parts* means peace of mind
- Rugged steel cabinet with wire grille keeps internal components protected
- Available on PRPHP14 units, Quiet Shift™ technology reduces operating sounds when the unit goes into defrost mode, so you get better performance with minimal noise and less maintenance

PRPAC14 & PRPHP14

Keeping you comfortable every day of the year.

The PRPAC14 electric air conditioner is ideal if you have all-electric heating and cooling in your home. If you live in an area that experiences consistently mild temperatures, the PRPHP14 heat pump is a perfect solution for both heating and cooling. Both units are ruggedly designed and can withstand every kind of weather, providing dependable and efficient operation season after season.

PRPGE14

The perfect combination of value and efficiency.

If your home has a natural gas connection, the compact and durable PRPGE14 gas/electric packaged unit could be the right choice for you. Engineered with quality materials and built to last, the PRP14GE has an efficiency rating of 14 SEER, offering consistent energy-savings and reliable heating and cooling throughout the year.

**Applies to residential applications only. For terms, conditions and exclusions, see full warranty at alliedair.com.

MAKE THE CONCORD DECISION YOU WON'T REGRET.

When you think about everything Concord delivers, your decision is easy. With Concord, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

Concord. It's the right choice. Right now.
