*The Right Choice. Right Now.*

# PACKAGED UNITS

14 SEER (13.4 SEER2); Electric/Electric, Heat Pump  
and Gas/Electric Packaged Units

MAKE THE EASY CHOICE FOR  
YOUR FAMILY'S HOME COMFORT.

# A SIMPLE CHOICE FOR TOTAL COMFORT.

When you consider a Concord® system, quality and value are a given. You're getting peace of mind with great features and a smart design—and, best of all, you get it right now.

## Efficiency ratings

Consider the SEER, HSPF, and AFUE ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you. New for 2023: SEER2 and HSPF2 are new ratings that reflect changes to national testing standards. Think of it like highway vs. city gas mileage. SEER2 and HSPF2 more closely reflect energy efficiency in real life applications, which is why the rating is slightly lower.

## Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates. Your Concord dealer can provide you with the latest information so you can take full advantage of available money-saving opportunities.

## Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – Consider a new unit if your HVAC system is 10-12 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use R-22 refrigerant that's scarce and expensive to recharge.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase might be in order.

## WHATEVER YOUR NEEDS, A FULL-FEATURED CONCORD® PACKAGED UNIT IS THE RIGHT CHOICE, RIGHT NOW.

- Heavy-duty compressor is built tough for years of reliable, trouble-free performance
- Constant Torque blower motor helps reduce utility bills and provide a steady flow of air
- Sound-insulating cabinet reduces operating noise, so your home environment stays quiet
- 10-year limited warranty on the compressor and other parts\* means peace of mind
- Rugged steel cabinet with wire grille keeps internal components protected
- Available on PRPHP14 units, Quiet Shift™ technology reduces operating sounds when the unit goes into defrost mode, so you get better performance with minimal noise and less maintenance

### PRPAC14 & PRPHP14

#### **Keeping you comfortable every day of the year.**

The PRPAC14 electric air conditioner is ideal if you have all-electric heating and cooling in your home. If you live in an area that experiences consistently mild temperatures, the PRPHP14 heat pump is a perfect solution for both heating and cooling. Both units are ruggedly designed and can withstand every kind of weather, providing dependable and efficient operation season after season.

### PRPGE14\*\*\*

#### **The perfect combination of value and efficiency.**

If your home has a natural gas connection, the compact and durable PRPGE14 gas/electric packaged unit could be the right choice for you. Engineered with quality materials and built to last, the PRP14GE has an efficiency rating of 14 SEER (13.4 SEER2), offering consistent energy-savings and reliable heating and cooling throughout the year.

\*\*Applies to residential applications only. For terms, conditions and exclusions, see full warranty at [alliedair.com](http://alliedair.com).

\*\*\* Low NOx and ultra-low NOx (14 ng/J) compliant models available.

## MAKE THE CONCORD DECISION YOU WON'T REGRET.

When you think about everything Concord delivers, your decision is easy. With Concord, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

**Concord. It's the right choice. Right now.**
