

THERMOSTATS

Smarter Comfort Starts Here

MyHomeComfort™ thermostats help your system deliver more even comfort, better humidity control, and consistent performance throughout your home.

With app-based control for homeowners and built-in setup and diagnostics for dealers, your system is installed right, and supported long after installation.

Choose the Right Control for Your Home *Building Your Ideal Home Environments*

Every home and system is different. MyHomeComfort thermostats offer distinct levels of control designed to match your home schedule, the equipment installed, and the comfort experience you want.

From straightforward programming to advanced, communicating control, your dealer will help you choose the option that fits your needs today, without adding unnecessary complexity.

For systems designed to communicate and adapt in real time, advanced control helps unlock their full performance.

Comfort Sync® A3

Smart, Connected Comfort

Best for: Simple, set-and-go comfort

- Everyday zoning & humidity control
- Simple programmable schedules help maintain comfort and reduce energy use.
- Intuitive touchscreen design
- App and voice assistant compatibility

MyHomeComfort CA4

Communicating, Pro Series Advanced Control

Best for: Maximum precision and whole-home comfort

- Comprehensive sensing for more even temperatures and humidity control
- Matter® compliant, enabling seamless integration with Apple® Home, Google® Home, and Amazon® Alexa®
- Smart schedules adapt automatically to your routine for maximum comfort and energy savings
- Smart Room Sensor & Wireless Extender Compatibility
- Setup wizard makes customization easy and intuitive

Comfort – More even temperatures and balanced humidity

Convenience – Simple app-based control from anywhere

Confidence – Smart diagnostics and reliable, guided setup
