M325D MH/M325D LMH Material Handler

The M325D MH and M325D LMH incorporates many innovations for excellent performance and durability.

Cat® C7 Engine with ACERT™ Technology

- ✓ ACERT™ Technology works at the point of combustion to optimize engine performance and provide low exhaust emissions to meet U.S. EPA Tier 3 emission regulations, with exceptional performance capabilities, fuel efficiency and proven reliability. **pg. 4**

Operator Station

Designed for ease of operation, high visibility, and comfort, the operator station allows the operator to focus on production. With the material handling job in mind, this machine is equipped with a 2.6 m (8'6") hydraulic cab riser to maximize viewing to all sides of the machine. **pg. 5**

Structures

The structural components are the backbone of the machine's durability. Caterpillar® design and manufacturing techniques assure outstanding durability and service life. **pg. 6**

The M325D MH and M325D LMH use the most sophisticated manufacturing technology to ensure the highest level of manufacturing quality. Excellent control, impressive lift capacity, and more comfortable operator station increase your productivity and lower your operating costs.

Hydraulics

The hydraulics system is designed to provide efficient performance, reliability and outstanding controllability with increased lifting capacity. The Heavy Lift Mode maximizes lifting performance while maintaining excellent stability.

pg. 7

Work Tools – Attachments

Orange Peel Grapples and magnets are offered to maximize performance of the M325D MH and M325D LMH. **pg. 8**

Complete Customer Service

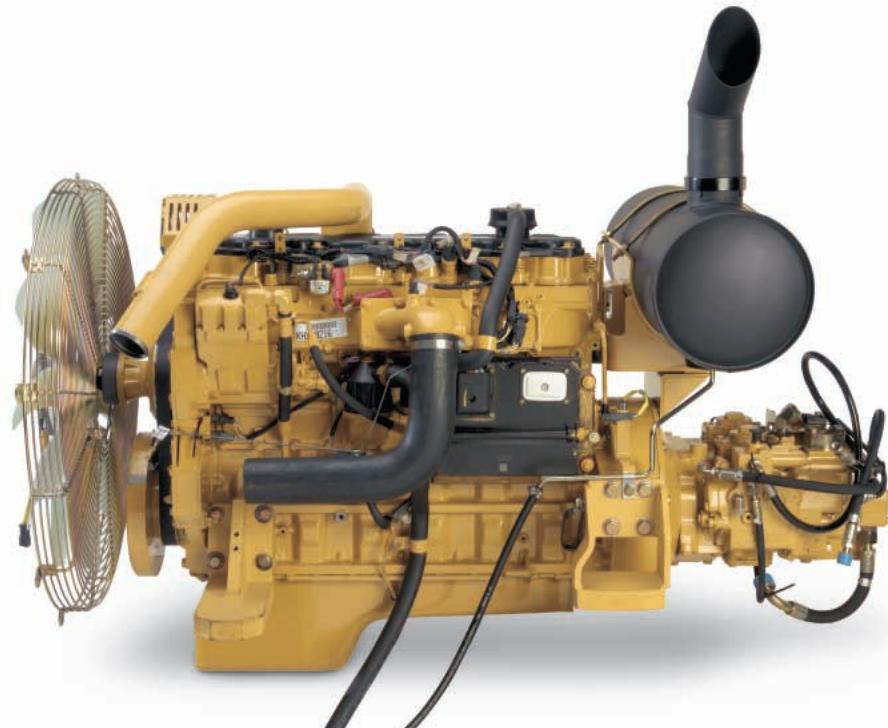

Your Cat® dealer offers a wide range of services that can be set up under a customer support agreement when you purchase your equipment. **pg. 9**

✓ *New Feature*

Cat® C7 Engine with ACERT™ Technology

ACERT™ Technology works at the point of combustion to optimize engine performance and provide low exhaust emissions to meet U.S. EPA Tier 3 emission regulations, with exceptional performance capabilities, fuel efficiency and proven reliability.

Performance. The Cat® C7 with ACERT™ Technology offers more engine power and runs at lower speeds for better fuel economy and reduced wear.

Automatic Engine Speed Control. The two-stage, one-touch control maximizes fuel efficiency and reduces sound levels.

Engine Controller. ADEM™ A4 (Advanced Diesel Engine Management) controller uses sensors throughout the engine to manage engine load and performance. The ADEM™ A4 controller is the muscle behind engine responsiveness, self-diagnostics, controlling emissions, and fuel economy.

Fuel System. The Cat® C7 ACERT™ engine features electronic controls that govern the mechanically actuated unit fuel injection (MEUI) system. Multiple injection fuel delivery involves a high degree of precision. Precisely shaping the combustion cycles lowers combustion chamber temperatures, generating fewer emissions and optimizing fuel combustion. This translates into more work output for your fuel cost.

Cooling System. To reduce fan noise, the cooling fan is driven from a viscous clutch that is electrically controlled by the machine ECM. It calculates optimum fan speed based on the target engine speed, coolant temperature, hydraulic oil temperature and actual fan speed. The Cat® C7 ACERT™ engine delivers a completely new layout that separates the cooling system from the engine compartment.

Air Cleaner. The radial seal air filter features a double-layered filter core for more efficient filtration and is located in a compartment behind the cab. A warning is displayed on the monitor when dust accumulates above a preset level.

Operator Station

The new cab, equipped with a 2.6 m (8'6") hydraulic cab riser provide improved visibility and comfort. The new monitor is a full-color graphical display with enhanced functionality to provide a simple, comprehensive machine interface.

Operator Station. To maximize visibility, all glass is affixed directly to the cab eliminating the use of window frames. 50/50 split front windshield allows both upper and lower portions to be stored in the overhead position with a one-touch action release system. Parallelogram wiper covers almost the complete front window without leaving unwiped areas in the immediate line of sight of the operator.

Parallelogram wiper covers almost the complete front window without leaving unwiped areas in the immediate line of sight of the operator.

The falling object guard on top and front of the cab is available as standard equipment. The front guard swings out for easier windshield cleaning.

The bottom position is ideal for shipping and travel.

The medium position places the cab forward by 500 mm (20") more than the bottom position for increased visibility.

The top position raises the cab by 2.6 m (8'6"). This provides optimum viewing to all sides.

2.6 m (8'6") Hydraulic Cab Riser (HCR). The M325D MH and M325DL MH are equipped with a new hydraulic cab riser, which offers increased visibility and comfort with additional cab height. Providing more flexibility, the HCR allows you to operate at any height between the lowest and highest positions.

Monitor. The compact, full-color, graphical display monitor displays machine, maintenance, diagnostic and prognostic information, in twenty different languages. Monitor angle can be adjusted to minimize sun glare.

Consoles. Redesigned consoles feature a simple, functional design to reduce operator fatigue, ease of switch operations and excellent visibility. Both consoles have attached armrests and allow the height of armrests to be adjusted.

Implement Controls. Easy to handle joysticks with integrated push buttons and sliding switches control all implement and swing functions. The sliding switches provide modulated control for grapple rotation and hydraulic cab riser activation. They are designed to increase operator comfort and reduce operator fatigue.

Hydraulic Actuation Control Lever. For added safety, this lever must be in the operate position to activate the machine controls functions.

The falling object guard on top and front of the cab is available as standard equipment. The front guard swings out for easier windshield cleaning.

Seat. The seat provides a variety of adjustments to suit operator's size and weight. Wide adjustable armrests and a retractable seat belt are also included. An air suspension seat with headrest is provided in the M325D MH and M325 D LMH.

Structures

Caterpillar's design and manufacturing techniques deliver outstanding durability and service life. Booms and sticks, made up of welded box-section structures, are fabricated with thicker plates to withstand high stresses.

Purpose Designed Upperframe and Counterweight.

The upperframe is specifically designed for the scrap and material handling markets. It is built of heavier strength material and thicker steel sections to handle the increased swing loads developed with the longer front parts, heavier counterweights, and cab risers used in material handling.

Strong and Stable Undercarriage.

The M325D MH and M325DL MH wheeled undercarriages provide maximum rigidity and long service life.

The hydraulic lines are routed through the frame, and the cylinders have heavy-duty guards to provide protection from damage. The front axles on M325D MH and the rear axles on M325D LMH offer great oscillating and steering angles. The transmission is mounted directly on the rear axle for protection and optimum ground clearance.

The M325D MH includes 4 dual 12.00-20 solid rubber tires, and the M325D LMH is equipped with 4 single 16.00-25 solid rubber tires. Optional pneumatic tires are also available.

A large toolbox is provided.

Material Handling Front. The two front options meet your material handling needs with excellent lift performance and working range whether operating in close or at full reach. Built for strong performance and long service life.

Efficient Design of Welded Box-Section Sections. The design with thick, multi-plate fabrications in high stress areas allows structures to flex, dissipating stresses, and maximizing strength.

Finite element analysis is used in the determination of structural stresses and enables optimization of durability and performance. Castings and forging are used in critical high-load areas such as the boom nose, boom foot, and boom cylinder connection.

Internal baffle plates provide additional strength and durability throughout the structure to withstand torsional loads.

Stress Relieving of Booms and Sticks. Maximizes strength and minimizes structure weight for greater durability.

Hydraulics

The hydraulics system provides efficient performance, unmatched in the industry, designed to provide reliability and outstanding controllability with increased lifting capacity. The Heavy Lift Mode maximizes lifting performance while maintaining excellent stability.

Hydraulics. The M325D MH and M325D LMH hydraulic system is designed to handle the specific requirements of the material handling industry.

Pilot System. The hydraulic pilot system controls the front linkage, swing, and travel operations.

Hydraulic Cross-Sensing System.

The two main hydraulic pumps use 100 percent of available horsepower resulting in faster implement speeds and increased productivity.

Boom and Stick Regeneration Circuit.

Saves energy during boom-down and stick-in operation, providing shorter cycle times and lower operating cost.

Boom and Swing Priority. The hydraulic system on the M325D MH and M325D LMH provides automatic priority function for boom-up and swing operations eliminating the need for work mode button. When the boom or swing is activated, the system automatically assigns priority based on operator demand.

Hydraulic Cylinders Snubbers.

The hydraulic cylinder snubbers at the rod end of boom cylinders and both ends of stick cylinder reduce sound and increase cylinder life to keep machines working longer.

Heavy Lift Feature. The operator can select the heavy lift mode at the push of a button to boost lifting capability and provide improved controllability of heavy loads.

Medium Pressure Circuit. The on/off grapple rotate function on the M325C MH and M325C LMH has been replaced by modulated rotate function on the M325D MH/LMH with a sliding switch on the left joystick. The operator is able to precisely position the worktool. The grapple open/close function is also modulated using a high pressure circuit controlled by the right joystick.

Work Tools – Attachments

Orange Peel Grapples and magnets are offered to maximize performance of the M325D MH and M325D LMH.

Walker Magnets. The Walker Liftmaster 1.22 m (48") Lift Master magnets can be used with the M325D MH or M325D LMH. The Walker Liftmaster 1.45 m (57") can be used with the M325D LMH with the 15.65 m (51'3") front or M325D MH with 14.3 m (47'0") front. The Walker Liftmaster Walker 1.68 m (66") is available for use with the M325D LMH with the 14.3 m (47'0") front.

These magnets have been designed and engineered for scrap processing applications. Ask your dealer salesperson for information on the Walker Magnet.

Work Tool Selection. When choosing a work tool, please consider the work tool application, the variation of the density of the material to be handled and productivity requirements. Check with your Cat® dealer for more details on specifications, sizes, and other work tool types.

Orange Peel Grapples. The 0.57 m³ (0.75 yd³), 0.76 m³ (1.00 yd³), and the 0.96 m³ (1.25 yd³) Orange Peel Grapples are available attachments.

Complete Customer Service

Your Cat® dealer offers a wide range of services that can be set up under a customer support agreement when you purchase your equipment.

Cat® Dealers. Your Cat® Dealer offers a wide range of services that can be set up under a customer support agreement when you purchase your equipment.

To help you get the best return on your investment, the dealer will help you choose a plan that can cover everything from machine and attachment selection to replacement.

Selection. Make detailed comparisons of the machines you are considering before you purchase. What are the job requirements? What production is needed? What is the cost of lost production? Your Cat® Dealer can help you find precise answers to these questions.

Purchase. Look past the initial purchase price of the machine. Consider the financing options available as well as day-to-day operating costs. This is also the time to look at dealer services that can be included in the cost of the machine to yield lower equipment owning and operating costs over the long run.

Maintenance. What is the cost of preventative maintenance? More and more equipment buyers are planning for effective maintenance before buying equipment. Choose from your dealer's wide range of maintenance services at the time you purchase your machine. Repair option programs guarantee the cost of repairs up front. Diagnostic programs such as S-O-SSM and Technical Analysis help you to avoid unscheduled repairs.

Replacement. Repair, rebuild, or replace? Your Cat Dealer can help you evaluate the costs involved so you can make the right choice.

Product Support. You will find nearly all parts at our dealer parts counter. Cat Dealers utilize a worldwide computer network to find in-stock parts to minimize machine downtime. You can also save money with remanufactured components.

Engine

Engine Model	Cat® C7 ACERT™	
Net Power – ISO 9249 – M325D MH	140 kW	190 hp
Net Power – ISO 9249 – M325D LMH	152 kW	204 hp
Displacement	7.2 L	439 in³
Net Power – EEC 80/1269 – M325D LMH	152 kW	204 hp
Net Power – EEC 80/1269 – M325D MH	140 kW	190 hp

- Meets EPA Tier 3 emissions requirements.
- Net power advertised is the power available at the flywheel when the engine is equipped with fan, air cleaner, muffler, and alternator.
- No engine derating is required below 3000 m (9,842.5 ft) altitude.

Operating Specifications

English Units/all weights are in lbs

* Rated by hydraulic capacity rather than stability capacity. Rated loads do not exceed 87% of hydraulic lifting capacity or 75% of tipping capacity.

All lifts with heavy lift on.

Always refer to the appropriate Operation and Maintenance Manual for specific product information.

Standard Equipment

Standard equipment may vary. Consult your Caterpillar dealer for details.

ELECTRICAL

- 65 Ampere alternator
- Light, genset box mounted
- Lights, cab mounted (one)
- Warning horn (front)
- Heavy Duty Batteries

OPERATOR ENVIRONMENT

- AM-FM Radio
- 12V-7A power supply for radio and multipurpose socket
- Ashtray with lighter
- Beverage Holder
- Interior Lighting
- Coat Hook
- Suspension seat with headrest
- Wiring provision for electrical seat heating
- Floor Mat
- Positive filtered ventilation (pressurized cab)
- Instrumental panel and gauges
- Parking Brake
- FOGS Guard
- Sliding door window
- Polycarbonate skylight
- Sun shade for skylight and front windshield
- Windshield wiper (parallel type) and washers
- Alternate exit: hammer to break rear window glass
- Automatic climate control with bi-level air conditioner, heater, and defroster
- Tilttable steering column
- Travel control pedals
- Tilttable steering column
- Storage compartment with cover suitable for lunch box
- Neutral lever lockout for all controls
- Adjustable pilot operated joystick type (wrist lever) controls each with 3 on/off buttons and 1 slider
- Monitor
 - Full graphic and color display with language capability
 - Warning information, filter and fluid change information
 - Working hour information
 - Machine condition, error code, and tool mode setting information
 - Start up level check for hydraulic oil, engine oil, and engine coolant
- Heavy lift mode selection

POWER TRAIN

- Cat C7 with ACERT™ Technology, 24-volt electric starting and air intake heater
- Tier 3 emissions package
- Radial seal air filters (330 mm/13") with double element, integrated cyclonic feature
- Caterpillar® extended life coolant
- Automatic engine speed control with push button return to idle
- Water separator in fuel line
- Muffler
- Fuel economy mode

UNDERCARRIAGE

- Creeper Speed
- Exclusive 3 position transmission braking control
- Four wheel hydrostatic drive with on-the-go shifting
- Four independent or simultaneously controlled hydraulic stabilizers with single axis float pad
- Fully hydraulic braking system
- Hydraulic maximum speed limiter
- Internal oil disk brakes
- Lockable oscillating axle
- Toolbox, left hand
- Two wheel steer
- Two Speed Hydrostatic Transmission
- Wide steps on both sides

HYDRAULIC SYSTEMS

- High pressure grapple open-close hydraulic circuit
- Hydraulic and electric circuits for:
 - Boom Lowering check valves
 - Stick lowering check valves
 - Medium pressure functions (for HCR and grapple rotate)

OTHER STANDARD EQUIPMENT

- Automatic swing parking brake
- Antifreeze
- Cold weather starting aids
- Cat 2.6 m (8'5") Hydraulically Adjustable Cab Riser
- Counterweight for material handling
- Heavy duty upper frame with bottom guards
- Travel Alarm
- Boom and stick regeneration circuit
- Separate hydraulic filter with re-useable metal tube for the filter element-no drop oil filter
- Automatic Swing Parking Brake
- Fine swing control
- Doors and cab lock with Caterpillar One Key Security System
- Fire wall between pump compartment and engine
- Overheat prevention system
- Mirrors (frame right, cab-left)

Optional Equipment

Optional equipment may vary. Consult your Caterpillar dealer for details.

STICKS – One of two stick options must be chosen

Stick, 6 m (19'7") Material Handling

for 14.3 m (47'0") front

Stick, 7.42 m (24'3") Material Handling

for 15.65 m (51'3") front

MAGNET, WALKER

1.22 m (48") Liftmaster Magnet for 15.65 m (51'3") front
on M325D MH or M325D LMH

1.45 m (57") Liftmaster Magnet for 15.65 m (51'3") front
on M325D LMH or 14.3 m (47'0") front on M325D MH

1.68 m (66") Liftmaster Magnet for 14.3 m (47'0") front
on M325D LMH only

GRAPPLES

0.57 m³ (0.75 yd³) for use with the 15.65 m (51'3") front
on M325D MH

0.76 m³ (1.00 yd³) for use with 15.65 m (51'3")
on M325D MH LMH

0.96 m³ (1.25 yd³) for use with the 14.3 m (47'0") front
on M325D LMH or M325D MH

Notes

M325D MH/M325D LMH Material Handler
