

330D L

Ultra-high Demolition

Cat® C9 Engine with ACERT™ Technology

Net Power (ISO 9249) at 1800 rpm 200 kW/270 hp

Operating Weight (UHD) 41 900 to 47 870 kg

Maximum Pin Height 21.3 m

330D L Ultra-high Demolition

Heavy-Duty and purpose built for your demolition job.

Upper Frame and Counterweight

The heavy-duty upper frame handles increased loads and movements. Additional counterweight provides maximum stability throughout the recommended working range.

Undercarriage

Different undercarriage options are available to match your performance and transportation needs.

Engine

The Cat® C9 engine with ACERT™ Technology offers better fuel efficiency and reduced wear. It works at the point of combustion to optimize engine performance and provide low exhaust emissions. By combining ACERT Technology with the new Economy Mode and Power Management, customers can balance the demands of performance and fuel economy to suit their requirements and application.

Serviceability

Longer service intervals and easier maintenance result in better machine availability and lower owning and operating costs.

Booms, Sticks and Work Tools

The 330D Ultra-high demolition is equipped with a reliable and safe boom hook system that significantly reduces the time needed to change the front parts, providing increased uptime, production and versatility. To further increase the machine's versatility, various front part options are available. Besides the Ultra-high demolition configuration, a short two position retrofit boom nose as well as a long reach excavation front are available. To complete the configuration, purposely designed Caterpillar work tools are available.

Operator Station

The safe, roomy, quiet, automatically climate controlled tiltable cab has excellent sightlines to the work tool to help keep operator fatigue low and production up throughout the entire shift.

Complete Customer Service

Your Cat dealer offers a wide range of services that can be set up under a customer support agreement when you purchase your equipment. The dealer will help you choose a plan that can cover everything from machine and attachment selection to replacement.

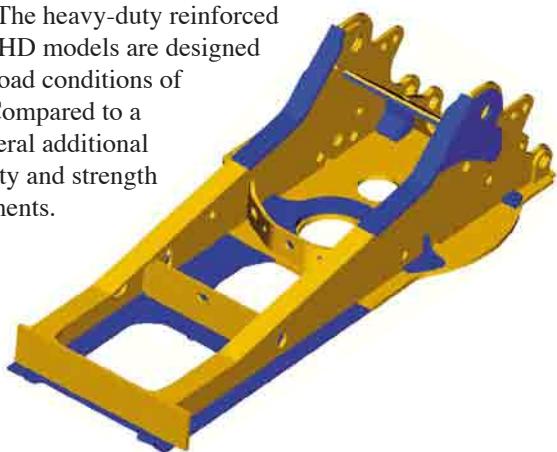

Upper Frame and Counterweight

Purposely designed and built for extreme conditions.

Reinforced Upper Frame. The heavy-duty reinforced upper frames of the Cat UHD models are designed to withstand the extreme load conditions of demolition applications. Compared to a standard upper frame, several additional plates provide the durability and strength required in these environments.

Counterweight.

A heavier counterweight balances the swing bearing and provides enhanced stability.

Standard

Heavy-duty

Swing Bearing to Upper Frame Bolts.

The swing bearing bolts are 20 mm longer on the back half of upper frame for increased joint retention. Bolt grade is increased from 10.9 to 11.9 for increased bolt torque of swing bearing to upper frame and carbody.

Undercarriage

Durable undercarriage absorbs stresses and provides excellent stability.

Undercarriage Options. Five undercarriage options are available to choose the best machine for the application and business needs. A variety of standard and heavy-duty track shoes are available for various underfoot conditions.

Long Undercarriage. The long undercarriage (L) maximizes stability and lift capacity. A long, wide and sturdy undercarriage offers a very stable work platform.

Long Narrow Undercarriage. The long and narrow undercarriage (LN) provides the best choice when ease of transport is important while maintaining excellent performance.

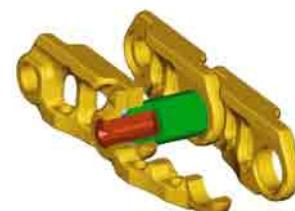

Hydraulic Variable Gauge

Undercarriage. The hydraulic variable gauge undercarriage (HVG) increases the stability through increased track gauge in working position as well as by lowering the center of gravity of the machine. The non-bolt joint allows a change from shipping to working width, or reverse, in less than a minute. The hydraulic variable gauge undercarriage provides a shipping width of 3000 mm and a working width of 3420 mm (with 600 mm shoes).

Heavy Duty High Wide Undercarriage.

The heavy-duty high wide undercarriage (HDHW) provides an increased over-the-side stability as well as increased ground clearance. Thicker carbody plates, plus larger box-section height team up to provide superior joint retention and durability in demolition applications.

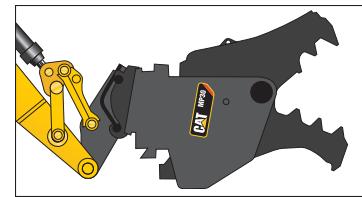

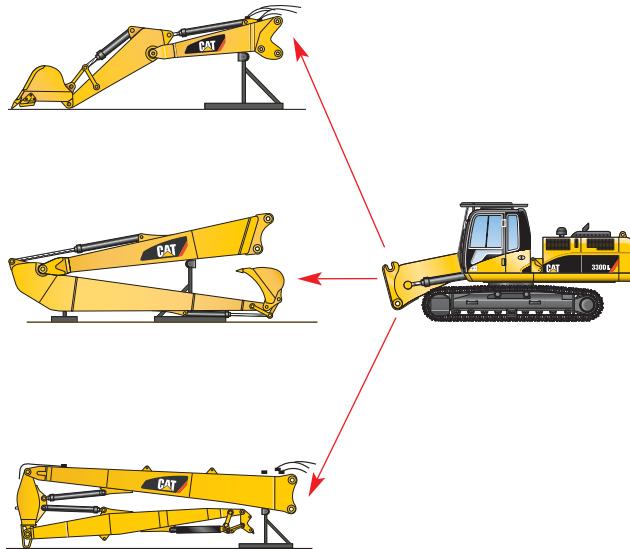

ES – Extreme Service Undercarriage (345C L). The 330D Ultra-high demolition can also be equipped with an upsized undercarriage. The 345C variable gauge heavy-duty, H-shaped long undercarriage provides ease of transport and a stable platform when working on a variety of sites. Another benefit of the 345C undercarriage is the increased ground clearance. With 600 mm track shoes, the track roller frames can be retracted to a transport width of less than three meters.

Tracks. The 330D comes standard with grease lubricated tracks. The track links are assembled and sealed with grease to decrease internal bushing wear, reduce travel noise and extend service life lowering operating costs.

Booms and Sticks and Work Tools

Maximum versatility gets the best out of your machine.

Boom Hook System. The front parts are equipped with a reliable and safe hook system between the boom foot and boom nose. Compared to the traditional pin-mounted joint, the hook system significantly reduces the time needed to change between the Ultra-high front parts and the short retrofit configuration, or the long-reach excavation configuration. In principle, the boom hook system consists of a hook system to pick up the front parts and a mechanical expander pin to secure these front parts onto the boom foot. The absence of any hydraulic parts, as well as a full length heavy duty one-piece securing pin, ensure a safe and reliable operation. The operator has an excellent view of the hook system from the cab to ease changing the front parts.

Retrofit Capability. A short boom nose can be hooked onto the boom foot. To maximize the machine's extreme versatility, this boom nose can be put in two positions. The straight position is ideal for working in above ground level applications, such as low level demolition or sorting, and the bent position can be used for applications such as digging or truck loading. For long-reach digging and extracting applications, a two-piece long reach excavation front is available. This long reach front is also equipped with the boom-hook system as well as the hydraulic quick disconnects, ensuring a fast change of front parts. Optional medium pressure lines enable the use of tilting buckets.

Hydraulic Quick Disconnects.

The hydraulic lines between boom foot and boom nose are fitted with hydraulic quick disconnects to even further reduce the time needed to change the front parts. Oil spillage and contamination is reduced through the quick disconnects flat-face design. New generation face-to-face ball valves are installed on auxiliary high pressure lines for an unmatched reliability.

Dedicated Ultra-High Demolition Linkage.

Because Ultra-high demolition applications require a different working envelop than standard applications, a purpose designed linkage is standard on the Ultra-high demolition front parts. Besides providing an optimized working envelop, this linkage also greatly improves controllability in nearly every position.

Tool Cylinder Protection. To prevent damage to the tool cylinder rod caused by falling concrete and debris, the tool cylinder is equipped with a heavy duty metal cover. Thanks to its unique construction, the cover protects the cylinder rod in every position.

Lowering Control Devices. For increased safety and controllability lowering control devices are installed on boom, stick and tool cylinders. SmartBoom is standard on the 330D L UHD.

Multi-Processors. The Caterpillar Multi-Processors can be equipped with different jaw types depending on your need.

- CC-jaws combi cutter.
- CR-jaws concrete crusher.
- PP-jaws primary pulveriser.
- PS-jaws secondary pulveriser.
- TS-jaws tank shear.
- S-jaws steel.

Demolition and Sorting Grapples.

The demolition and sorting grapple with unlimited left and right rotation is the ideal tool for stripping, sorting, handling and loading.

Demolition Shears. These shears can grab and pick material from a pile easily, without requiring movement of the base carrier. They are very efficient tools because of the high force to weight ratio. The blades are made of exceptionally long-wear alloy steel and have proven speed valves that improve cycle times.

Operator Station

Designed for comfort, safety and ease of operation.

Hydraulically Tilttable Cab.

The hydraulically tilttable cab tilts back from 0 to 30 degrees to further improve upward visibility and allows the operator to adopt a more comfortable body position.

The tilttable cab is integrated into the upper frame and therefore does not increase the machine's shipping height. Because of the integration into the upper frame, no tilt parts are exposed to the demolition environment. To reduce vibrations and sound the cab shell is attached to the frame with viscous mounts.

Climate Control. Positive filtered ventilation with a pressurized cab is standard. Fresh air or re-circulated air can be selected with a switch on the right console.

Controls. The 330D uses pilot operated control levers, positioned so the operator can operate with arms on the armrests. The vertical stroke is longer than the horizontal, reducing operator fatigue. The control lever grips are shaped to fit into the operator's hands. The horn switch and one-touch low idle switch are positioned on the left and right grip.

Implement Controls. Easy to handle joysticks with integrated push buttons and sliding switches control all implement and swing functions. The sliding switches provide modulated control for hydro-mechanical tools and are designed to increase operator comfort and reduce operator fatigue.

High Visibility Cab. The laminated safety glass front window is one-piece with a bottom mounted parallel wiper for excellent visibility. For enhanced upward visibility the increased impact resistant top window extends completely to the rear and has a wiper and washer. The upper left side door window can slide open. The lower window provides visibility to the tracks and to the ground next to the machine. The rear window offers a good view behind and to the left, aided by a lower hood profile.

Falling Object Guard. An ISO 10262 certified falling object guard on top and front of the cab is standard. The crossbars of the top guard are angled in line with the operator's sight for enhanced visibility of the work tool. The front guard swings out for easier windshield cleaning.

Engine

Cat C9 with ACERT Technology

Net Power at 1800 rpm

ISO 9249	200 kW/270 hp
80/1269/EEC	200 kW/270 hp

Bore	112 mm
------	--------

Stroke	149 mm
--------	--------

Displacement	8.8 liters
--------------	------------

- All engine horsepower (hp) are metric including front page.
- The C9 engine meets Stage IIIA emission requirements.
- Net power advertised is the power available at the flywheel when the engine is equipped with fan, air cleaner, muffler, and alternator.
- Full engine net power up to 2300 m altitude (engine derating required above 2300 m).

Cab/FOGS

Cab/FOGS meets ISO 10262.

Sound

Operator Sound

The operator sound level measured according to the procedures specified in ISO 6394:1998 is 78 dB(A), for cab offered by Caterpillar.

Exterior Sound

The labeled spectator sound power level measured according to the test procedures and conditions specified in 2005/88/EC is 105 dB(A).

Load Point Height

Load Radius Over Front

Load Radius Over Side

Load at Maximum Reach

* Limited by hydraulic rather than tipping load.

The above loads are in compliance with hydraulic excavator lift capacity ratings standard ISO 10567, they do not exceed 87% of hydraulic lifting capacity or 75% of tipping capacity. Weight of all lifting accessories must be deducted from the above lifting capacities.

* Limited by hydraulic rather than tipping load.

The above loads are in compliance with hydraulic excavator lift capacity ratings standard ISO 10567, they do not exceed 87% of hydraulic lifting capacity or 75% of tipping capacity. Weight of all lifting accessories must be deducted from the above lifting capacities.

Load Point Height

Load Radius Over Side

Load at Maximum Reach

Limited by hydraulic rather than tipping load. The above loads are in compliance with hydraulic excavator lift capacity ratings standard ISO 10567, they do not exceed 87% of hydraulic lifting capacity or 75% of tipping capacity. Weight of all lifting accessories must be deducted from the above lifting capacities.

Standard Equipment

Standard equipment may vary. Consult your Caterpillar dealer for specifics.

Electrical

Alternator, 80 A

Lights working

 Boom, both side

 Cab interior

 Cab mounted, two

 Frame mounted

Signal/warning horn

Engine/Power Train

Automatic engine speed control

Automatic swing parking brake

Automatic travel parking brakes

Caterpillar C9 with ACERT Technology

 Altitude capability to 2300 m
 without derating

Fine swing control

Fuel Filter

Secondary engine shut-off switch

Side-by-side cooling system with
 separately mounted AC condenser

Two speed travel

Water separator, with level indicator,
 for fuel line

Guards

Full length track guiding guards

Heavy duty bottom guards on upper
 frame

Heavy duty swivel guard on
 undercarriage

6 mm swivel guard on undercarriage

Front Linkage

Boom foot with hook system

Face-to-face ball valve system

Hydraulic quick disconnects

Operator Station

Adjustable armrest

Air conditioner, heater and defroster
 with automatic climate control

Ashtray and lighter, 24 V

Beverage/cup holder

Coat hook

Electrical provision for seat heater

EU sound criteria package

Floor mat, washable

FOGS

Instrument panel and gauges
 with full color graphical display,
 start-up level checks

High resistant front windshield

Large skylight with wiper and washer

Literature compartment

Mirrors – left and right

Neutral lever (lock out) for all controls
Positive filtered ventilation,

 pressurized cab

Rear window, emergency exit

Retractable seat belt 51 mm width

Sliding upper door window

Storage compartment suitable
 for a lunch box

Sunshade for windshield and skylight

Tilting device (cab)

Travel control pedals with removable
 hand levers

Warming device

Windshield wipers and washers
 (upper and lower)

Track

Grease lubricated track

Hydraulic track adjusters

Undercarriage

L – Long

LN – Long Narrow

HVG – Hydraulic Variable Gauge

HDHW – Heavy Duty High Wide

ES – 345C L undercarriage

Other Standard Equipment

Auxiliary hydraulic valve for hydro-
 mechanical tools

Boom lowering control device with
 SmartBoom

Cat batteries

Cat branded XT hoses and reusable
 couplings

Cat Datalink and capability to use ET

Caterpillar one key security system with
 locks for doors, cab and fuel cap

Combined control

Cross-roller type swing bearing

Counterweight 84500 kg with lifting
 hook

Drive for auxiliary pump

Heavy lift mode

Medium pressure control

Radio, 24V

Regeneration circuit for boom and stick

S•O•SSM quick sampling valves for
 engine oil and hydraulic oil

Steel firewall between engine and
 hydraulic pumps

Thumb wheel joysticks

Wiring provisions for Product Link

Optional Equipment

Optional equipment may vary. Consult your Caterpillar dealer for specifics.

Front Linkage

Bucket linkages

Sticks

Retrofit boom (short, LRE)

UHD front boom

Auxiliary Controls and Lines

Auxiliary stick lines

Miscellaneous Options

Bio hydraulic oil package

Converter, 7 amp-12V

Electric refueling pump with auto
 shut-off

Fine filtration filter

Jump start terminals

Starting aid for cold weather with ether

Travel alarm with cut off switch

Operator Compartment

Lunch box storage with lid

Machine security system with
 programmable keys

Seat

 Adjustable high-back seat with
 mechanical suspension

 Adjustable high-back seat with
 air suspension

 Adjustable high-back heated seat
 with air suspension

Straight travel pedal

330D L Ultra-high Demolition
