MACHINE SAFETY - THE SIX S's

✓ OVERVIEW:

As a machine operator, your goal in any emergency should be to complete these six S's:

- 1. Stop The Machine First, stop your machine as quickly and safely as possible
- 2. Shift To Neutral
- 3. Set The Parking Brake
- 4. Shut Down The Engine
- 5. Summon Help Call the service technician and describe the problem
- **6. Stay** In The Cab Usually you should stay in the cab until help arrives. This is especially true if there's a chance of a potential hazard around the truck that you can't see. However, if there's a threat to your safety in the cab, you should find the safest, fastest exit.
