 **Perkins**®

THE HEART OF EVERY GREAT MACHINE

# Never miss a beat

Perkins Aftermarket,  
engineered for life

 **Perkins**®

THE HEART OF EVERY GREAT MACHINE

## Let your engine **breathe**, Filter out the impurities

Filters are the first line of defence for an engine, so using genuine filters really does protect the engine.

Fuel and oil contamination can be disastrous for an engine. A fuel pump or a set of injectors can cost 100 times the price of a fuel filter, while an engine can cost 500 times as much as an oil filter. By choosing to fit genuine Perkins filters, you help prevent the risk of further costs like these.

Effective protection  
against contamination

## Delivering optimum power with **surgical precision**

Perkins turbochargers are engineered to precise specifications and fine tolerances to work in tune with your engine and ensure optimum power.

Economic buying options include remanufactured and 'new for old', both of which guarantee the same performance as new, and have the same 12 month warranty. All designed to fit your specific engine model by the same engineers who built your engine.

Complex parts,  
precisely engineered

## Extend machine life, **replace the engine**

Reduce downtime caused by in-field failure and achieve identical engine performance at a fraction of the cost of a new machine.

Get a greater return on your investment with a like-for-like replacement engine, enjoy fast service and availability, and gain peace of mind with Perkins® Platinum Protection.

Drive greater value  
from your machine

## The **vital** kit to extend engine life

These convenient kits are essential for any Perkins engine overhaul, containing precision matched parts specific to the engine's build, including pistons, rings, hardware, gaskets and seals.

Buying this kit of genuine parts offers significant cost savings over buying individual parts. Restore the engine's optimum performance with a single order for its long and healthy life.

Everything you need  
in a **single kit**
