330
HYDRAULIC EXCAVATOR

Engine Power
204 kW (273 hp)
Operating Weight
30 900 Kg (68,125 lb)

Cat® C7.1 engine meets U.S. EPA Tier 4 Final, EU Stage V, Japan 2014 (Tier 4 Final) and Korea Tier 4 Final emission standards with an aftertreatment system that requires no operator input or downtime.
NEXT GENERATION EXCAVATORS
Cat® Next Generation Excavators offer you more choices than ever for your business.
+ MORE MODEL OPTIONS
+ MORE STANDARD TECHNOLOGIES
+ MORE PRICE POINTS
Ready to help you make your business stronger, Cat Next Generation Excavators give you ways to get the most work done at the lowest cost – so you put more money in your pocket.

THE CAT 330 raises the bar for performance and fuel efficiency in this size class. With the industry’s highest level of standard factory technology, a cab focused on operator comfort, plus lower fuel and maintenance costs, the 330 will set the pace for productivity and profit in your operation.
INCREASE OPERATING EFFICIENCY UP TO 45%\(^1\)

The Cat 330 offers the industry’s highest level of standard factory-equipped technology, including Cat GRADE with 2D, GRADE with Assist, and PAYLOAD.

INCREASE FUEL EFFICIENCY UP TO 20%\(^2\)

With larger hydraulic pumps, an electro-hydraulic system, and increased bucket capacity, the Cat 330 delivers more work per unit of fuel.

LOWER MAINTENANCE COSTS UP TO 20%\(^3\)

Fewer maintenance items paired with extended and more synchronized maintenance intervals increases uptime and reduces costs.

\(^1\) Operator efficiency gains compared to traditional grading methods.
\(^2\) Compared to 330F.
\(^3\) Cost reduction based on 12,000 hours of operation.
STANDARD CAT TECHNOLOGY
GETS JOBS DONE FASTER WITH LESS REWORK

*Cat Technology* gives you the edge. Operators of all experience levels will dig, load, and grade with more confidence, speed, and accuracy. The result?

Better productivity and lower costs.

**WHAT WOULD YOU DO WITH 4.5 MORE WEEKS?**

45% GAIN WITH TECHNOLOGY
means same amount of work done faster

PREVIOUS YEAR:

- USING TRADITIONAL GRADING METHODS
  - 400 hours/year, grading with stakes and checkers

CURRENT YEAR:

- USING CAT 330 WITH CAT TECHNOLOGY
  - 220 hours/year, with standard Cat GRADE
INCREASE EFFICIENCY UP TO 45% 
WITH CAT TECHNOLOGY

STANDARD, SIMPLE-TO-USE TECHNOLOGIES INCLUDE:

STANDARD CAT GRADE WITH 2D

Cat GRADE with 2D helps operators reach grade faster. Operators cut and fill to exact specifications without overcutting. You can program up to four of your most commonly used target depth and slope offsets so you can get to grade with ease—a real time saver on the job site. Best of all, no grade checkers are needed so the work area is safer.

STANDARD CAT PAYLOAD

Cat PAYLOAD technology delivers precise load targets with on-the-go weighing, which helps prevent over/underloading and maximizes efficiency. Automated tracking helps manage production and lower cost. You can even take payload data with you. The monitor’s USP port lets you download your results from one shift all the way up to 30 days of work so you can manage your progress without needing an internet connection or VisionLink® subscription.

STANDARD CAT GRADE WITH ASSIST

Automated boom, stick, and bucket movements deliver more accurate cuts with less effort. The operator simply sets the depth and slope in the monitor and activates single-lever digging.

AVAILABLE OPTIONAL UPGRADES

Cat GRADE with Advanced 2D and Cat GRADE with 3D increase productivity and expand grading capabilities. GRADE with Advanced 2D adds in-field design capabilities through an additional 254 mm (10 inch) high-resolution touchscreen monitor. GRADE with 3D adds GPS and GLONASS positioning for pinpoint accuracy. Plus it’s easier than ever to connect to 3D services like Trimble Connected Community or Virtual Reference Station with the excavator’s built-in communication technology.
EXPAND YOUR JOBSITE CAPABILITIES WITH MORE LIFT AND MORE SWING TORQUE

The larger counterweight means you can increase your bucket size and lift up to nine percent more than the 330F.

With more swing pressure, a larger swing drive, and a larger swing bearing, the 330 delivers five percent more swing torque over the 330F, making backfilling and working on slopes easier.

LIFT AS MUCH AS 1050 KG (2,315 LBS) MORE WITH THE NEXT GENERATION CAT 330 EXCAVATOR

LEAVE THE HEAVY LIFTING TO US.

SCENARIO:

Calculated at 4500 mm (14’9”) reach over the front, 4500 mm (14’9”) below ground level.
With synchronized and extended maintenance intervals, you get more done at a lower cost compared to the 330F. Consolidated filter locations make service faster. Hydraulic, air, and fuel tank filters have increased capacity and longer life. Access to the operation and maintenance manual is easy through the in-cab monitor.

**KEY MAINTENANCE COST REDUCTIONS INCLUDE:**

+ Consolidated filter locations to reduce service time.
+ Improved hydraulic filter with higher dirt holding capacity.
+ Oil and fuel filters with extended maintenance intervals.
+ Advanced Cat air filter with double the dust holding capacity of the previous filter.
+ High-efficiency electric cooling fans only run when needed and reverse to keep cores free from debris. Choose between manual and auto reverse fan settings.
Sites where excavators typically work are rugged and challenging. That’s why it’s important that the 330 cab protects the operator as much as possible from the fatigue, stresses, sounds, and temperatures of the job.

**CAB TAKES THE HARD OUT OF WORK**

**SEAT AND CONSOLE REDUCE FATIGUE**

Comfort and efficiency of movement keep operators productive and alert all shift long. The standard seat is wide and adjustable for operators of virtually any size. The Deluxe cab package includes a heated air suspension seat; the Premium seat is both heated and cooled. The tip-up left console makes egress and ingress easy.

**ISO-CERTIFIED ROPS CAB WITH ALL-AROUND VISIBILITY**

The ISO-certified ROPS cab is sound suppressed and sealed. The large windows and lower front, right, and rear profile of the machine give outstanding visibility to the work area without the strain of constantly leaning forward. Standard rearview and right-side-view cameras keep operators aware of their surroundings at all times. An optional 360° visibility feature is also available.

**EASY ACCESS, CONNECTIVITY, AND STORAGE**

Several built-in convenience features make work more comfortable for operators:

- Bluetooth® integrated radio
- USB ports for charging and phone connectivity
- 12V DC outlets and AUX port
- Storage in rear, overhead, and console compartments
- Cup and bottle holders
CUSTOMIZABLE JOYSTICKS
Joystick function can be customized through the monitor. Joystick pattern as well as response can be set to match operator preferences. All preferences are saved with the Operator ID and restored at login.

KEYLESS PUSH START
The 330 uses a keyless push-button engine start. This adds security for the machine by using Operator ID codes to limit and track machine access. Codes can be entered manually, via an optional Bluetooth key fob, or a smartphone app.

TOUCHSCREEN MONITOR
Most machine settings can be controlled through the high-resolution 254 mm/10-inch touchscreen monitor. It offers 42 languages and is easy to read from the seat – no twisting or turning. A second 254 mm/10-inch touchscreen monitor is available for the advanced grade control.

SMART MODE
The Smart Mode (one of three power mode settings) automatically adjusts engine and hydraulic power for the highest fuel efficiency – less power for tasks such as swinging and more power for digging. Operators can set and store their power mode preference using Operator ID. Owners can lock in the mode they want their operators to use to help manage fuel consumption.
SAFETY FEATURES
LOOK OUT FOR YOUR PEOPLE AND YOUR EQUIPMENT

Keep your people and your equipment safe with technology features, a ground-level engine oil dipstick, and upper platform access on the Cat 330 excavator.

LIFT ASSIST
Lift Assist helps you avoid tipping. With visual and auditory alerts, you’ll know if your load is within the excavator’s safe working range limits.

SECURE START
Use your PIN code on the monitor, the optional Bluetooth key fob, or your smartphone to enable the push-button starting feature.

UPPER PLATFORM ACCESS
Right service platform design provides easy, safe, and quick access to upper service platform; the service platform steps use anti-skid punch plate to prevent slipping.

GROUND-LEVEL DAILY MAINTENANCE
All daily maintenance checks can be performed from ground level, making maintenance faster, easier, and safer. Checkpoints include the engine oil dipstick, fuel water separator, fuel tank water and sediment drains, and cooling system coolant level check.

STANDARD 2D E-FENCE TECHNOLOGY
Whether you are using a bucket or a hammer, the standard 2D E-fence feature automatically stops excavator motion using boundaries you set in the monitor for the entire working envelope – above, below, sides, and front. E-fence protects equipment from damage and reduces fines related to zoning or underground utility damage. Automatic boundaries even help prevent operator fatigue by reducing overswinging and digging.
The Cat 330 is a reliable, durable machine. It’s designed to take on the hard work you put in front of it every day.

**UNIQUE DESIGN FEATURES:**

+ Electro-hydraulic system requires less oil, less hoses, and less couplings for added reliability.
+ Larger swing drive and swing bearing support added swing torque for heavier work.
+ Reinforced front structure and base frame support more lift, more counterweight, and more torque.
+ Oval-shaped hydraulic tank increases stress resistance.
+ Technology components are integrated into the machine for added protection.
+ Grease lubricated tracks with a master pin to deliver double the retention force.

**LESS RISK. MORE REWARD.**

Reduced chance of leaks and damage with fewer connections and less hose.

The Next Generation Cat 330 Excavator has 48 M (158 ft) less hydraulic hose than the Cat 330F.

98 fewer hydraulic connections than the Cat 330F.
CAT LINK TECHNOLOGY
TAKES THE GUESSWORK OUT OF MANAGING YOUR EQUIPMENT

**CAT LINK** telematics technology helps take the complexity out of managing your jobsites – by gathering data generated by your equipment, materials, and people and serving it up to you in customizable formats.

**PRODUCT LINK™**
Product Link™ collects data automatically and accurately from your assets – any type and any brand. Information such as location, hours, fuel usage, productivity, idle time, maintenance alerts, diagnostic codes, and machine health can be viewed online through web and mobile applications.

**VISIONLINK®**
Access information anytime, anywhere with VisionLink® – and use it to make informed decisions that boost productivity, lower costs, simplify maintenance, and improve safety and security on your jobsite. With different subscription level options, your Cat dealer can help you configure exactly what you need to connect your fleet and manage your business without paying for extras you don’t want. Subscriptions are available with cellular or satellite reporting (or both).

*Caterpillar releases products, services, and technologies in each region at different time intervals. Please verify with your local Cat dealer for technology availability and specifications.*

Remote Services is a suite of technologies that improve your jobsite efficiency.

Remote Troubleshoot allows your Cat dealer to perform diagnostic testing on your connected machine remotely, pinpointing potential issues while the machine is in operation. Remote Troubleshoot ensures the technician arrives with the correct parts and tools the first time, eliminating additional trips to save you time and money.

Remote Flash updates on-board software without a technician being present, potentially reducing update time by as much as 50%. You can initiate the update when convenient, increasing your overall operating efficiency.

The **Cat App** helps you manage your assets – at any time – right from your smartphone. You can see your fleet location, hours, and other information you need to see. You will get critical alerts for required maintenance, and you can even request service from your local Cat dealer.
INCREASE YOUR PRODUCTIVITY AND PROFIT
WITH CAT ATTACHMENTS

You can easily expand the performance of your machine by utilizing any of the variety of Cat Attachments. Each Cat Attachment is designed to fit the weight and horsepower of Cat Excavators for improved performance, safety, and stability.

BUCKETS

HYDRAULIC HAMMERS

PREVENT HAMMER WEAR AND TEAR

Protect your hammer from overworking. Auto hammer stop warns you after 15 seconds of continuous firing and then automatically shuts it off after 30 seconds – all to prevent wear and tear on the attachment and excavator.

GRAPPLIES

MULTI-PROCESSORS

QUICK COUPLERS

RAKES

RIPTERS

SECONDARY PULVERIZERS

SHEARS

THUMBS

VIBRATORY PLATE COMPACTORS

FIND YOUR ATTACHMENTS FAST

The Cat PL161 Attachment Locator is a Bluetooth device that makes finding your attachments and other gear quick and easy. The excavator’s onboard Bluetooth reader or Cat App on your phone will locate the device automatically.

Save more time and energy with the available work tool recognition feature. A simple shake of the attached tool confirms its identity; it also ensures all the attachment settings are correct so you can get to work quickly and efficiently.
