**Cat® Engine Specifications**

3512E DGB, 4-Stroke-Cycle-Diesel

**Emissions**
- EPA Tier 4 Final

**Bore**
- 170 mm (6.7 in)

**Stroke**
- 215 mm (8.5 in)

**Displacement**
- 58.9 L (3596 in³)

**Aspiration**
- SCAC

**Governor**
- ADEM™ A5

---

FEATURES AND BENEFITS

**Engine Design**
- Proven reliability and durability
- Robust diesel strength design prolongs life and lowers owning and operating costs
- Broad operating speed range
- Air shutoff – integrated with engine controls
- EGR/Diesel Oxidation Catalyst (DOC)/common rail fuel system to meet Tier 4 Final/Stage IV emission standards
- DEF free solution – eliminates the storage, logistics, and issues involved with SCR/DEF design engines
- Individual cylinder based gas injection system.
- Engine mounted DGB controls.
- Engine mounted Gas filter, water coalescing type

**Attachments**
**Cooling System**
Separate Circuit Aftercooler (SCAC)

**Engine-Mounted Package**
Integrates with engine, aftertreatment, heavy-duty air cleaners, residential grade mufflers available in stainless or carbon steel

**Optional Attachments**
**Engine-Mounted Transmission Oil Cooler**
Integration with engine cooling system allows ease of installation and a tighter overall engine package

**Advanced Digital Engine Management**
ADEM A6 DGB based controls seamlessly integrated with A5 engine management system.

**Custom Packaging**
For any petroleum application, trust Caterpillar to meet your exact needs with a factory custom package. Cat engines, generators, enclosures, controls, transmissions — anything your project requires — can be custom designed and matched to create a one-of-a-kind solution. Custom packages are globally supported and are covered by a one-year warranty after startup.

**Full Range of Attachments**
Large variety of factory-installed engine attachments reduces packaging time

**Testing**
Every engine is full-load tested to ensure proper engine performance

**Product Support Offered Through Global Cat Dealer Network**
- More than 2,200 dealer outlets
- Cat factory-trained dealer technicians service every aspect of your petroleum engine
- Cat parts and labor warranty
- Preventive maintenance agreements available for repair-before-failure options

**S•O•S™ program matches your oil and coolant samples against Caterpillar set standards to determine:**
- Internal engine component condition
- Presence of unwanted fluids
- Presence of combustion by-products
- Site-specific oil change interval

**Over 80 Years of Engine Manufacturing Experience**
Ownership of these manufacturing processes enables Caterpillar to produce high quality, dependable products.
- Cast engine blocks, heads, cylinder liners, front and flywheel housings
- Machine critical components
- Assemble complete engine

STANDARD EQUIPMENT

**Control System**
Cat ADEM A6 DGB controls

**Cooling System**
SCAC system
Thermostats and housing, jacket and separate circuit water pump, gear-driven centrifugal

**Aftertreatment Mounting**
CEM/muffler support package Heavy-duty air cleaners
(2 element with precleaners)

**Exhaust System**
Dual DOC
Exhaust manifold, dry, bellows connection
Four turbochargers with watercooled bearings
Exhaust outlet, dual 10-inch ANSI round flange as part of aftertreatment

**Flywheel and Flywheel Housings**
Flywheel, SAE No. 0, 151 teeth

**Fuel System**
Primary/secondary fuel filters
Fuel priming pump (electric)
Common rail fuel system
Fuel transfer pump
Clean fuel module boost pump
Engine mounted Gas filter, water coalescing type.

**Instrumentation**
Product Link™ engine monitoring

**Lube System**
Closed Crankcase ventilation – top mounted
Fumes disposal
Oil cooler
Oil filter and dipstick – LH
Oil pump
Oil filter – RH spin-on type
Oil pan drain valve – 1” NPT female connection
Oil scavenger pump

**Mounting System**
Trunion front support
Flywheel housing – two-sided failure options

**Protection System**
ADEM A5 ECU system to provide customer programmable engine deration strategies to protect against adverse operating conditions
Emergency stop logic inputs provided at 70-pin customer interface connection

**General**
Paint – Caterpillar yellow
Vibration damper and guard
Lifting eyes

OPTIONAL EQUIPMENT

**Charging System**
80, 95, or 150 amp charging alternator

**Control System**
Local speed throttle control
Throttle position sensors

**Cooling System**
Coolant conditioner
JW inlet and outlet hose barb connections
JW outlet coupling-style connections
JW inlet weld-flange connection
SCAC inlet and outlet coupling-style connections
SCAC inlet and outlet hose barb connections Water level switch gauge
JW Heater installation connections

**Exhaust System**
Flex pipe kit
Residential mufflers (painted steel and stainless steel) with outlet elbow and rain cap

**Flywheel and Flywheel Housings**
Allison and Twin Disc flywheel options

**Instrumentation**
Product Link harness extensions
LAN adapters

**Lube System**
Rear sump oil pan – 250-hour change interval
Front deep sump oil pan – 500-hour change interval

**Power Take-offs**
Front crankshaft stub shaft
Front crankshaft adapter
Accessory drive – upper RH

**Protection System**
Hydraulic actuated air shutoff

**Starting System**
Hydraulic starter – LH
Dual hydraulic starter – LH
Manual engine barring device

**Transmission Attachments**
Transmission oil cooler
Transmission oil cooler 2-1 connections
Torque converter connections

**General**
Additional paint selections
Air compressor

### Rating Definitions and Conditions

**Oil & Gas – E Rating**

For fire pump, offshore cranes, well fracturing, and cementing/kill pump – the power and speed capability of the engine which can be used to power high-pressure well service equipment. For C32 engines and smaller, the maximum average load factor is 35%. For well fracturing engines, the maximum average load factor is 50%, and the maximum time at rated load and speed is less than 2.5 hours per year. For cementing and kill pump engines, the maximum average load factor is 40%, and the maximum time at rated load and speed is less than 2 hours per year. When used as a fire pump and NFPA certification is required, size the pump power to 90% of the advertised rating.

Engine Performance is corrected to inlet air standard conditions of 99 kPa (29.31 in Hg) dry barometer and 25°C (77°F) temperature. These values correspond to the standard atmospheric pressure and temperature as shown in SAE J1995.

Performance measured using a standard fuel with fuel gravity of 35 degrees API having a lower heating value of 42 780 kJ/kg (18,390 BTU/lb) when used at 29°C (84.2°F) where the density is 838.9 g/L (7.001 lb/U.S. gal).

The corrected performance values shown for Cat engines will approximate the values obtained when the observed performance data is corrected to SAE J1995, ISO 3046-2, ISO 8665, ISO 2288, ISO 9249, ISO 1585, EEC 80/1269, and DIN 70020 standard reference conditions.
