

## Cat<sup>®</sup> Wet Disk Snubber FOR ELECTRIC ROPE SHOVELS

### **Two Years Maintenance and Adjustment Free**

What was once a regular maintenance event is no longer. The revolutionary wet disk snubber design is maintenance and adjustment free for two years.

Correlating with a dipper rebuild cycle at 12,000 hours, the new set-and-forget snubber design works and wears with the dipper creating a more reliable, robust system.

Better yet, the units can be rebuilt three times before they have to be replaced. Reduced maintenance costs along with increased service life leads to more productivity and lower total cost of ownership. That's Reliability at Work.

**No Maintenance  
No Adjustments  
No Worries**

**LET'S DO THE WORK.™**

# Cat® Electric Rope Shovel - Wet Disk Snubber

## Less Maintenance, More Dependable

Dry-type snubber designs work by compressing friction disks with washer stacks or rubber pucks and often require daily maintenance.

The wet disk snubber has friction disks housed in an oil-filled chamber which allows for better heat distribution.

## Rebuildable Design

Not only are the wet disk snubbers designed for a 12,000 hour service interval, they are also rebuildable three times before end-of-life. Even better, the rebuilds can be performed on site, in an enclosed area, and take a day or less to complete.

**6 year** component life &  
**3 days** of maintenance.

**How can this change your  
bottom line?**

## WET DISK SNUBBER

No Maintenance | More Productivity | Improved Component Life | Lower Total Cost of Ownership

## APPLICABLE MACHINES

Dipper Size	40 Series	50 Series	60 Series	70 Series	70H Series
	40-43 yd <sup>3</sup> (31-33 m <sup>3</sup> )	46-53 yd <sup>3</sup> (35-41 m <sup>3</sup> )	55-62 yd <sup>3</sup> (42-48 m <sup>3</sup> )	64-75 yd <sup>3</sup> (49-57 m <sup>3</sup> )	76-89 yd <sup>3</sup> (58-68 m <sup>3</sup> )
