PART NUMBER INDEX	51
--------------------------------	-----------

FEATURE UPGRADES »

Start with the best in efficiency, effectiveness and power – and then make it even better with upgrades that enhance our most popular features. From the latest generation of advanced control joysticks to satellite linked telematics, these feature upgrades make the connection between operator and equipment more intuitive, responsive and flexible than ever.

Advanced Control Joysticks

Meet the next generation of joysticks that enable operators to keep their hands on the controls at all points of operation. These joysticks add all-grade control functions and attachment controls to the existing joysticks and can be programmed to control any auxiliary attachments added to the machine.

Auto Shift

Automatically shifts the transmission at optimal shift points without operator input.

Cat Grade Solutions

Cat Grade systems are deeply integrated into each machine, so they are easy and intuitive to operate. These productive systems help bring inexperienced operators up to speed quickly, while enabling pro-level operators to perform better than ever.

- **Cat Grade Attachment Ready Option (ARO)**
Ensures the machine is ready for 2D and 3D systems with wiring, sensor mounts and blade/moldboard mast brackets.
- **Cat Grade Cross Slope**
Includes ARO and provides the sensors. The Cat Grade 2D control system brings the customer an increase in productivity by up to 40% while reducing their site costs dramatically. The revolutionary Caterpillar solution is factory integrated, sensor-independent and features a suite of products while includes cross slope, sonic, laser Global Positioning System (GPS), and Advanced Tracking Sensor (ATS) technology.
- **Cat Grade 3D**
Built on top of Cat Grade ARO & Cross Slope, the Cat Grade with 3D is an integrated grade control system that enables operators to improve grading efficiency, accuracy, and productivity in both rough grading and finish grading applications. The integrated design positions low profile antennas on the cab, roof and front frame eliminating conventional blade-mounted masts and related cables.

Auto Articulation

Auto articulation seamlessly adds articulation with steering input to simplify operation, improve maneuverability and reduce the turning radius of the machine.

Cold Weather Package

These kits improve cold weather operation by ensuring machines are able to idle in cold weather for an extended period of time without decreased machine performance.

E-Fence: Blade Avoidance

This is specific to motor graders and when it is activated, it prevents the moldboard from contacting the tires, step ladders, and the circle. This eliminates potential damage to the link bar. Great for new and experienced operators. E-Fence is available when the machine is equipped with the 3D Mastless System.

Powered Cab Air System

BENEFITS »

- Powered HVAC precleaner designed to increase fresh air filter life.
- Includes a precharge fan to improve cab fresh-air filter life.
- Increases the fresh-air flow into the cab, increasing cabin pressure

Cat Product Link™

These cellular and satellite-linked Cat telematic offerings enable accurate monitoring of machine location, fuel status, utilization data and product health information at your fingertips.

Cat Production Measurement System

Cat Production Measurement (CPM) is built on 2 applications: Efficiency Coach and Application Segmentation. Efficiency coach will save up to 15% fuel. Application segmentation tracks location machine and application of the machine (road, waiting, blading or ripping).

Digital Blade Slope Meter

The digital blade slope meter shows the blade slope angle on the main display. This feature allows the operator to quickly check across slope when the front and rear frame are aligned, and the moldboard is perpendicular to the machine.

Machine Security System

Machine Security System (MSS) provides a security solution for rental machines, remote worksites, multiple contractor worksites, high theft areas or any situation where limiting machine access is required.

Remote Services

This is a suite of capabilities at your fingertips. This includes remote flash for software updates, remote troubleshooting, and local service using cellular data.

Powered Arm Pods

Powered Arm Pods will provide motorized replacements for adjusting the pod height, allowing the operator to easily change in order to enhance comfort.

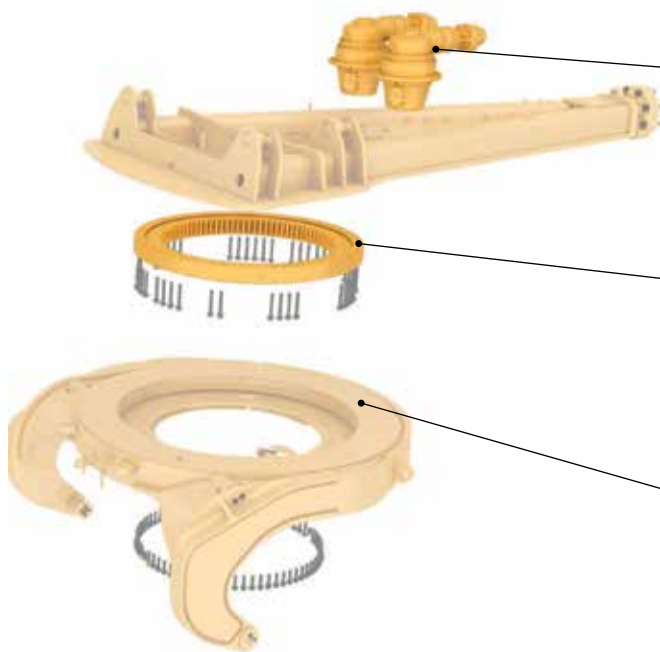

Fire Suppression Ready

Enhances machine safety by making it easier for the customer to install and use a fire suppression system. The fire suppression ready system has been developed following major fire suppression providers guidelines and will be able to accommodate most configurations of fire suppression systems recommended for this equipment.

High Performance Circle

Empower your 24 & 24M Motor Grader with the new High Performance Circle, designed to redefine efficiency and precision in grading. Our innovative solution significantly reduces maintenance demands by eliminating wear components, ensuring fewer maintenance touches and extending the life of your circle.

HEAVY DUTY CIRCLE DRIVES WITH SLIP CLUTCH AND BRAKE

- Planetary gear drive (no more brass worm gear)
- 2x life between rebuilds

MAINTENANCE-FREE SWING BEARING

- No adjustments needed and no shims
- Sealed and greased roller bearing
- No brass wear strips
- No more circle segment teeth

FULLY ENCLOSED PINION AND BEARING TEETH

- No debris & elements impacting components
- Greased pinion gear and bearing teeth
- Elimination of circle centering procedure and pinion gear adjustments

ACCESSORIES »

Little things can make a big difference. Sometimes a worn out circle pinion or an iced-over window is all that stands between you and getting a job done. These accessories can give you a little more room in the cab, a better view of what's behind you and the right replacement part at the right time. Best of all, they can give you peace of mind.

Rear Vision with Camera / Mirrors

Provides increased visibility surrounding the machine. Provides a rear vision camera and round convex mirrors that are mounted on outside mirror brackets. *Part of regional arrangement.

Mirror Extensions

Get the performance of our side mirrors with extensions for expanded visibility. This option is available for standard and heated mirrors.

Visibility Arrangement

Provides two front facing cameras located above the front axle and a cab monitor.

Rear View Camera

The camera is mounted to the rear of the hood and is connected to a dedicated color display mounted in the cab, which shows the view behind the machine. Some come with additional safety features that allow you to always have the display on, or a heated lens on the camera to prevent snow build-up.

Stroke Limiting Collar

The collar reduces the need to repair the frame and drawbar by welding or eventually replacing the drawbar/circle due to damage.

Sy-Klone™ Air Cleaner

You can extend your air filter's life by dramatically reducing the debris that gets through the air intake. That means improved performance and reduced maintenance in heavy snow applications and dusty environments.

Horn, Trumpet

An electronic trumpet horn that can be mounted to the front frame. The electronic trumpet horn has increased sound levels as compared to the standard horn.

Fast Fill Fuel

A fast fill fuel system allows speedy refueling of vehicles and increases operator safety. Fast fill systems in general allow for ground level refueling and automatic shut-off upon a full tank.

Service Access Platform

The left and right rear enclosure walkways provide access to the rear of the machine and improves visibility.

Platform Ladder

Provides window cleaning platform and two ladders. Ladders are on each side of the cab. Available for right hand side (RHS) and left hand side (LHS).

Basic Dual Access Platform

Provides cab access with LHS/RHS doors, around cab, LHS/RHS platforms and LHS/RHS rear step-up from tandem walkways. Includes emergency egress ladder on LHS platform, movable to RHS platform, as well as front cab window washer platform with bifold guardrail.

Enhanced Access Platform

This optional access platform provides ladder, walkways, handrails and access to the cab from both the left and right side of the machine. This provides a full second access path to the engine compartment and cab of the machine.

Auto Lube

The benefits of automated lubrication include less downtime due to bearing failure, reduced man-hours required for the lubrication task, and increased worker safety, as well as reduced lubricant and cleanup costs.

Object Detection

This is designed to increase safety and visibility during machine startup, initial movement and always in reverse. When radars are active, the system alarms only when the machine is in gear and in the direction of a detected object.

Moldboard Pivot Pin (Lubricated)

Moldboard pivot pin provides this redesign of the moldboard pivot pin. To improve life of our pivot pin and decrease downtime. This new design will keep tolerance tight and prevent premature wear.

Metallic Wear Strips

Drawbar circle moldboard (DCM) Provides metallic wear strips for the circle for severe applications. Includes shimable moldboard wear strip retention system. Recommended for mining application.

Tool Box

The toolbox enhances functionality, enabling operators to carry out a wider range of tasks seamlessly without the need for additional equipment or vehicles. This feature not only maximizes efficiency but also significantly reduces operational costs and downtime.

Seat Belt Indicator

The seat belt indicator ensures safety and compliance for the entire fleet. It uses both audible and visual warnings to remind the operator when the seat belt is not latched.

*Product link compatibility

Jump Start Cables

There are two cables that can be used to provide power to a stalled machine through power receptacles. Select from receptacle to receptacle (machine to machine) or from terminal to receptacle (power pack to machine).

Blade Extensions

Provide up to 20% more productivity with genuine Cat blade extensions.

Front Axle Steering Cylinder Guards

Provides additional protection to the front axle cylinders, lines, and fittings.

ATTACHMENTS »

Cat motor grader attachments are engineered and built for maximum performance. Whatever your business – construction, forestry, landscaping, waste and recycling – the right attachment can help provide a total system solution. From snow plows to blades, Cat attachments maximize the power and productivity of your motor grader.

Rear Ripper

This rear-frame mounted attachment is used for breaking up hard-packed ground or asphalt aggregates in preparation for grading. The ripper shanks are used for heavy ripping; the scarifier shanks are used for light work where maximum surface fracture is desired.

Push Block

The Cat pushblock is mounted to the motor grader nose plate. It acts as both a counterbalance for the rear ripper and as a push point in environments where the motor grader might be used as a push vehicle.

Transmission Guard

Provides a steel guard to protect the transmission from ground debris.

Rear Fenders

Fenders are used to help prevent mud, snow, and debris build up and to protect your equipment. Rear fenders are compatible with all motor grader tire sizes offered by the factory.

Rear Fender and Guardrails

Provides left and right hand tandem fenders with mounted guardrails.

14

MOTOR GRADER

ADDITIONAL UPGRADE OPTIONS

Stable Blade

Stable blade eliminates machine bounce by adjusting the throttle when bounce is detected. This prevents surface damage, improves operator comfort and increases productivity by reducing rework passes.

Heated Cab Glass

Optional heated cab glass makes operation during inclement weather safer and easier.

High Speed Oil Drain

High speed oil drain (HSO) requires pump at service location to be attached to coupling receiver for high speed flow. HSO drain can also manual/gravity drain.

Debris Guard

Provides a shield designed to minimize debris from entering the cooling package. Use in conditions where there would be debris that could enter the engine enclosure compartment and build-up on the cooling package.

16

MOTOR GRADER

ADDITIONAL UPGRADE OPTIONS

Steering Upgrade

Reliability and uptime are improved with these parts required to upgrade the steering group.

Compression Brake

Improves the life of 16 motor grader service brakes operating in extended downhill applications. It will enhance the braking capacity of the machine, reduce the overheating of brake pads, reduce owning and operating costs, and improve machine uptime.

Debris Guard

Provides a shield designed to minimize debris from entering the cooling package. Use in conditions where there would be debris that could enter the engine enclosure compartment and build-up on the cooling package.

Heated Cab Glass

Optional heated cab glass makes operation during inclement weather safer and easier.

16GC

MOTOR GRADER

ADDITIONAL UPGRADE OPTIONS

Auto Lube

The benefits of automated lubrication include less downtime due to bearing failure, reduced man-hours required for the lubrication task, and increased worker safety, as well as reduced lubricant and cleanup costs.

High Speed Oil Drain

High Speed Oil (HSO) Drain requires pump at service location to be attached to coupling receiver for highspeed flow. HSO drain can also manual/gravity drain.

Snow Cover

Recommended for machines operating in extreme Arctic and dry snow conditions. A cover group is provided to help with machines running extended idle times in sub-zero temperatures. An underhood air intake is provided to assist machines operating in heavy snow areas with large amounts of blowing snow.

18

MOTOR GRADER

ADDITIONAL UPGRADE OPTIONS

CPM Application Segmentation

Records on a map when the unit is Blading, Ripping, Roothing, and Waiting.

CPM Efficiency Coach

Displays an icon to the operator when to gear up to maximize fuel efficiency. Fuel savings up to 15% while maintaining load and machine productivity.

Advanced Control Joystick

Improves operational efficiency when utilizing ACCUGRADE or GRADE CONTROL X SLOPE.

Machine Security System (MSS)

Provides a programmable system to manage access to the machine using special MSS keys. Deters theft, vandalism, and unauthorized use.

24

MOTOR GRADER

ADDITIONAL UPGRADE OPTIONS

Transmission Upgrade

This upgrade provides quicker engine response at low idle when using multiple hydraulic functions. The upgrade also provides smoother and quicker shifting uphill and under load while maintaining the original travel speeds.

Steering Upgrade

This upgrade improves the reliability and uptime of the steering system by reducing nuisance faults with improved components.

Radiator Upgrade

This update provides the parts required to upgrade the radiator to Mesabi radiator. This upgrade will provide easier cleanout of the radiator as well as easier repair of the radiator.

Hydraulic Fluid Monitoring

This upgrade detects hydraulic leaks sooner reducing the likelihood of major hydraulic component.

Solar Glass

Cab solar glass will absorb the infrared rays and help in lowering the internal cab temperature, so improving the operator comfort.

Scarifier Bit- Board System

Mounts into the existing ripper shank pockets on all 24 motor graders. This expands machine versatility, without sacrificing the productivity and improves the conditions of your haul roads.

28 ft Moldboard

The new 24's increased power and more robust structures pair perfectly with a longer 28' moldboard. A longer moldboard is ideal for wide haul roads with long passes where machines are assigned for haul road maintenance. The circle drives are protected by the slip clutch independent of moldboard length.

Customer Value Agreements

Every piece of Cat equipment is designed and built to provide maximum productivity and operating economy throughout its working life. Your Cat dealer can help you maintain that built-in value through a Customer Value Agreement (CVA).

What is a Customer Value Agreement?

A CVA is any arrangement between you and your Cat dealer that helps you lower your cost per unit of production. Agreements are tailored to fit your business needs and can range from simple Preventive Maintenance Kits to sophisticated Total Cost Performance Guarantees. No matter which option you choose, you can be assured that your Cat dealer will provide you with careful planning and ongoing attention that will help you succeed.

When you have a CVA with your Cat dealer, you have more time to do what you do best – run your business. Trained dealer technicians assist you by maintaining your equipment and driving down operating costs. In the end, everyone's goal is the same: helping you get more work done at a lower cost.

Perhaps the Most Important Feature of Any CVA is Flexibility.

There are no pre-set requirements or specific products and services that you must agree to buy. In every case and with every piece of equipment, a CVA is an individualized plan. Depending on your needs, your costs can be a flat rate monthly fee or some other arrangement based on actual production hours. Your agreement may include as few or as many pieces of equipment as you wish. You can cover individual systems, single pieces of equipment or entire fleets. Your Cat dealer will work with you to determine the best strategies to maximize productivity and minimize costs for both your Cat equipment and competitive equipment.

Customer Value Agreements are not just for large pieces of equipment, and they are not just for new equipment, either. The need to get more work done at a lower cost is the same, regardless of age or application.

A Partnership That Gets More Done.

In the end, a CVA is a partnership between you and your Cat dealer that will help you succeed by leveraging the equipment management expertise of Caterpillar. When you and your Cat dealer team up with a CVA, you get more than just a piece of Cat iron, you get the company.

WEAR PARTS »

When machines work as hard as Cat motor graders do, there's going to be wear and tear. Replacing and maintaining certain smaller parts can protect and preserve more critical components. Spares for these parts are good to have around, because fixing little problems before they become big ones keeps costs down and productivity up.

LED LIGHTS »

Shutting down a machine to change a light bulb may not seem like a big deal, but unexpected downtime is never a good thing. Cat LED work lights don't have filaments that burn out or bulbs that need to be replaced. With more than 40,000 hours of expected life, you can count on them for bright light and increased productivity.

GRADERBIT2™ SYSTEM »

GraderBit2 System is ideal for finish grading, maintaining roadways or reconditioning haul roads. Tungsten carbide cutting bits deliver up to 20x wear life of through-hardened cutting edges. 7 different bit designs can form a continuous edge or 10 serration patterns that allow pass-through of 15 to 60mm aggregate.

Number of Angling Plates Needed			14	16	18
Number of Bits Needed			60	70	80

Bit boards that are built to perform in your application

Grooves cast into the boards accept weld overlay or material packing in order to extend board wear life, while installing and removing the boards is made easier through pre-drilled lifting eye holes. Adaptor boards feature an off-set design that ensures optimal bolted joint strength and consistent bit placement.

GRADERBIT2™ SYSTEM »

Bits are installed effortlessly with no tools thanks to pull-ring pin that inserts into the bit shaft and locks over the bit. Bit Life is optimized at any cast angle thanks to Angling plates that always keep the bits facing the direction of travel.

ANGLING PLATES			
PART #	DESCRIPTION	ANGLE	LENGTH
552-9410	Angling Plate	0°	1'
552-9411	Angling Plate	5°	1'
552-9412	Angling Plate	10°	1'
552-9413	Angling Plate	15°	1'
552-9414	Angling Plate	20°	1'
552-9415	Angling Plate	25°	1'
552-9416	Angling Plate	30°	1'

ANGLING PLATES	
PART #	DESCRIPTION
132-3812*	Pull Ring
562-9545	Bearing Sleeve

*For service replacement only. Pull rings are included with bits.

Retention that installs without tools and adjusts to your grading conditions

- Bushings reduce board damage during extreme operations and can be replaced to extend board life
- The bit shaft fits into the angling plate to prevent bits from rotating. 7 plate options allow for a 0 to 30 Blade cast angle in 5 increments.
- The pull-ring pin makes bit installation / removal easy without the need for tools.
- Angle plates keep the carbide facing direction of travel to reduce erosion of the bit body, which can reduce bit life.

7 different bit designs can form a continuous edge or 10 serration patterns that allow pass-through of 15 to 60mm aggregate. Serration patterns remove holes and ridges from compacted surfaces. Wide or SnowBit™ create a continuous edge the system can be used for finish grading.

WIDE

At 63mm wide this bit can be configured as a continuous edge or placed in every other hole for a 2.5" serration pattern.

WIDE MINING

63mm wide & 12mm taller. Imbedded carbide layer adds 72% more carbide to extends bit life.

STANDARD

30mm, this bit offers a serration pattern that will allow aggregate up to 30mm to pass through.

STANDARD MINING

30mm wide & 12mm taller. Imbedded carbide layer adds 72% more carbide to extends bit life.

SHARP

23mm wide, this bit will help break into hard ground while allowing aggregate size to 37mm to pass through.

SNOW BIT™

63mm wide bull nose carbide insert & steel face. This continuous edge system is impact resistant & designed for paved road snow removal.

PENETRATION

Specially design carbide shape that comes to point and a width of 15mm this bit will help break into any surface.

BORE SAVER™

Used to protect adapter board bore holes when not in use.

GRADERBIT2™ SYSTEM »

SERRATION PATTERNS		
AGGREGATE (MM) PASS-THROUGH	BIT CONFIGURATION	BIT WIDTH
0 in / 0 mm	Wide bits across the board	63 mm
0.6 in / 15 mm	Alternate Wide and Standard bits	63 / 30 mm
0.8 in / 20 mm	Alternate Wide and Sharp bits	63 / 23 mm
1 in / 25 mm	Alternate Wide and Penetration bits	63 / 15.5 mm
1.25 in / 32 mm	Standard bits across the board	30 mm
1.35 in / 34 mm	Alternated Standard and Sharp bit	63 / 23 mm
1.5 in / 38 mm	Sharp bits across the board	23 mm
1.5 in / 38 mm	Alternate Standard and Penetration	30 / 15.5 mm
1.65 in / 42 mm	Alternate Sharp and Penetration bits	23 / 15.5 mm
1.8 in / 46 mm	Penetration bits across the board	15.5 mm
1.2 in / 64 mm	Wide bit every other space	63 mm

WIDE - 64 mm SERRATION

SHARP - 38 mm SERRATION

WIDE/PENETRATION - 25 mm SERRATION

WIDE - CONTINUOUS EDGE

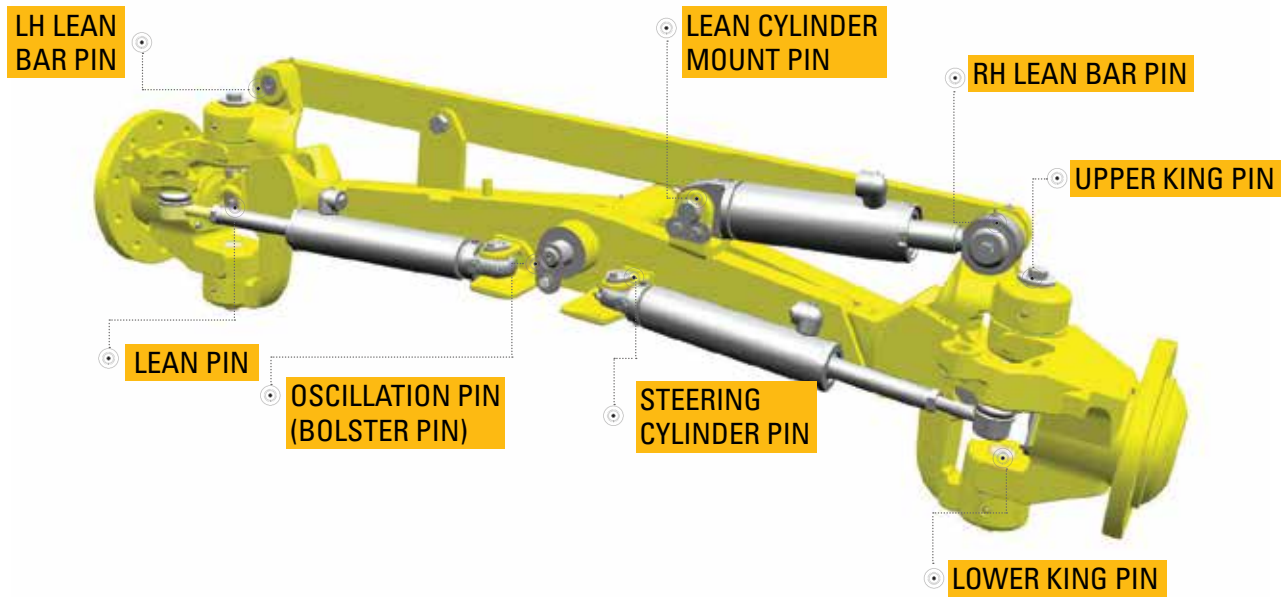

SNOWBIT - CONTINUOUS EDGE

LINKAGE PINS »

Motor graders clear the way for machines and vehicles in all kinds of conditions. From grading dirt and gravel to snow removal, components take on tough materials. That's why inspection and maintenance are so important. It's no secret that the longer parts last, the stronger your bottom line. That's why regular inspections, maintenance and proper replacement are critically important. You may not see it, but you could be ruining your pins. Poor maintenance can cost machine downtime for services that could have been avoided. Cat® linkage pins and bearings are designed to meet strict standards and are quality tested to ensure more time between replacements, which means less downtime and more savings in the long run.

NOTES

THANK YOU FOR CHOOSING A CAT[®] MOTOR GRADER.

Cat[®] Motor Graders offer world-class cab design, easy-to-use controls and advanced electronics and hydraulics to give you optimum productivity for any application. This guide will provide you with a quick reference for the available aftermarket components and the common maintenance parts you need to keep your Motor Grader working hard for you.

AFTERMARKET COMPONENTS

Customize your Cat Motor Grader to fit your needs with a variety of specialized products designed for your industry and application. These features, accessories and attachments help optimize and maintain your machine, so you can get the most out of every use.

COMMON MAINTENANCE PARTS

Preventive maintenance helps extend the life of your machine and protect your investment. Only Cat Parts are made to match your machine's specific filtration needs, lubrication requirements and exact maintenance cycles. That's why our parts kits make it easier to maintain your machine and keep it running at peak performance.
