VISIONLINK
RELEASE NOTES ARCHIVE

CAT® LINK

START TURNING YOUR DATA INTO DOLLARS.

By gathering data generated by your assets and serving it up to you in easy-to-digest bits, Cat® Link helps you take the complexity out of managing your jobsites. Use this archive to learn about the evolution of this resource!

CONTENTS:

NEW FEATURES

Includes all features which have not previously been available or included.

None at this time.

ENHANCEMENTS

Upgrade & improvements to existing product features.

May 2020:
- For Fluid Analysis notifications, VisionLink now checks fluid analysis sample results received in the last 21 days.
- Updating Hour Meter available only for eligible asset devices
    - In Asset Settings, the ability to update Hour Meter values is available only for assets whose device and on-board system are eligible for updates. If the device is ineligible, the Hour Meter field is grayed out with the warning message "Hour Meter updates are not available for this asset". The ability to remotely update the hour meter of an asset is determined by the type of device installed on that asset as well as the Sync Clock status of any ECM other than the Product Link (PL) device on that asset. The Sync Clock status is displayed in the Sync Clock column in the ECM Information table in the Unified Fleet Asset Details Dashboard. The device type is displayed in the Device Details widget in the Asset Details Dashboard.

If the device is...	and the following is true:	then the Hour Meter value...
Any PL device other than the PL161, PL420, or PL421 or Any other device supported by VisionLink	Sync Clock status is **Enabled** for at least one of the ECMs in the list other than the PL device	Cannot be updated
Any PL device other than the PL161, PL420, or PL421 or Any other device supported by VisionLink	Sync Clock status is **Disabled** for all other ECMs in the list	Can be updated
Any device	The **ECM Information** table is empty	Can be updated

    - Updating Odometer values is not restricted.

FIXES

Remedies applied to known to product issues or software bugs.

None at this time.

OTHER/OPERATIONS

Changes that impact availability, installation, or support for the product.
