

CAT INSPECT RELEASE NOTES ARCHIVE

CAT INSPECT

TAKE BACK UPTIME WITH THE CAT INSPECT APP FOR DAILY INSPECTIONS

The Cat Inspect app turns your mobile device into a smart machine inspection tool – meaning no more paper needed. Rate asset conditions, add comments, take photographs and share results.

Use this archive to learn about the evolution of this resource.

NEW FEATURES

Includes all features which have not previously been available or included.

August 2020:

- Implemented changes to searching for PM Checklist forms. A Serial Number Prefix is required now to find a PM Checklist, they are not part of the Family search results by default.
- To support faster searching, the serial number prefix is now a required field when creating new PM Checklist type forms.
- Changed the process to assign (search for) inspection forms on the website to match the Mobile App user experience.
- Added a new tab to the Perform Inspection page so Assignments are displayed separately from In Process inspections.
- Changed the data download reports to reference the Completed Date instead of the Assignment date.

ENHANCEMENTS

Upgrade & improvements to existing product features.

None at this time.

FIXES

Remedies applied to known to product issues or software bugs.

August 2020:

- Fixed an issue where the website was saving multiple copies of draft forms.
- Fixed an issue where the website would show the "loading.." icon if the help for a question only contained text.
- Fixed an issue where the website would fail to load the inspection details for editing if a video was attached to a question and wasn't the last attachment.

OTHER/OPERATIONS

Changes that impact availability, installation, or support for the product.

None at this time.
