

## CATERPILLAR HARD HEADS GAME

### INSTRUCTIONS

1. Shuffle and place all cards face down. Without looking at the card, each player chooses one card and holds it to their forehead with the image facing out so the other players can see it.
2. Starting with the youngest player and moving to the left, each player takes turns asking one question about the picture on their card to try and figure out what it is.
3. All questions are allowed as long as they can be answered with a "yes" or "no."
4. Once a player is able to guess the picture correctly, he or she chooses a new card and counts the guessed card as a point.
5. The game continues until one player has accumulated three cards/points from guessing their pictures correctly.
