

Engine Power Operating Weight

CAT)

313 kW (420 hp) 30 344 kg (66,877 lb)

980× CAT

Cat[®] engine meets U.S. EPA Tier 4 Final, EU Stage V, Korea Stage V, and Japan 2014 emission standards.

CAT 980 XE SUPERIOR EFFICIENCY.

The Cat [®] 980 XE Wheel Loader delivers excellent fuel efficiency, premium performance with simple-to-use standard technologies to boost operator efficiencies, and low maintenance costs. This machine is designed to meet emission standards without interrupting operation, delivering great performance, reliability, durability, and versatility, resulting in a machine that is built to meet your needs.

WHEEL LOADERS MADE FOR MORE

Cat wheel loaders were built with efficiency in mind, offering you the best in:

- + RELIABILITY + FUEL EFFICIENCY
 - DURABILITY + TECHNOLOGY
 - PRODUCTIVITY + VERSATILITY

Experience higher performance while reducing costs and fuel consumption with Cat wheel loaders.

SUPERIOR FUEL EFFICIENCY

ADVANCED SYSTEMS WITH INNOVATIVE INTEGRATION

The deep system integration of the engine and emissions system, powertrain, hydraulic system, and cooling system lower engine speeds and overall system heat loads, resulting in significantly increased performance and fuel efficiency.

ENGINE AND EMISSIONS

High power density and fuel efficiency set our engines apart. Certified to meet emission standards, our engines feature Cat electronics, fuel injection, and air-management systems.

SMART SPEED CONTROLS

Lowering the rated engine speed and eliminating the torque converter result in machine speed that can be controlled independently of the engine RPM. This also allows you to decelerate the machine using engine and hydraulic retarding, saving service brake wear.

EFFICIENT POWERTRAIN

Running the engine at lower RPM, optimizing the power flow through the transmission, combined with the dedicated hydraulic system significantly improves fuel efficiency with the highest performance capability.

PROVEN FUEL SYSTEM

Cat injection timing regulates the fuel injection process through a series of timed microbursts, providing more control of combustion for the cleanest, most efficient fuel burn.

AFTERTREATMENT TECHNOLOGIES

The Cat Clean Emissions Module delivers the performance and efficiency that customers demand, while meeting emission standards. It is completely automatic and does not interrupt the machine's work cycle.

EFFICIENT PRODUCTIVITY

The Cat Continuously Variable Transmission delivers advanced rimpull control and improved speed-range selection.* This machine brings lower fuel burn for increased efficiency.** Deep system integration of the transmission, engine system, hydraulic system, and cooling system results in significantly high performance and fuel efficiency.

ASSISTED OPERATION

Save time and money with long service intervals, in-cab maintenance reminders, Tire Pressure Monitoring System, and expanded Remote Services capability.

BUILT-IN SAFETY

Spacious cab layout with floor-to-ceiling windshield and left footrest for added stability helps you work more safely. A 4-point seat belt kit with retractors is available. Optional Collision Warning System with Motion Inhibit and People Detection provides enhanced operator awareness at the rear of the machine.

MAXIMIZE EFFICIENCY RIGHT FROM THE CAB

Cat wheel loaders feature integrated technologies that help make your operation more efficient.

CAT PAYLOAD

- + Achieve precise load targets every time
- Track daily production

AUTODIG WITH AUTO SET TIRES

- + Boost productivity with automated loading
- Reduce tire wear

JOB AIDS

Make machine operation easier

A MORE EFFICIENT JOBSITE MEANS **MORE PROFIT** IN EVERY LOAD.

CAT CONTINUOUSLY VARIABLE TRANSMISSION

Our advanced transmission delivers smooth operation, fast acceleration, and high speed on grade.

SIMPLE OPERATOR INTERFACE

Reduced operating complexity offers more comfort, better control, and less fatigue every shift.

RIGHT PEDAL CONTROL – GO

The right-hand pedal allows you to control machine speed and desired rimpull independently from engine RPM. It features a lock function to enhance operating comfort.

LEFT PEDAL MODULATION – STOP

The left-hand pedal provides integrated rimpull modulation and retarding functions. It will help reduce tire slip in the dig and brake wear using machine system to slow down the machine.

EASY MANEUVERABILITY

Machine maneuvering is made easy with creep capability and hill-hold on grade.

ADVANCED POWER DIAGNOSTIC

On-board diagnostic replaces stall testing and offers additional troubleshooting information.

SIMPLIFIED TRANSMISSION CONTROL STRATEGY

- Programmable Virtual Gears
- Allows the operator to remain in full machine control without impacting fuel efficiency.
- Fully Automatic
- The continuously variable transmission does not require adequate gear selection from the operator and always delivers desired rimpull or speed.
- Integrated Flexibility
- Separate virtual gears can be set for speed control, simplifying machine operation.
- Steady Deceleration
- Modulate rimpull and speed with either pedal to engage pile with maximum efficiency.
- Simple Directional Shifting
 - Initiate directional changes at any speed and let the machine retard without applying the brakes or modulating throttle for smooth operation and increased operator comfort.

ON-BOARD JOB AIDS

Job aids help make machine operation easier, while also allowing your operators to improve and optimize their skills on the jobsite.

CONTINUOUS VARIABLE TRANSMISSION

No shift delays or engine underspeed situations affect the productivity of the machine.

PRODUCTIVE RESULTS

BUILT FOR LONG-TERM PRODUCTION

PERFORMANCE SERIES BUCKETS

Easy-to-load Performance Series Buckets improve material retention and reduce dig times, significantly improving productivity and fuel efficiency, resulting in unsurpassed production capabilities with increased fill factors – ranging from 100% to 115%.

BETTER TRACTION

New Autodig with Auto Set Tires for consistent high bucket fill factors delivers excellent productivity compared to previous model. Optional limited slip differentials increase traction in slippery conditions.

OPTIMIZED RIDE CONTROL SYSTEM

Dual accumulator system enables a better ride in loaded and unloaded situations. It improves smoothness over rough terrain, increasing confidence and efficiency and ensuring excellent material retention.

AGGREGATE HANDLER

Aggregate packages are specialized offerings for loose aggregate rehandling applications. Payloads can be increased above other applications by installing larger buckets and counterweights in compliance with Caterpillar payload policy.

THE RIGHT MIX OF FEATURES

Fine-tuned for the right applications:

- + EXCEPTIONAL FUEL ECONOMY, MAXIMIZED UPTIME, AND LOW MAINTENANCE COSTS
- + HIGH POWER AND PERFORMANCE ACROSS A VARIETY OF APPLICATIONS
- + ENHANCED RELIABILITY THROUGH COMMONALITY AND SIMPLICITY OF DESIGN
- + WORLD-CLASS SUPPORT FROM THE CAT DEALER NETWORK
- + DURABLE DESIGNS WITH LONG LIFE TO OVERHAUL

ADVANCED POWERTRAIN

Power is transmitted through a continuous variable parallel path transmission. Combining direct mechanical and Hystat power paths maximizes efficiency over a wide range of operating conditions.

DURABLE AXLES

Axles are designed to handle your most extreme applications. The rear axle oscillates to ± 13 degrees for excellent stability and traction on even the roughest terrain.

QUICK COUPLERS AND WORK TOOLS

For versatility, buckets and components can be changed without leaving the cab, allowing the machine to quickly move from task to task.

OPTIMIZED HYDRAULICS

980×

Our hydraulic systems come equipped with a monoblock main hydraulic valve. This design reduces weight while decreasing leak points by 40%.

Do more jobs with one machine. An extensive range of work tools and bucket styles are available to optimize these machines for your operation.

DURABLE FRAMES

The robotically welded two-piece structural frame absorbs impact associated with excavation and loading, while the hitch system provides high bearing force capacity.

INTEGRATED TECHNOLOGY SOLUTIONS FOR EFFICIENT & SAFER OPERATION

Your machine comes equipped with innovative Cat technologies that give you the edge. Operators of all experience levels will dig and load with more confidence, speed, and accuracy. The result? Better productivity and lower costs.

CAT DETECT

Rearview camera is standard. This system can be enhanced with an additional display dedicated to the rearview camera as well as for a Multiview (360°) system. To complete the Cat Detect offerings, the machines can be equipped with a rear radar system, which features speed-sensitive alerts and ground clutter filtering to avoid annoyance.

CAT COMMAND

Cat Command remote control enables equipment operators to work safely outside the machine when working in hazardous environments. Command offers the choice of handheld consoles* (line-of-sight) or long-distance virtual stations (nonline-of-sight). Deep integration with machine systems enables efficiency and productivity by maintaining the use of in-cab technology* features.

COLLISION WARNING SYSTEM WITH MOTION INHIBIT AND PEOPLE DETECTION

The Collision Warning System with Motion Inhibit utilizes radar and vision sensors to detect hazard potentials, alert operators, and inhibit motion in the instant a machine transitions from an inactive to an active state while moving in the rearward direction. Audible and visual alerts can deliver the power to see, mitigate, and manage hazards that may otherwise go undetected to operators.

People Detection is an effective solution that utilizes both a smart camera and radar to alert the operator when a person is detected behind the machine. When machine is stationary for at least 15 seconds, and if the rear detection system detects something in the alarm zone, Motion Inhibit will prevent the machine from engaging reverse gear, helping to keep those who may be unexpectedly around the machine safe.

CAT PAYLOAD**

Cat Payload technology delivers precise bucket load information with on-the-go weighing, which helps prevent overor underloading. The low lift weigh and manual tip-off functions optimize the final bucket process and maximize efficiency.

CAT ADVANCED PAYLOAD

Advanced Payload is a system upgrade that offers expanded features and capabilities. Tip-off assist adds automation to the final bucket process. Multitask mode tracks two loading processes simultaneously. Split mode allows for loading multiple bodies while tracking individual targets and grand totals. Add Dispatch for Loading*** to integrate the loader into the scale house process. E-Ticketing allows an operator to generate a weighing ticket and effortlessly send it over the air to any email address.

CAT PAYLOAD FOR TRADE****

The Cat Payload for Trade option for Cat Advanced Payload allows you to integrate the scale data directly into your business processes. It is type approved by the International Organization of Legal Metrology, while retaining all the features of the standard version of Cat Advanced Payload.

- * Cat Command is not available in all regions or for all models. Please consult with your Cat dealer for machine compatibility and availability in your area.
- ** Not legal for trade.
- *** Subscription and compatible scale house software required.
- **** Available in Europe. Country certifications vary. Contact your Cat dealer for more information.

8 980 XE WHEEL LOADER

REAL-TIME INFORMATION FROM CAT LINK TAKES THE GUESSWORK OUT OF MANAGING YOUR EQUIPMENT

Cat Equipment Management technologies work together to put equipment information at your fingertips. Get real-time access to information on every machine in your fleet on any jobsite – no matter the size of the operation or the brands of equipment you run.

VISIONLINK®

Gather and summarize machine telematics and jobsite data from all your equipment – regardless of the manufacturer.* View actionable information such as idle time, fuel burn, location, payload, load counts, total cycles, and more to improve machine efficiency, productivity, and utilization. Access data anywhere via a mobile, tablet, or desktop device – on or off the jobsite.

* Data field availability can vary by equipment manufacturer. VisionLink® subscription required. Availability may vary by region. Consult your Cat dealer for more details.

CAT REMOTE SERVICES*

A suite of technologies that improve your jobsite efficiency.

- + Remote Troubleshoot allows your Cat dealer to perform diagnostic testing on your connected machine remotely, pinpointing potential issues while the machine is in operation. Remote troubleshooting helps to ensure the technician arrives with the correct parts and tools the first time, eliminating additional trips, to save you time and money.
- + **Remote Flash** allows you to update onboard software without a technician being present, allowing you to initiate software updates when convenient, increasing your overall operating efficiency.
- + Operator ID requires operators to log in via Passcode or Bluetooth[®] (Cat Key Fob) at machine startup, helping to deter theft, vandalism, and unauthorized use. It saves settings from the last time an operator was logged in and maintains profiles that were retained during machine software flash updates. Operator IDs are easily managed through the touchscreen and can also be managed remotely and uploaded to the machine through Visionlink.

* Must be within cell range coverage.

CAT INSPECT

Cat Inspect is a mobile application that allows you to easily perform digital preventative maintenance checks, inspections, and daily walkarounds. The app includes machine-specific Preventive Maintenance (PM) checklists to perform service intervals as recommended in the Operation and Maintenance Manual. Inspections can easily be integrated with other Cat data systems like VisionLink®, so you can keep a close eye on your fleet.

WORK IN COMFORT

IN THE SPACIOUS CAB

The cab is designed to enhance comfort and efficiency, providing a quiet, more expansive workspace with user-friendly controls to minimize fatigue, stress, noise, and heat during demanding tasks.

CAB ACCESS

Inclined steps, large opening door, remote door opener, and convenient grab handles ease accessibility to the operating space.

OB OPERATOR ID

Secure machine usage with dedicated Operator IDs. Machine settings are saved separately, increasing shift change efficiency. Unlock the machine using Passcode or optional Bluetooth® key.

O GREAT VISIBILITY

Large, wide windows enhance visibility while convex and spot mirrors extend the driver's view on the sides and rear.

COMFORTABLE WORK ENVIRONMENT

Spacious cab with significant legroom and easily adjustable seat and suspension. 4-point seat belt kit with retractors on the lap belt for added comfort, efficiency, and freedom of movement. A left footrest allows for added operator comfort, safety, and machine stability when working in uneven, bumpy operations.

QUIET CAB

Sound-suppression, seals, and viscous cab mounts decrease noise for a quieter work environment.

1 JOYSTICK STEERING

The seat-mounted electro-hydraulic joystick steering system provides precision control and dramatically reduces arm fatigue, resulting in excellent comfort and accuracy.

SIMPLE CONTROLS AT YOUR FINGERTIPS

TOUCHSCREEN DISPLAY

The easy and intuitive interface lets the operator work with confidence and efficiency. It includes Operator ID, machine settings, job aids, maintenance reminders, help functions, security, rearview camera, and integrated Cat Payload.

CENTRAL DISPLAY

Featuring easy-to-read analog gauges and LED indicators that allow the operator to quickly monitor critical machine health parameters.

A large text box displays the Cat Payload information as well as gear selection, machine travel speed, time, and hour meter.

Application Profile settings allow each operator to set customized forward/reverse default speed ranges and rimpull limits and are easily visible on the front dash.

KEYPADS

Easy-to-reach backlit keypads on the implement control pod and the A-post provide instant access to many functions and settings. Only active buttons or functions are illuminated, making it very intuitive for the operator.

Cat wheel loaders are easy to maintain and service, eliminating any potential waste of time or money. Major components are rebuildable, giving the machine a second life and often a third life.

KEY FEATURES SAVING YOU TIME, MONEY, AND ENERGY:

- + Tire Pressure Monitoring System allows operator to easily monitor tire pressure from the main machine display, helping to improve machine performance, operator ride, and operating costs.
- + Maintenance reminders help to synchronize machine maintenance schedule and reduce operation downtime.
- + Convenient access to hydraulic and electrical service centers for easy and safe servicing.
- + Remote Troubleshoot can connect the machine to the dealer service department to help diagnose problems quickly so you can get back to work.
- + Remote Flash works around your schedule to ensure your machine's software is up to date for optimal performance.
- + Integrated Autolube extends component and service life.
- One-piece tilting hood makes engine compartment access fast and easy.

FEWER FILTERS MEANS LESS MAINTENANCE

THE 980 XE USES **64** FEWER FILTERS OVER 10,000 HOURS COMPARED TO THE 980M.

DOMORE JOBS VERSATILE ATTACHMENTS

AND COUPLERS

For worksites that demand more, you need a wheel loader that is purpose-built for the job. Cat work tools are engineered to handle all of your specific application needs.

STANDARD Z-BAR LINKAGE

The proven Z-bar linkage combines digging efficiency with sharp visibility, resulting in excellent excavation, high breakout forces, and superior production capabilities.

QUICK COUPLERS AND WORK TOOL ATTACHMENTS

A wheel loader equipped with a Cat Fusion[™] quick coupler system is a much more versatile machine. Buckets and work tools can be changed without leaving the cab – allowing the machine to quickly move from task to task. Consult your local dealer for availability of a variety of specialty buckets and forks.

PERFORMANCE SERIES BUCKETS

Performance Series Buckets use a system-based approach to balance bucket shape with the machine's lift and tilt capacity, weight, and linkage. A variety of work tools and bucket styles are available for a range of applications, including general purpose, flat floor, heavy duty rock, and coal-style buckets.

- + Easy loading
- + Fuel efficient
- + Carry more
- + Lower operating costs
- + Higher productivity

HIGH LIFT LINKAGE

The optional high lift linkage offers increased hinge pin height to load more easily in a variety of applications with any type of bucket or fork.

PURPOSE-BUILT SPECIALTY CONFIGURATIONS

Maximize your wheel loader's performance and durability in the toughest applications with application-specific arrangements direct from the factory.

Scrap and waste models – guarding and reinforcement protect components when working in transfer stations, recycling depots, scrap yards, and demolition sites. **Forestry model** – increases lift and tilt capacities for efficiency and productive log and chip handling in paper, pellet, and sawmills.

TECHNICAL SPECIFICATIONS

See cat.com for complete specifications.

ENGINE		
Engine Model	Cat	® C13
Engine Power @ 1,700 rpm – ISO 14396	313 kW	420 hp
ISO 14396 (DIN)	426 hp	(metric)
Gross Power @ 1,700 rpm – SAE J1995	317 kW	425 hp
Net Power @ 1,700 rpm – ISO 9249, SAE J1349	293 kW	393 hp
ISO 9249:2007 (DIN)	398 hp (metric)	
Engine Torque @ 1,200 rpm – ISO 14396	2185 N·m	1,612 lbf-ft
Gross Torque @ 1,200 rpm – SAE J1995	2206 N·m	1,627 lbf-ft
Net Torque @ 1,100 rpm – ISO 9249, SAE J1349	2086 N·m	1,539 lbf-ft
Displacement	12	.5 L

• Cat engine meets U.S. EPA Tier 4 Final, EU Stage V, Korea Stage V, and Japan 2014 emission standards.

• The net power advertised is the power available at the flywheel when the engine is equipped with fan, alternator, air cleaner, and aftertreatment.

- Advertised power is tested per the specified standard in effect at the time of manufacture.
- Cat diesel engines are required to use ULSD (ultra-low sulfur diesel fuel with 15 ppm of sulfur or less) and are compatible* with ULSD blended with the following lower-carbon intensity fuels** up to:
- 20% biodiesel FAME (fatty acid methyl ester)***
- 100% renewable diesel, HVO (hydrogenated vegetable oil) and GTL (gas-toliquid) fuels

Refer to guidelines for successful application. Please consult your Cat dealer or "Caterpillar Machine Fluids Recommendations" (SEBU6250) for details.

- * While Caterpillar engines are compatible with these alternative fuels, some regions may not allow their use.
- ** Tailpipe greenhouse gas emissions from lower-carbon intensity fuels are essentially the same as traditional fuels.
- *** Engines with no aftertreatment devices are compatible with higher blends, up to 100% biodiesel (for use of blends higher than 20% biodiesel, consult your Cat dealer).

WEIGH	ITS	
Operating Weight	30 344 kg	66,877 lb
• Weight based on a machine configuration	with Bridgostopo 20 5B2F	VSNTLA

 Weight based on a machine configuration with Bridgestone 29.5R25 VSNT L4 radial tires, full fluids, operator, standard counterweight, ride control cold start, roading fenders, Product Link, open differential axles (front/rear), secondary steering, sound suppression, and a 5.4 m³ (7.1 yd³) general purpose bucket with BOCE.

		BUCKET C	APACITIES		
Bucket Rang	e			4.0- 14.5 m ³	5.25- 19.0 yd³
		TRANSI	MISSION		
Forward 1	7.0 km/h	4.4 mph	Reverse 1	8.1 km/h	5.0 mph

AIR CONDITIONING SYSTEM

The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). If equipped, the system contains 1.6 kg (3.53 lb) of refrigerant, which has a CO, equivalent 2.288 metric tonnes (2.522 tons).
