M319 WHEELED EXCAVATOR

Meets U.S. EPA Tier 4 Final and EU Stage V emission standards.

THE NEW CAT® M319

POWERFUL. VERSATILE. COMPACT.

The Cat® M319 Wheeled Excavator provides top performance to get the job done faster. Save time and money with low maintenance costs, longer service intervals, and 100% daily ground level maintenance. The compact radius design allows you to work in space-restricted areas and provides the additional versatility you need to perform tasks that may not otherwise be possible.

NEXT GENERATION WHEELED EXCAVATORS

The new line of Cat wheeled excavators offers more choices than ever for your business.

- + LOWER OPERATING AND MAINTENANCE COSTS
- + INCREASED OPERATOR EFFICIENCY AND VISIBILITY
- + MORE IN-CAB COMFORT

Ready to help you make your business stronger, Cat next generation wheeled excavators give you new ways to get the most work done at a cost that fits your business.

MAXIMIZE PERFORMANCE

Work faster with more swing torque with lower fuel and diesel exhaust fluid (DEF) consumption. Tiltrotator integration gives you more versatility to complete more tasks faster with one machine.

LOWOWNING AND OPERATING COSTS

Fewer maintenance costs, combined with 100% daily ground-level maintenance and extended service intervals, increase uptime and keep overall costs down.

ENHANCEDCAB COMFORT

Operate comfortably with the ergonomic control layout and cab options. Get better visibility with rear- and side-view cameras and an optional 360° machine view system.

NEW CAB DESIGN

MAKES HARD WORK EASY

Comfort and movement efficiency help keep you productive and alert all shift long. A tip-up left console lets you get in and out of the cab easily, and the standard seat is wide and adjustable for operators of virtually any size.

POWER MODES

Set and store your power mode preference using operator ID. Owners can lock in the mode they want their operators to use to help manage fuel consumption.

CUSTOMIZABLE JOYSTICKS

Joystick function can be customized through the monitor. Joystick pattern as well as control response can be set to match operator preference. All preferences are saved with the operator ID and restored at login. Make operating easier with the touch of a joystick button. Additional auxiliary relays allow you to power on or turn off a CB radio, beacon light, and even a dust suppression watering system without taking your hands off the joysticks.

KEYLESS PUSH TO START

The M319 uses a keyless push-button engine start. This adds security for the machine by using operator ID codes to limit and track machine access. Codes can be entered manually or via an optional Bluetooth® key fob.

TOUCHSCREEN MONITOR

Most machine settings can be controlled through the high resolution 254 mm (10-inch) touchscreen monitor. It offers 42 languages and is easy to read from the seat.

REDUCE OPERATOR FATIGUE

ERGONOMIC LAYOUT

Controls are easy to reach, allowing you to operate comfortably with minimal twists and turns.

REDUCED CAB VIBRATIONS

Work more comfortably with reduced cab vibrations from advanced viscous mounts. The standard rollover protective structure (ROPS) cab meets ISO 12117-2:2008 requirements and helps block outside noise.

BLUETOOTH CONNECTION

Bluetooth-integrated radio allows for seamless mobile phone connection to listen to music, podcasts, and for hands-free calling.

OPTIONAL TECHNOLOGIES INCLUDE:

CAT GRADE WITH 2D

Cat Grade with 2D helps operators reach grade faster. Onboard processors and sensors provide real-time guidance on distance to grade without guesswork. Work safer with fewer ground personnel needed to check the work area for obstacles or grade. All Cat Grade systems are compatible with radios and base stations from Trimble.

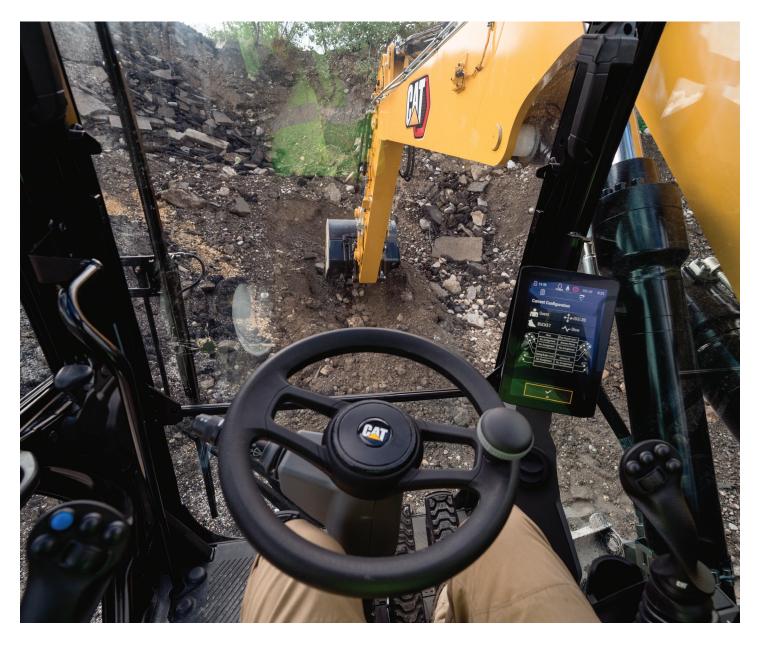

CAT PAYLOAD

Cat Payload helps you achieve precise load targets to improve your operating efficiency. Pick up a load of material – with a bucket and thumb combination or grapple and clamshell attachments – and get a real-time weight estimate without swinging.

Cat technology gives you the edge. Operators of all experience levels will dig, load, and grade with more confidence, speed, and accuracy to save time and money.

CAT TECHNOLOGY MORE WORK, LESS TIME

GET JOBS DONE FASTER WITH LESS REWORK

Cat Grade with Advanced 2D lets you create and edit grade designs with ease on a second high-resolution 240 mm (10 in) touchscreen monitor. Cat Grade with 3D adds real-time, pinpoint positioning using GPS and GLONASS. Already invested in a grade infrastructure? You can install grade systems from Trimble.

COMPACT RADIUS

SIZED RIGHT FOR CONFINED SPACES

The M319's compact radius design makes it the right machine for working in space-restricted areas. Work confidently in road construction jobs with lane closures and next to buildings and other structures.

The M319 gives you maximum upper frame turning radius, while providing solid lifting performance.

SMARTBOOM™

SmartBoom™ lets the boom freely travel up and down without using any pump flow, so operators can focus on attachment control and have a smoother cycle.

AUTO AXLE LOCK WITH AUTO BRAKE

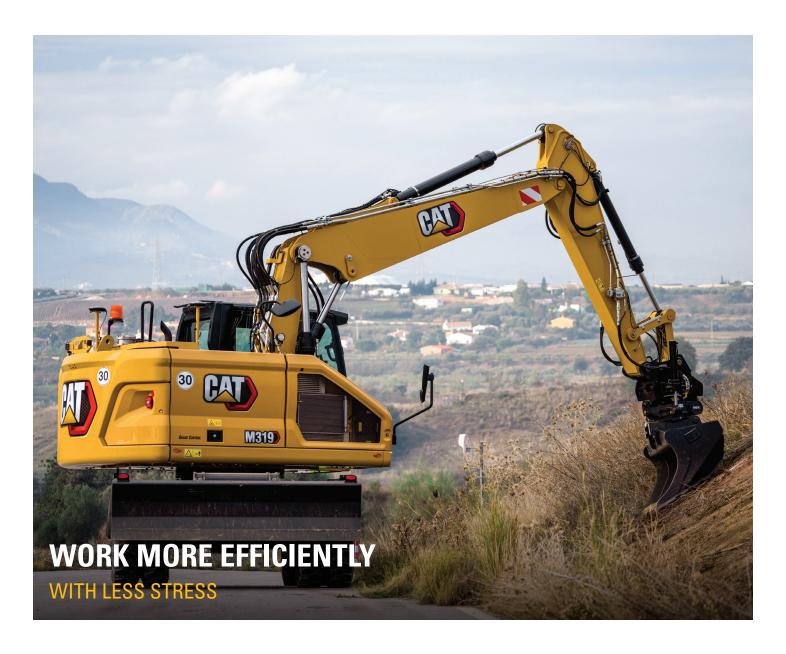

The axle locks at zero speed and unlocks when the travel pedal is activated. The axle can also be manually locked with a button on the right-hand console. Auto axle brake lock automatically activates the service brake and locks axle oscillation. It is activated when the travel pedal is in neutral and the machine speed is near zero.

RIDE CONTROL

The ride control system lets you travel faster over rough terrain with improved ride quality. Accumulators act as shock absorbers to help make your journey smoother.

JOYSTICK STEERING

Keep both hands on the joysticks while simultaneously moving the boom and stick and repositioning the machine with the slider switch on the right joystick.

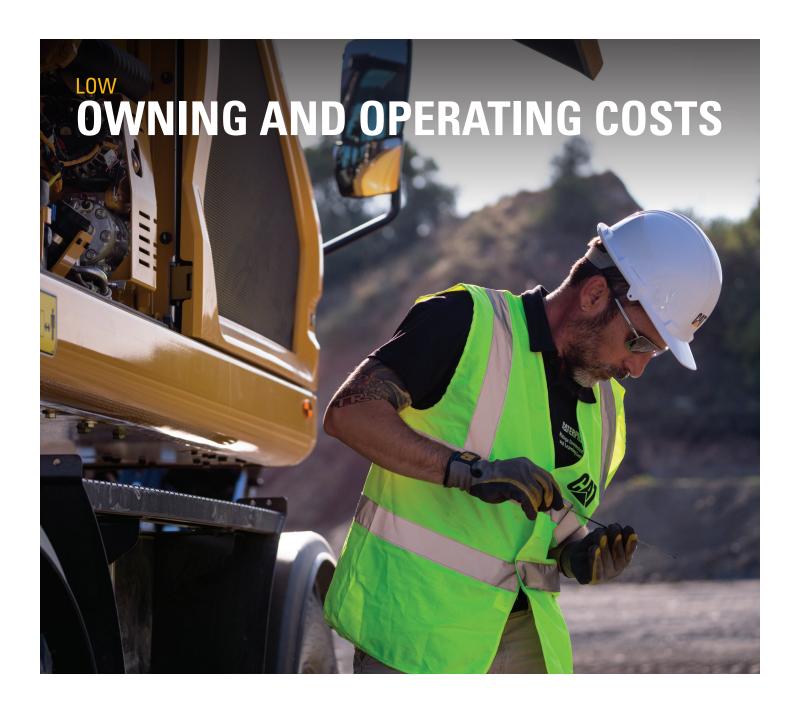

EXPAND YOUR JOBSITE CAPABILITIES

WITH MORE SWING TORQUE AND FUEL EFFICIENCY

An increase in swing torque makes traveling, swinging, and working on slopes easy. Backfill trenches and move around your jobsite faster than before — allowing you to be more productive and finish jobs quickly. An advanced hydraulic system provides the optimum balance of power and efficiency while giving you the control you need for precise digging requirements.

DO MORE. PAY LESS.

With extended and more synchronized maintenance intervals, you get more done at a lower cost. Consolidated filter locations make service faster.

INFORMATION AT YOUR FINGERTIPS

View operating information such as fuel levels and critical service alerts on the incab touchscreen monitor. Your machine's filter life and maintenance intervals are also trackable on the in-cab monitor.

NEW LONGER-LASTING FILTERS

The new hydraulic oil filter provides improved filtration performance, anti-drain valves to keep oil clean when the filter is replaced, and lasts up to 50% longer than previous filter designs.

SAFETY FEATURES

LOOK OUT FOR YOUR PEOPLE AND EQUIPMENT

GROUND-LEVEL DAILY MAINTENANCE

All daily maintenance checks can be performed from ground level, making maintenance faster, easier, and safer. Checkpoints include the engine oil dipstick, fuel water separator, fuel tank water and sediment drains, hydraulic fluid level check, and cooling system coolant level check.

UPPER PLATFORM ACCESS

The service platform design provides easy, safe, and quick access to the upper platform. The steps use anti-skid punch plate to prevent slipping.

2D E-FENCE

Optional 2D E-Fence is integrated right out of the factory to prevent the excavator from moving outside operator defined setpoints.

INSPECTION LIGHTING

Make service work easier and safer with optional inspection lighting. With the flip of a switch, lights will illuminate the engine, pump, battery, and radiator compartments to enhance visibility.

SEE THE JOBSITE AROUND YOU

Enlarged windows and improved machine layout increase visibility from the seat of the cab. Standard rearview and right-side-view cameras always keep operators aware of their surroundings. An optional 360° visibility feature is also available. Powerful, long-lasting LED lights consume minimal power, keeping you safe while working in the dark.
