

Performance Features

- Accommodates vent lines varying from 4 to 12 inches
- Varying heights and/or angle configuration
- Convenient power switch on rig floor
- Warning strobe light on igniter control box
- Equipped with hardwiring and protective shields
- Vent and ignite gas away from active working areas

Common Features

- Power 110 volt
- Control box
- Safety strobe light indicator
- Remote On/Off switch

SPM Oil & Gas' Gas Vent line Igniters can withstand intense heat over long periods of time. They feature a convenient 110-volt control switch that activates a pair of transformers and spark plugs for safe remote ignition. Hardwiring and protective shields enhances the igniters durability, while a warning strobe light on the control box enhances operator safety. We offer several configurations to meet any gas ignition needs.

Standard Igniters

	6" diameter	8" diameter	10" diameter
Length	15'	9'	9'
Weight	500 lbs	600 lbs	800 lbs
