

Spend more time loading and less time servicing

We've streamlined maintenance on the Cat 6030 to make sure your shovel is spending more time producing than it is being maintained. We made it more efficient to inspect, maintain and repair hydraulic components by placing the main valve block on the boom and improving the routing and clamping of hoses. The integration of Cat hose assemblies ensures they can be built locally, which reduces downtime and operating costs. Access to Cat Electronic Technician (ET) allows you to more effectively diagnose and execute engine maintenance.

SERVICE STATION

The service station provides easy access to functions such as coolant, hydraulic oil, slew gear box oil, grease, diesel and engine oil. The service station features a Cat battery charging connector and indicator lights for full fuel tanks. Swing and travel functions are disabled when the service station is lowered.

- + Hydraulically released service station
- + Comfortable height
- + Improved access to all functions
- + Fast fill connections

SUPERSTRUCTURE ACCESS

Clear arrangement of components on the superstructure grants easy access and serviceability for coolant expansion tanks, air intake filters, oil tank breather, HVAC unit, grease tank, exhaust, and starter and battery isolator. We've also provided easy access to the slew gearboxes, rotary distributor, high pressure swing filters and travel spool valves. Oil cooler accessibility enables easy cleaning and maintenance.
