

ARE YOU LEAVING VALUE HIDDEN ON YOUR MINE SITE?

Here are 10 ways Cat® MineStar™ Terrain can help you uncover more value from every Operation and move it to where it belongs: on your bottom line.

1 TRACK AND ANALYZE MACHINE UTILIZATION AND PRODUCTIVITY

—by machine type, by operator, for a single production area, or for an entire pit—to instantly help you see exactly what’s happening across your operation.

2 TRACK THE AMOUNT AND TYPES OF MATERIAL MOVED

versus plan to make sure you’re meeting production goals every day.

3 SEAMLESSLY SHARE DATA WITH OTHER OFFICE APPLICATIONS

so every manager is dealing with the latest and most accurate operational data possible.

4 PUT ORE BODY MAPS, GRADE PLANS AND DRILL PLANS IN THE CAB

to help operators work more efficiently while reducing rework and errors.

5 TRANSMIT DESIGN FILES TO ALL TYPES OF MACHINES

with the touch of a button, so every operator is always working with the most current plan.

6 GET ACCURATE DATA FROM EVERY LOADER

to ensure trucks are loaded properly every time, reducing overloads that cause costly component wear.

7 PERFORM PRECISE BLENDING FROM THE FACE AND ON THE PAD

using precision guidance that shows loader operators exactly where to dig and what to load.

8 ENABLE DRILLS TO ADJUST FOR BENCH VARIATIONS

so the depth of every blasthole is at the same elevation, resulting in smooth, level benches that reduce tire and machine wear.

9 SHARE CUT AND FILL STATUS

within grading and loading applications or between draglines and dozers to show work progress and reduce wasted effort.

10 AVOID DAMAGE TO INFRASTRUCTURE AND MACHINES

with avoidance zones clearly displayed and alerting operators when entering.
