

CAT® REMAN

RESTARTING THE LIFE CYCLE OF YOUR EQUIPMENT

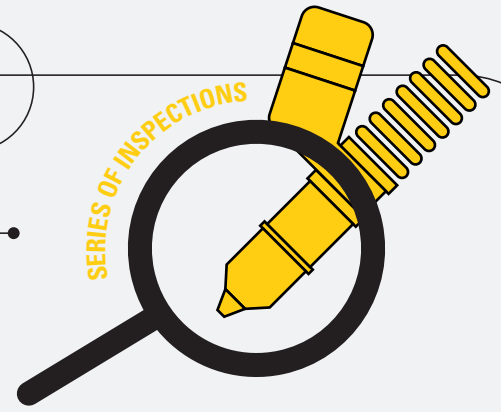

At Caterpillar, we optimize the processes that give you optimal equipment. Cat® Reman is no different.

As part of the circular flow of Cat products, in which old or damaged components are remanufactured and put back into use, Cat Reman parts offer consistent, like-new performance for a fraction of the cost of new.

1 RETURNING A CORE

When a core (i.e., engine component) is returned, it goes through a series of inspections. Depending on the component, our teams accept fully assembled cores — as long as they don't display signs of mishandling, corrosion, cracks or pitting.

LIKE-NEW PERFORMANCE

2 REMANUFACTURING A COMPONENT

After inspection, the core continues through our remanufacturing process, where it's disassembled and subjected to finely tuned procedures, like metal deposition and our five-stage cleaning process. Then, it's remanufactured and tested.

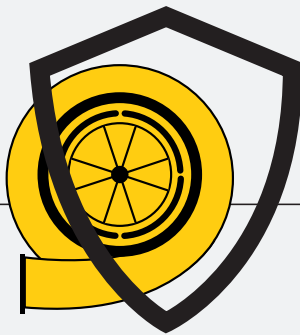

5-STAGE CLEANING PROCESS

3 RESTORING A PART

Next, the core is reassembled and validated to ensure it matches the latest specs, emissions standards and engineering upgrades for new parts.

Whether they're drivetrain, electronics, hydraulics or undercarriage — Cat Reman parts are made to fit Cat equipment.

CAT REMAN PARTS ARE MADE TO FIT CAT EQUIPMENT

4 REINFORCING A PRODUCT

Each Cat Reman component is given our 12-month Caterpillar parts warranty*, which includes service, labor and unforeseen damage.
