

**CAT® DETECT WITH  
SURROUND CAMERAS**

# A **SAFER** SITE IN PLAIN SIGHT

**CAT® SAFETY UPGRADES**

# GIVE YOUR OPERATORS A BIRD'S-EYE VIEW

Accidents on construction sites result in more than 150,000 injuries a year, per the U.S. Bureau of Labor Statistics. **That's one injured worker for every 10 on the job**, according to the U.S. Occupational Safety and Health Administration.

Limited visibility can play a major role in these accidents. One way to help solve this problem is with **CAT® SURROUND CAMERAS**; a quick, easy upgrade.

## ACHIEVE YOUR VISION OF SAFER OPERATION

The Surround Camera system helps your operators work more confidently and keeps your ground crew safe. Here's how it works:

- **Rugged, vibration-resistant cameras** (three or four) mount on the outside of the machine. Point the cameras to the front, rear, and/or sides of the machine, as well as, buckets and attachments to increase visibility.
- **Live images in the cab** let operators see views from all cameras at once, providing a bird's-eye view around the machine and a larger, dedicated view on the left side of the display.

## THE ADVANTAGES ARE CRYSTAL CLEAR

The Surround Camera system reduces blind spots and improves operators' awareness of their surroundings. This helps minimize unwanted contact with other equipment, objects and people on site, so you can:

Increase safe operation to help avoid accidents and related downtime

Reduce the need for spotters on site to lower risk and labor costs

Boost operator confidence to improve productivity, accuracy and speed

## A SOLUTION THAT WORKS ACROSS YOUR FLEET

Unlike generic closed-circuit camera systems, Surround Cameras stand up to tough conditions and adapt to your operator and application requirements. Adding it to your Cat equipment — and other brands — is quick and easy. You can install the camera system on any machine with a 12- or 24-volt DC system in around four to six hours; plan to add another hour for each additional camera.

# TAKE THE NEXT STEP TOWARD A **SAFER** SITE

Talk to your Cat dealer about installing **CAT® DETECT WITH SURROUND CAMERAS** on your equipment.

Interested in more convenient, affordable ways to enhance safety on your site? Other options include **Cat® Detect with Smart Camera**, **Cat® Detect with Rear Camera**, and the **Cat® Seat Belt Reminder**. Investing in these easy upgrades delivers big returns for your operation: Fewer accidents. Less downtime. Lower costs. More confident, productive operators.
