

Cat® 637 Wheel Tractor-Scraper

The Cat® 637 Wheel Tractor-Scraper is engineered to conquer challenges operators face worldwide. With its strength and durability, it works in some of the most difficult conditions and materials one can find. Built with twin engines, the 637 has high rolling resistance and additional power for loading, traveling up grades, and over fill areas – ultimately creating faster cycle times.

Be More Productive

- · Up to 12% improvement in productivity.
- Advanced productivity electronic control system (APECS) allows the engine and transmission to communicate on a high level. This communication allows the machine to better utilize the power and torque the engine is producing. The net result is moving more material.
- Use ground speed control to set the desired top speed and the machine will find the gear that works best for the engine and the transmission, providing a lower fuel burn.
- The machine speed limit feature replaces top gear selection, allowing the machine to find the correct gear that works best for the engine and transmission. Pulling the load in the correct gear, in most cases, results in lower engine load factor and lower fuel burn.
- Auto-stall assists in quickly bringing the transmission to an operating temperature at startup when the machine is working in a cold climate region.
- Cat Payload Estimator for scrapers is an earthmoving solution for optimal payload and jobsite efficiency. Payload Estimator achieves on-the-go weighing by using bowl lift cylinder pressure during the loaded haul segment. Payload Estimator is optimized to be used with sequence assist, which provides increased productivity with less operator effort. Payload Estimator is an automatic feature when ordered with sequence assist.

Work in Comfort

- Reduce up to 14 individual operator commands per cycle with sequence assist (optional attachment).
- Steer with less effort using the newly designed high-pressure steering system.
- Enjoy interior improvements and a more ergonomic work environment with a 21% larger cab than the G Series cab.
- Intuitive, ergonomic controls keep operators focused on their work.
- Maintain desired cab temperature with automatic temperature control.

Designed for Safety

- Get in and out of the cab easier with the new powered access ladder system (optional attachment).
- Enhance an operator's awareness of site surroundings with the optional work area vision system (WAVS).
- Seat belt indicator provides visual and audible alerts when the seat belt is not in use.
- Advanced cushion hitch allows the cushion hitch to prevent end stroke by having the ability to predict end stroke events and manage the rate of dampening, resulting in reduced hitch maintenance and improved operator ride in rough conditions.
- · Easy ground level access to fuel, water, and engine oil.

Cat® 637 Wheel Tractor-Scraper

Easy to Operate

- The spacious cab features easy, intuitive controls and excellent visibility. The cab provides a comfortable working environment for all-day operation.
- Cat advanced ride management (ARM) seat suspension reduces end stroke movement of the load cylinder for a smoother ride.
- Engine overspeed protection will automatically engage with no operator input when the machine is in eighth gear. The machine will assist in slowing the machine speed by canceling the throttle command and engaging the engine compression brake.

Integrated Cat Technologies

- Monitor, manage, and enhance jobsite operations.
- Hit target grade faster and more accurately with Cat Grade technologies. Finish jobs in fewer passes and with less operator effort, saving you time and helping to increase profit.
- Product Link™ collects machine data that can be viewed online through web and mobile applications (optional attachment).

- Access information anytime, anywhere with VisionLink® use
 it to make informed decisions that boost productivity, lower costs,
 simplify maintenance, and improve safety and security on your
 jobsite.
- Shorten the learning curve for inexperienced operators with load assist (optional attachment).

Execute Efficiency

- The new tractor hydraulic on-demand fan helps assist in lower fuel consumption.
- Using draft-arm overflow guards diverts material away from the bowl, preventing material from getting caught between the draft arms and the bowl sides.
- Cat Grade Control (optional attachment) intelligently ensures the machine does not cut below grade in a cut area or overfill in the fill area.

Standard Equipment and Optional Attachments

Standard equipment and optional attachments may vary. Consult your Cat® dealer for details.

Cat® 637 Wheel Tractor-Scraper

Technical Specifications

| Engine – Tractor | | | |
|-------------------------------|---------------|--------|--|
| Engine Model | Cat® | C18 | |
| Rated Engine Speed | eed 1,900 rpm | | |
| Engine Power (ISO 14396:2002) | 425 kW | 570 hp | |
| Engine – Scraper | | | |
| Engine Model | Cat | C9 | |
| Rated Engine Speed | 2,150 rpm | | |
| Engine Power (ISO 14396:2002) | 216 kW | 290 hp | |

- Meets U.S. EPA Tier 4 Final or EU Stage V emission standards, or equivalent to U.S. EPA Tier 3 and EU Stage IIIA, or equivalent to U.S. EPA Tier 2.
- Net power available at the flywheel when the engine is equipped with fan, air cleaner, aftertreatment, and alternator with engine speed specified.

| General Data | | |
|---------------------------------------|--------------------------|------------------------|
| Overall Width | 3.94 m | 12'11" |
| Overall Shipping Height | 4.15 m | 13'7" |

ROPS/FOPS

ISO 3471:2008

ISO 3449:2005 Level II

 The exterior sound power level for the standard machine (ISO 6393:2008) is 111.5 dB(A).

Air Conditioning

 The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 1.9 kg (4.2 lbs) of refrigerant which has a CO₂ equivalent of 2.71 metric tonnes (2.674 tons).
