
CAT[®] WATER SOLUTIONS

Defeat dust. Now you're in control.

785D WATER TRUCK

What comes to mind when you think about the worksite? Dump trucks hauling loads of material, the boom of dynamite blasting through rock, or the dust levels that decrease visibility?

THE CHALLENGE: DUST

Haul road dust can impact safety and productivity. That's why Caterpillar is now offering a fully integrated solution to control dust – connected and backed by the one you trust.

A water truck may be one of the most important pieces of equipment at your site – and the support you need is just as important.

Integrated water solutions help you reduce haul road dust, solve overwatering / underwatering issues, and manage your site more safely, productively, and sustainably – with scalable levels of technology and support from the Cat® dealer you know and trust.

THE ANSWER: CAT WATER SOLUTIONS

Whether in a quarry or at a mine site, the 785D has been a proven performer around the world. That's why we chose this truck to deliver an integrated Cat Water Solution – combining a truck, tank, and sprayer system with flexible levels of connectivity through Cat® MineStar Edge™.

Defeat Dust. Control Cost. Gain an Edge.

ONE SMART CHOICE: TRUCK, TANK, AND SPRAYER SYSTEM INTEGRATION – CONNECTED WITH FLEXIBLE LEVELS OF TECHNOLOGY.

A proven Cat 785D truck chassis is integrated with the tank and Cat Water Delivery System, paired with scalable technology to meet customer needs for more efficient, productive operations.

MineStar Edge Technology

The Basic connectivity package comes standard on all Cat Water Solutions trucks with a 6-month complimentary service-based offering for better data insights.

Cat branded tanks include additional features and options commonly selected by customers in the industry.

Cat Water Delivery System automatically controls the amount of water and spray patterns to prevent overwatering.

Cat truck platform is Cab and ROPS certified to protect your operators in case of a rollover.

Retrofit kits are available for existing water delivery and technology systems.

SITE SAFETY AND PRODUCTIVITY: KEEP YOUR OPERATIONS RUNNING AT PEAK PERFORMANCE

ENHANCED SITE SAFETY

The Cat Water Delivery System (WDS) provides variable water flow based on truck speed, eliminating overwatering that can lead to slippery roads.

Properly watered haul roads control vision-impairing dust and reduce risk of accidents due to poor visibility.

Reduce hazardous airborne particulates that cause long-term health issues for workers by suppressing dust.

OPTIMIZED PRODUCTIVITY

Properly watered haul roads directly impact fleet cycle times, enabling you to meet production targets.

Spend less time maintaining haul roads by using proper watering techniques to solve overwatering / underwatering issues.

Prevent damage to trucks and reduce unplanned downtime with properly watered haul roads.

Pump features soft startup and shuts off automatically when the tank is empty, eliminating damage to your investment.

Maintenance-free and self-cleaning water spray heads reduce truck downtime.

GAIN AN EDGE WITH

CAT MINESTAR EDGE

Two levels of connectivity (Basic and Premium*) to meet any customer need.

- Connectivity includes data logging capabilities critical to minimizing safety-related liability.
- Water Solutions data can help ensure customers are meeting regulatory requirements.
- Asset management options include productivity, water usage, fuel & water tank levels, when and where to apply water, geofencing, asset location and remote management of water distribution.
- Additional functionality will be released in the future.

*optional upgrade

BASIC CONNECTIVITY: Edge Equipment Tracking

Edge Equipment Tracking will not interfere with existing fleet management systems. And tracking capabilities are available without the need for infrastructure investment. Equipment Tracking provides insights that help mines better manage their assets, and as a result they deliver more value and mines enjoy a lower overall cost of ownership.

Features include:

- Service Meter Readings
- Fueling & Recording
- Location Accuracy & Replay
- Time Utilization Tracking, Downtime & Operator Tracking
- Automatic Stoppage Measurement
- Health Event Record

PREMIUM CONNECTIVITY: Edge Production Recording

From payload to dig rates to operator breaks — every activity has an impact on productivity and an opportunity to be improved. MineStar Edge Production Recording helps you find those opportunities by giving you visibility to your entire mining operation. When paired with Equipment Tracking, it delivers an accurate and automated near-real-time solution that measures and reports on every aspect of the load-haul-dump cycle without requiring any operator input.

Features include:

- Summary of Production Progress in Shift
- Drill Down / Spin the World
- Production Projections
- Production Record / Water Circuits Traveled
- Water Application and Tank Fill Time Cycles

INTEGRATION AND SUPPORT + FLEXIBLE OPTIONS = PROVEN COMPONENTS FOR RELIABLE PERFORMANCE

The 785D has been a proven performer at quarries and mine sites for decades. Now, the new 785D Water Truck with scalable technology offerings — delivered, warranted and serviced by your local Cat dealer — is more cost-effective as an integrated solution than its individual components.

A TURNKEY SOLUTION TO MEET YOUR UNIQUE NEEDS

- Retrofit kits available for existing Water Delivery and technology systems.
- A range of tank offerings to fit every quarry or mine site.
- Try before you buy: the Basic connectivity package comes standard on all Cat Water Solutions trucks, with a 6-month complimentary service-based offering, for better data insights.

785D Water Solutions Truck Tank Configurations

Multiple tank configurations are offered based on customer preference and regional locations.

OVERALL TRUCK SPECIFICATIONS				
Bare Chassis Weight	82 022	kg	180,827	lb
Fuel tank capacity	1892	L	500	gal
Fuel tank - 100% fill	1588	kg	3,500	lb
Target Gross Machine Weight (GMW)*	249 476	kg	550,000	lb
TANK: SOUTH AMERICA, AFRICA, MIDDLE EAST				
Water Tank Capacity	121 133	L	32,000	gal
Water Tank - Max Empty Weight (no WDS)	28 966	kg	63,860	lb
Empty Machine Weight (with water tank)	110 988	kg	244,687	lb
Machine Weight with water tank full	235 976	kg	520,237	lb
Empty Machine Operating Weight (without water / with fuel)	112 576	kg	248,187	lb
TANK: SOUTH AMERICA, AFRICA, MIDDLE EAST, AUSTRALIA / NEW ZEALAND				
Water Tank Capacity	114 000	L	30,000	gal
Water Tank - Max Empty Weight (no WDS)	21 550	kg	47,500	lb
Empty Machine Weight (with water tank)	101 572	kg	228,374	lb
Machine Weight with water tank full	217 602	kg	479,727	lb
Empty Machine Operating Weight (without water / with fuel)	103 160	kg	231,837	lb
TANK: AUSTRALIA / NEW ZEALAND				
Water Tank Capacity	120 000	L	31,700	gal
Water Tank - Max Empty Weight (no WDS)	30 286	kg	66,769	lb
Empty Machine Weight (with water tank)	112 308	kg	247,597	lb
Machine Weight with water tank full	232 305	kg	512,145	lb
Empty Machine Operating Weight (without water / with fuel)	113 896	kg	251,098	lb

NOTE: Machine weights based on configuration. *Target GMW not to exceed weight in above table after attachments are installed.

For truck rimpull and retarding curves, please reference the 785D Off-Highway technical specifications document.

THE TRUCK

Cat Truck Platforms 777 / 785 / 789

THE TANK

Features Include:

- Application-specific Cab and ROPS certification for operator safety
- Braking/retarding systems to provide operator focus on the job
- Hallmark Caterpillar durability, reliability, and efficiency
- Engine emissions to meet regional requirements
- Integrated systems enable fuel savings
- Eligible for Equipment Protection Plans (EPP) & Customer Value Agreements (CVAs)

Features Include:

- Splash guards, fill chute, rock ejectors
- Hoist capability for maintenance access
- Safety features include tie-offs, access ladders, camera system
- Cat dealer installation
- Caterpillar Factory Standard Warranty

THE SOLUTION YOU NEED, FROM THE ONE YOU TRUST.

THE CAT WATER DELIVERY SYSTEM

Features Include:

Self-contained hydraulic system controls spray patterns for consistent water coverage regardless of engine RPM

Capable of spraying up to 0.8 L/m² ranging from 3 to 25 mph (5 to 40 kph), covering an 80 foot (24 m) wide road in one pass

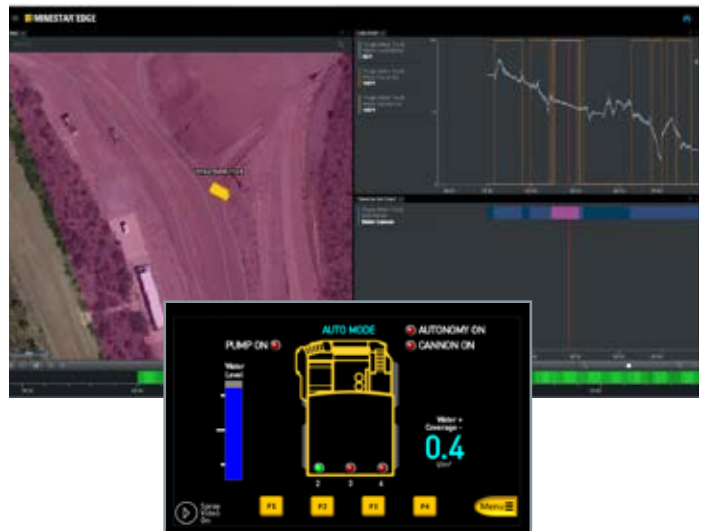

Variable water flow based on truck speed with automatic start and stop

Water cannon operates at idle

Pump features soft startup and shuts off automatically when the tank is empty

Factory-installed, integrated and durable ergonomic cab controls

THE TECHNOLOGY

Features Include:

Cloud-based application

Dedicated software and product support team

Service-based offering by site or by asset

Flexible levels of connectivity: choose from Basic or Premium packages

785D WATER TRUCK

CONTROL DUST • INCREASE VISIBILITY • REDUCE RISK
