

MEGA CORP.

EQUIPMENT TRAILERS

Overview

Located in Albuquerque, New Mexico, Mega Corp. has been manufacturing products in combination with on-highway and off-highway trucks, tow tractors, articulated trucks, and wheel tractor scrapers for use in the construction and mining industries worldwide for more than 50 years. Their product portfolio includes water distribution equipment, service bodies, and specialty haulage equipment.

CATERPILLAR OEM SOLUTIONS

MEGA EQUIPMENT TRAILER (MET)

Mega manufactures a line of heavy equipment transport trailers designed to work with tow tractors based on the Cat® off-highway truck bare chassis.

The simple and rugged gooseneck-type design includes the components necessary to convert the truck chassis into a tow vehicle — including the hitch system, deck, fender, hydraulic system and brake control software. Mega trailers are equipped with trailing axles utilizing Cat truck wheel groups including oil-cooled brakes and Cat brake control system components.

The Mega Equipment Trailer (MET) can be custom designed to fit dozers, drills, excavators, shovels and other heavy equipment found in mines and large earthmoving projects. Using an MET avoids or reduces expensive undercarriage maintenance that results from repositioning these track-type machines within the mine site.

The MET tow tractor conversion kit includes a hitch system, deck, fender, hydraulic system components and brake control software. This machine includes ISO test certification for brake performance and emergency steering. It also comes with documentation including installation guides, schematics, illustrated parts breakdowns, operator and maintenance manuals and recommended spare parts lists. On-site technical support is also available along with CE mark if required.

CAT® DERIVATIVE CONTENT:

» Cat 775 through 793 Off-Highway Truck Bare Chassis
» Cat Off-Highway Truck wheel groups

OEM CONTENT:

» Equipment transport trailer with ball hitch
» Tow tractor conversion kit
» Various options, including fixed and hydraulically-operated ramps, nerf bars, etc.
