

MEGA CORP.

HAULAGE TRAILERS

Overview

Located in Albuquerque, New Mexico, Mega Corp. has been manufacturing products in combination with on-highway and off-highway trucks, tow tractors, articulated trucks, and wheel tractor scrapers for use in the construction and mining industries worldwide for more than 50 years. Their product portfolio includes water distribution equipment, service bodies, and specialty haulage equipment.

CATERPILLAR OEM SOLUTIONS

MEGA HAULAGE TRAILER (MHT)

Mega manufactures a line of bottom-dump haulage trailers designed to work with tow tractors based on Cat® off-highway truck bare chassis.

Mega bottom-dump trailers are used in various haulage applications including coal, earth, and aggregates. These trailers utilize clamshell-type doors and are available with either vertical or inclined sides depending upon the application.

The simple and rugged gooseneck ball hitch design includes the components necessary to convert the truck chassis into a tow vehicle - including the hitch system, deck, fender, hydraulic system and brake control software. Mega trailers are equipped with suspended trailing axles utilizing Cat truck suspensions and wheel groups, including oil-cooled brakes and Cat brake control system components.

These machines can be custom designed to match the loading tools and material densities for specific applications. Trailer capacities include: 90-100 tons with Cat 775, 150-175 tons with the Cat 777, and 220-260 tons with the Cat 785. The custom designed gooseneck-type bottom-dump haulage trailer features hydraulically operated clamshell doors.

The MCH includes ISO test certification for brake performance and emergency steering. It also comes with documentation including installation guides, schematics, illustrated parts breakdowns, operator and maintenance manuals and recommended spare parts lists. On-site technical support is also available along with CE mark if required.
