

MEGA CORP.

FUEL AND LUBE SERVICE BODIES

Overview

Located in Albuquerque, New Mexico, Mega Corp. has been manufacturing products in combination with on-highway and off-highway trucks, tow tractors, articulated trucks, and wheel tractor scrapers for use in the construction and mining industries worldwide for more than 50 years. Their product portfolio includes water distribution equipment, service bodies, and specialty haulage equipment.

CATERPILLAR OEM SOLUTIONS

MEGA SERVICE BODIES

Mega's fuel and lube service bodies are designed for use with most articulated and rigid frame trucks. Each Mega service body is custom designed for a specific application and engineered to maintain the proper axle loading and weight distribution on the truck chassis.

Mega fuel and lube truck bodies can be purchased for integration with a dealer-provided truck or as a complete solution with a Mega provided truck. Every service body includes a complete set of technical manuals detailing installation, operation, maintenance, inspection, and replacement parts.

Fuel Truck Bodies (MFT) **Fuel And Lube Bodies (MFL)** **Lube Truck Bodies (MLT)**

Mega's complete line of fuel bodies for rigid and articulated trucks are designed for stable operation, and long life. The service body's structural, hydraulic, and electrical systems integrate with the truck chassis for trouble-free installation and operation.

Mega service bodies feature an optional integrated power system which uses fuel supplied directly from the platform fuel tank, allowing the service body systems to operate independently of the chassis. Other features include customizable tank sizes, product on-loading and dispensing systems with automatic shut-off control, filtration systems, heated enclosures, and Mega's proven structural durability and reliability.

CAT® MODEL COMPATIBILITY:

» Cat 725 through 745 Articulated Truck Bare Chassis
» Cat 773 through 793 Off-Highway Truck Bare Chassis

OEM CONTENT:

» Fuel and Lube Service Bodies
» Dispensing Systems
