GET LIKE NEW PERFORMANCE

Each Cat Reman hydraulic cylinder group and rod assembly performs like new Cat parts. This is all thanks to Caterpillar's strict remanufacturing processes, which include:

- Completely disassembling, cleaning and inspecting each component to ensure quality and durability
- Installing new bearings, bushings, and other wear components with 100% new components
- Testing chrome-plated surfaces for up to 96 hours of corrosive resistance to withstand harsh environments
- Incorporating critical engineering changes for like-new performance and long life
- Performing multiple quality checks, including an extensive end-of-the-line test

EXPANDING PRODUCT LINE

300+ additional remanufactured hydraulic components were added in just one year, and Cat Reman will continue to expand to meet customer needs.

RECEIVE MORE VALUE FOR YOUR CORE

Our flexible core acceptance criteria helps you get more for your money. We use simple, visual inspections that don't require special tools or disassembly. That means we can provide a quick decision on core condition and credit, so you don't have to guess about your repair costs.

Receive full core credit³ if:

- Acceptable Cat part number
- Fully assembled and complete
- No non-operational damage — mishandling, excessive rust, corrosion, fire damage, torch marks, pitting or unsuccessful salvage attempts
- No bent, broken, cracked or welded components

However, even rods or cylinder groups and assemblies with visibly cracked, broken or welded components can be eligible for partial credit.
