

# CAT<sup>®</sup> REMAN

## REMANUFACTURED REPAIR OPTIONS TO REVITALIZE YOUR EQUIPMENT

INCREASE YOUR UPTIME WITH DURABLE PRODUCTS DESIGNED TO PERFORM  
LIKE NEW FOR A FRACTION-OF-THE-COST OF NEW WITH CORE RETURN.

# GET TO KNOW CAT REMAN

## **COST-EFFECTIVE EFFICIENCY, NO MATTER ITS LIFECYCLE**

Looking for Cat® products designed to work in extreme conditions — parts that offer extensive support and repair options to meet your productivity needs? Consider Cat Reman, our line of remanufactured, genuine Cat parts that offer like new performance for a **fraction-of-new price with core return**.

**But how do they operate like new?** When viable parts or components have reached the end of one life, they may be returned to an authorized Cat dealer, then to Caterpillar. Robust Cat Reman inspections will determine whether these used parts (also referred to as core) are ready to be reclaimed.

Using the product's OEM performance specifications and incorporating the latest engineering upgrades, these parts are remanufactured to receive an additional lifecycle. This is completed through our state-of-the-art salvage processes and advanced manufacturing systems, all while adhering to strict reuse guidelines and stringent quality control.

## **COVERAGE WHERE IT COUNTS**

Cat Reman parts are available for use across most industries served by Caterpillar. The many Cat Reman offerings include complete engines, engine subcomponents and Diesel Exhaust Filters (DEF) filters as well as drivetrain, hydraulic components, undercarriage solutions and many electronic components.

Each product is made to last — dedicated to your equipment needs and backed by a 12-Month Caterpillar Limited Warranty<sup>1</sup>.

# WHAT CAT REMAN IS AND WHAT IT IS NOT

Cat Reman products are not rebuilt parts. They're remanufactured components that reclaim the potential of your equipment.

CAT REMAN IS	CAT REMAN IS NOT
Engineered in a consistent process with sustainable benefits, within a manufacturing environment designed to match the OEM performance specifications and manufacture of new products.	A repair — which is often a simple or targeted fix for specific concerns, designed to keep equipment running for the near term.
Upgraded to include the latest engineering updates.	A refurbish/recondition — which generally includes an external physical inspection, an internal visual examination, cleaning of material buildup and then reassembly with basic testing.
Made using components from original equipment which have been remanufactured to like new quality by Caterpillar.	A rebuild — which may require a longer turnaround time and, when completed by a third party, may use will-fit parts without the benefit of Caterpillar reuse guidelines and salvage specifications.
Restored using proprietary Caterpillar processes with genuine Cat parts.	A retrofit — in which new parts are designed to fit into older machine models to address productivity or maintenance issues.
Covered by a same-as-new, 12-month Caterpillar Limited Warranty¹.	
A comprehensive remanufacturing process of used parts obtained through core return that gives each part a new identity.	

“

ONE OF THE THINGS THAT CAT REMAN OFFERS TO OUR CUSTOMERS THAT **NOBODY ELSE CAN** IS THAT LINKAGE BACK TO OUR NEW COMPONENT SIDE OF THE BUSINESS.

WE ARE A COMPANY THAT CONTINUOUSLY IMPROVES AND **INNOVATES ON BEHALF OF OUR CUSTOMERS** TO MAINTAIN OUR COMPETITIVE ADVANTAGE.

**DANNY SIMON, CAT REMAN PRODUCT MANAGER**

”

## SOMETHING FOR EVERYONE

THROUGH ITS AVAILABILITY AND POSITIVE PERFORMANCE-TO-COST RATIO, CAT REMAN **PROVIDES EFFICIENCY BENEFITS** FOR CUSTOMERS.

With a convenient exchange model that offers customers a refunded deposit for used core, Cat Reman **reduces demand** on the supply chain for business.

By keeping these cores in use among the customer base, the Cat Reman process limits the amount of iron sent to landfills and diminishes greenhouse gas emissions **for the environment**.

### AVAILABLE WHEN YOU NEED IT

Thanks to our comprehensive global supply chain and dealer network, Cat Reman solutions are highly accessible.

The Cat dealer network stocks a broad line of Cat Reman parts and components. With 21 Global Caterpillar Parts Distribution centers and **more than 2,300 authorized** Cat locations, most components are available and ready to install, reducing your repair downtime (compared to a rebuild) and maintaining productivity.

Reach out to your local authorized Cat dealer to confirm which parts may be applicable to your needs. Also, explore the Cat Reman product line on [Parts.Cat.Com](https://Parts.Cat.Com) to see the wide array of offerings available across all the industries we serve.

**SHOP NOW**

**SCAN/CLICK**

### AT A FRACTION-OF-NEW COST

Generally priced between **45 to 85 percent of the cost of new parts with core return**, Cat Reman repair options help lower the owning and operating cost of your equipment. While the remanufacturing process mirrors the manufacture of new parts, the remanufactured materials save on production costs and, by extension, lower the price paid by the customer.

# RISING TO MEET THE OCCASION

## IN A VARIETY OF APPLICATIONS

Whether your concerns center around affordability, reliability or timing, Cat Reman offers solutions for replacement engines, overhaul kits and components for the following industries:

### CONSTRUCTION

- + Excavation
- + Earthmoving
- + Paving
- + Quarry & Aggregates
- + Waste/Compaction

### MINING

- + Surface Mining
- + Underground Longwall (Soft Rock)
- + Underground Hard Rock Room & Pillar Mining

### ENERGY & TRANSPORTATION

- + Electric Power
- + Industrial
- + Marine
- + Oil & Gas
- + On-Highway Trucks
- + Railway Power

### ADDITIONAL OFFERINGS

- + Agriculture
- + Demolition & Scrap
- + Forestry
- + Government
- + Pipeline
- + Other OEM machines that utilize Caterpillar-engineered products

# CUTTING TO THE CORE OF CAT REMAN

CATERPILLAR'S REMANUFACTURED PRODUCTS PROGRAM RUNS ON A CORE DEPOSIT BASIS. WHEN A COMPONENT REACHES THE **END OF ITS LIFECYCLE** AND A CAT REMAN PRODUCT IS PURCHASED, THE CAT CUSTOMER MAY RETURN THEIR CORE TO THEIR DEALER TO RECEIVE THEIR CORE DEPOSIT REFUND.

THIS INCENTIVE THAT **NO VIABLE CORE GOES TO WASTE** HELPS OUR SUPPLY CHAIN REMAIN STOCKED WITH PRODUCTS TO MEET CUSTOMER NEEDS.

**The viability of a core and the amount of credit provided to the customer is determined by our inspection team. In most cases, we accept cores<sup>2</sup> that:**

- + Are fully assembled and complete
- + Are not visibly cracked, broken or welded
- + Display no non-operational damage, like mishandling, excessive rust, corrosion or pitting
- + Have an acceptable Cat part number

Through an on-the-spot core inspection by the dealer, customers quickly learn the total anticipated exchange price. This increases transparency and convenience while reducing any cost-related surprises.

---

## **HOW IT ALL COMES TOGETHER**

Once a core passes dealer inspection, it's sent to one of our global core processing facilities where it is inspected and forwarded to a state-of-the-art remanufacturing facility.

After the core arrives there, it is disassembled, cleaned and salvaged with advanced techniques — like machining, laser cladding and metal deposition — to give the part a new identity and ensure like new quality.

Next, the core is reassembled and tested. Once its functionality is validated, the core re-enters the supply chain as a Cat Reman product.

**With quality prioritized at all levels of the remanufacturing process, Caterpillar stands behind the value of Cat Reman by offering a same-as-new Caterpillar Limited Warranty<sup>1</sup>.**

# REVIVE YOUR EQUIPMENT, REPLENISH THE SUPPLY

## SUSTAINABLE BENEFITS FOR VALUABLE PRODUCTS

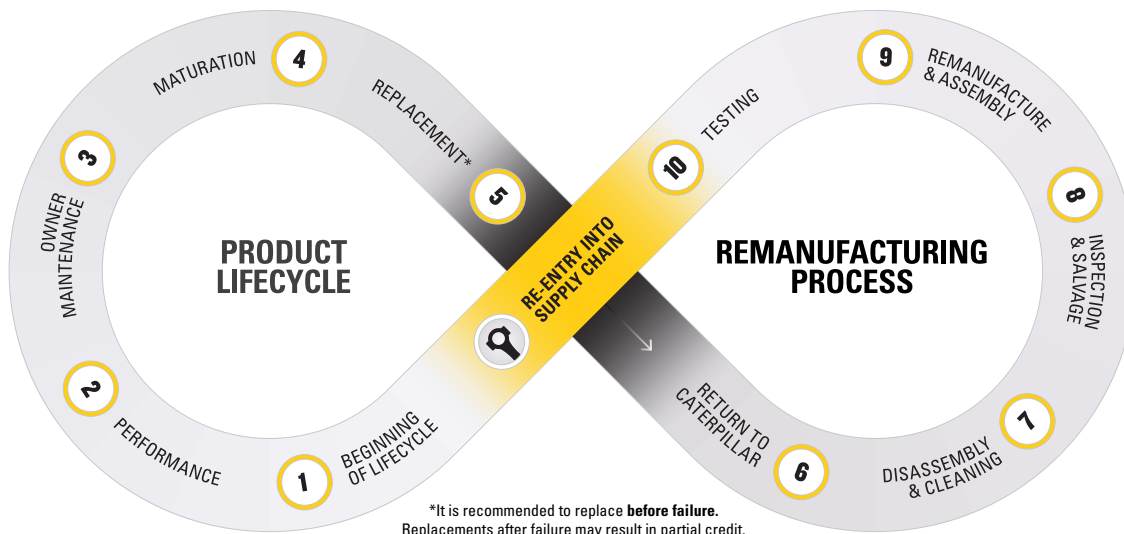

In the unending flow of materials and energy, Cat Reman is an important part of our circular economy.

Our customers' returned cores allow end-of-life parts with remaining usable life to be returned for remanufacturing, keeping the supply chain stocked and limiting unnecessary waste.

When compared to the manufacture of new components, the Cat Reman process<sup>3</sup>:

## CAT® REMAN PRODUCT LIFECYCLE

**IN 2022 ALONE, THE CAT REMAN PROCESS COLLECTED 140 MILLION POUNDS OF USED EQUIPMENT PARTS THROUGH END-OF-LIFE RETURNS.**

**– CATERPILLAR 2022 SUSTAINABILITY REPORT**

# REMANUFACTURED TO LAST. BACKED BY A CATERPILLAR LIMITED WARRANTY<sup>1</sup>.

THE **LIKE NEW** FEATURES OF CAT REMAN PRODUCTS EXTEND TO THE COVERAGE PROVIDED BY CATERPILLAR. ALL CAT REMAN PARTS RECEIVE THE SAME PROTECTION AS NEW COMPONENTS WITH OUR **12-MONTH CATERPILLAR LIMITED WARRANTY<sup>1</sup>**. THIS COVERS MATERIAL DEFECTS, WORKMANSHIP AND RESULTANT DAMAGE<sup>1</sup>.

For any questions regarding Cat Reman products and warranties, contact your local authorized Cat dealer.

We have a wide range of remanufactured solutions which can be customized to your business, and we look forward to finding the right components for you.

**Additional information, resources and support can be found at [www.cat.com/reman](http://www.cat.com/reman)**

<sup>1</sup>Warranty can vary by model and application; limitations may apply. For complete details about the applicable Caterpillar Limited Warranty, contact an authorized Cat dealer.

<sup>2</sup>Core Acceptance Criteria (CAC) vary by component and are subject to change. Partial core refunds are available for some Cat Reman components. Contact your authorized Cat dealer for more information.

<sup>3</sup>Represents U.S. environmental impacts comparing "gate-to-gate" remanufacturing and manufacturing processes for engines and components. Based on 2018 external study of Cat engines, alternators and turbochargers. Does not include impacts elsewhere in our value chain.
