SUPPORT

WHEN YOU NEED IT MOST

When we say we're right there with you, we mean it. We're focused on building relationships that extend well beyond machines. That means sharing our expertise to help you select, finance, operate and maintain equipment and then standing by your side to keep that equipment—and your business—running smoothly.

To learn more, contact your local Cat dealer and your Cat Financial Commercial Account can help with convenient payment plans for any parts and/or service needs. [FIND YOUR DEALER](#)

FIND YOUR DEALER

REPAIR OPTIONS

Maximize your uptime and minimize overall owning and operating costs by planning an off-season repair and annual replacement of wear parts. Whether you are a Do-it-myself, Do-it-with-me, or a Do-it-for-me customer, your Cat dealer is ready to assist you with parts orders to complete rebuilds of your equipment.

DO-IT-MYSELF – If you prefer to do the work in-house, your Cat dealer can help you determine your parts needs. One of our experts will utilize Caterpillar Service Information, or can perform a (TA1) visual inspection, or (TA2) technical inspection to help you identify your parts replacement needs.

DO-IT-WITH-ME – In addition to providing parts, your Cat dealer can supplement your repair capabilities with fully trained technicians and specialized tooling that your team may not have.

DO-IT-FOR-ME – Your Cat dealer can manage the replacement of vital wear parts or a complete rebuild. Ask your dealer about an inspection and a repair option plan to meet your needs.

CAT® INSPECT APP PROVIDES QUICK AND EASY DIGITAL INSPECTIONS

Cat Inspect allows you to access your equipment data on your mobile device. This easy-to-use app lets you capture inspection data and integrates with your other Cat data systems, so you can keep a close eye on your fleet.

To get access, speak with your Cat dealer today to start using the Cat Inspect App for your equipment inspections.

PROTECT YOUR INVESTMENT

WITH GENUINE CAT® PARTS

This guide is designed to provide you with a **quick reference for key wear and maintenance parts** and part numbers you need to keep your Cat cold planer operating at peak efficiency. It is not a replacement for the Parts Manual. Always read and understand the machine's Operation and Maintenance Manual prior to performing any type of maintenance.

Proactive preventative maintenance extends the life of your machine and protects your investment. Proper maintenance minimizes the need for repair and replacement. In the event that replacement parts are required, the use of genuine Cat parts helps maximize machine performance and maintains high resale value.

**PURCHASE PARTS
AND OPERATION AND
MAINTENANCE MANUALS W
24/7**

<http://catpublications.com/>

5 REASONS TO USE GENUINE CAT PARTS

1. Cat parts are constructed of top-quality materials, built to exact original specifications by our engineers and rigorously tested to ensure maximum performance.
2. Cat parts are precisely matched to other Cat components for an exact fit to deliver greater reliability, durability and longer life.
3. We maintain the largest inventory of replacement parts in the industry to ensure the best possible availability anywhere in the world.
4. By using only Cat parts you maintain your equipment integrity to maximize its resale value.
5. Cat parts come with a 12-month warranty backed by Caterpillar and supported by dealers around the world.

PARTS KITS

Some models offer parts kits that include all of the parts needed for a specific repair or rebuild in addition to part numbers for the individual pieces with the quantity needed. Paper kits contain a compiled list of the part numbers to order for select repairs, rebuilds or upgrades. For complete replacement parts lists, service, and ordering information by machine sales model, contact your local Cat dealer.

CAT SERVICE INFORMATION SYSTEM (SIS)

Cat Service Information System (SIS) is the electronic service tool that covers all information for Cat products from 1977 to today. With 2 million service graphics, 1.5 million parts numbers, and 44,000 parts/service documents, this tool is the equivalent of over 25,000 books a click away!

[WWW.PARTS.CAT.COM](http://www.parts.cat.com)

Register and create your SIS account or shop parts online 24/7

LOCATING THE SERIAL NUMBER AND BUILD NUMBER

Knowing the Serial Number and Build Number (if applicable) for your equipment is important for selecting the correct replacement parts, accessories, upgrades, filters and fluids.

If you are uncertain about which parts to order, your Cat dealer is ready to assist with the ordering process.

1. Each machine has a unique PIN number.
2. The Serial Number is the last 8 characters of the PIN number. PIN plate locations are shown below.
3. Some models will have a Build Number. If your machine has one, it is located above the PIN number field. In some cases, parts or upgrades may only apply to machines with a certain build number. If this exception applies, it will be noted on the part number tables in this document.

ROTORS

DESIGNED FOR EFFICIENT PRODUCTION

Cat® rotors work efficiently on a variety of reclamation and stabilization projects to help you meet production goals. Always inspect the rotor before use and replace damaged bits and toolholders.

SELECTING THE ROTOR THAT'S RIGHT FOR YOU

Not all rotors are created equal, so choosing the correct rotor for the job can help you achieve maximum productivity and increase uptime.

- + Know your application
- + Determine the results you need for gradation performance and breakout force
- + Choose a cutting bit specific to the application to optimize machine efficiency

When choosing a rotor for your Cat reclaimer / stabilizer, there are many factors that affect the measure of performance:

- + Your machine selection will dictate how much power you will be able to apply
- + Each application has many variables that can affect performance: soil type, asphalt layer thickness, type of asphalt used, etc.
- + Rotor selection will dictate the parameters for gradation performance and breakout force
- + Machine settings – propel speed, rotor speed, position of front or rear mixing chamber door – will also dramatically affect the performance of the rotor

Not all rotors are available in all regions. Please refer to the [Rotor Selection Guide](#) (QEHQ1233) for more information about selecting a rotor or your Cat dealer can help you choose the best machine and rotor for the application.

BITS

Choosing the right cutting bit for your application can optimize the efficiency of the machine, resulting in more production with ideal material sizing and mixing quality. These charts identify which cutting bits are recommended for common applications. Bit holders can be retrofitted to allow for the use of the larger or smaller shank size.

CUTTER BITS FOR COMMON APPLICATIONS				
	DESCRIPTION	SHANK SIZE	ROTOR	PART NUMBER
	Heavy Duty (Higher Carbide Content)	20 mm	Universal, Soil, Combination, System K	Piece: 561-8135
				Pallet:* 626-4496
	Higher Impact (Valve Seat Tip)	20 mm	Universal, Soil, Combination, System K	Piece: 564-1260
				Pallet:* 626-4494
	Light Duty	20 mm	Universal, Soil, Combination, System K	Piece: 578-4416
				Pallet:* 626-4495
	Higher Impact	22 mm	Universal, Combination, System K	Piece: 533-5760

* Available in North America

CUTTER BITS WITH PULLER GROOVE

CUTTING CHAMBER

EASY TO SERVICE

Cat reclaimer cutting chambers are designed with service in mind. Equipped with convenient bolt-on repair parts to maintain the cutting chamber throughout the life of the machine. Easily replace the levelers, as needed, to maintain gradation control and spread of material. Inspect and replace the breaker bars and strike off plates to protect the inside of the cutting chamber and assist with breaking up material.

RM400, RM500, RM500B

RM600, RM800

1. BREAKER BAR The breaker bar mounts inside the mixing chamber and enhances rotor's ability to pulverize large chunks of asphalt. RM400, RM500 and RM500B only.

2. CHAMBER DEBRIS PLATE Installed on each side of the rotor to provide protection and guide the depth adjustment of the rotor while keeping material inside the chamber.

3. CHAMBER WEAR SKIS Bolt-on skis protect the sides of the cutting chamber to prevent permanent abrasion to bottom of mixing chamber.

RM400, RM500,
RM500B (REAR DOOR
ONLY)

RM600, RM800

4. CHAMBER DOOR MATERIAL LEVELER

Bolt-on levelers for the front and rear doors that help with gradation control and distribution of material coming out of the chamber.

5. MIXING CHAMBER WEAR PLATES

Weld-on wear plates inside the chamber that deflect material from the rotor end rings. RM600 and RM800 only.

CUTTING CHAMBER			
DESCRIPTION	MACHINE MODEL	PART NUMBER	QUANTITY
Chamber Wear Skis – Front and Rear	RM400, RM500†, RM500B	394-5142	4
	RM600, RM800	551-2433	4
Chamber Wear Skis – Center	RM400, RM500†, RM500B	394-5144	2
	RM600, RM800	588-3630	2
Chamber Door Material Leveler	RM400, RM500†, RM500B	077-7730	1

† Build Number: 02A. To identify the build number on your machine, refer to page 6 of this document.

ROTOR DRIVE SYSTEM

BUILT-IN DURABILITY

On the RM600 and RM800, periodically inspect the rotor drive system including the rotor drive belt, pulley system, and sheaves to avoid rotor slippage and ensure efficient rotor operation. Rips, tears, or excessive stretch in the rotor drive belt indicates belt replacement is necessary. Inspect the V-grooves in the sheaves to ensure they are properly engaging with the grooves of the rotor drive belt.

RM400, RM500, RM500B

1. ROTOR DRIVE CHAIN Strong and reliable drive chain designed to transfer power to the rotor.

2. SHEAR DISK Protects the rotor drive system by decoupling the rotor drive transmission from the rotor.

3. TORQUE LIMITER The torque limiter minimizes the amount of torque that can be transferred from the engine to the rotor drive system. This allows the mechanism to limit potential damage when the rotor strikes an immovable object like a manhole cover.

RM600, RM800

1. ROTOR DRIVE BELT V-belt designed to ensure consistent tension when engaging the rotor and prevent slippage.

2. SHEAVE Interfaces with v-grooves in rotor drive belt to transfer torque and speed from engine to rotor.

3. TENSIONER IDLER Idler on the tensioner arm for the rotor drive belt.

4. PUMP DRIVE BREATHER Filter for the pump drive that ensures air that enters the pump is clean and dry.

5. ROTOR TURNING DEVICE BELT Belt designed to ensure efficient operation of the rotor turning device during rotor service.

6. ROTOR DRIVE PLANETARY OIL FILTER Oil filter for the rotor drive planetary.

ROTOR TURNING DEVICE PENDANT Controller for the rotor turning device. Rotates the rotor forward or backward.

ROTOR DRIVE SYSTEM COMPONENTS

SPRAY SYSTEMS

MEET SPECIFICATIONS WITH PRECISION

The spray systems cool rotor components to prolong their wear life and assist in material mixing in certain applications. To keep the system clean, replace the filters according to the recommended service intervals. Frequently clean the spray bars and nozzles to ensure proper operation and periodically inspect them for damage and clogs.

RM400, RM500, RM500B WATER SPRAY SYSTEM

1. SPRAY NOZZLES Designed for an effective and efficient water spray pattern.

2. VALVE Turns each spray nozzle on or off to regulate the water spray.

3. WATER SPRAY PUMP Efficiently transfers water from the tank to the spray nozzles.

4. STRAINER BASKET AND O-RING Filter to keep sediment out of the water system.

RM600, RM800 WATER SPRAY SYSTEM

1. SPRAY NOZZLES Designed for an effective and efficient water spray pattern.

2. ACTUATORS Pneumatic actuator opens or closes the water spray valve on each nozzle.

3. STRAINER BASKET AND O-RING Filter to keep sediment out of the water system.

4. WATER SPRAY PUMP Efficiently transfers water from the tank to the spray nozzles.

RM400, RM500, RM500B EMULSION SPRAY SYSTEM

1. EMULSION PUMP Efficiently transfers bitumen emulsion from the truck to the spray nozzles.

2. STRAINER BASKET AND O-RING Filter to keep sediment out of the emulsion system.

3. VALVE Turns each spray nozzle on or off to regulate the emulsion spray.

4. NOZZLE Designed for an effective and efficient emulsion spray pattern.

RM600, RM800 EMULSION SPRAY SYSTEM

1. EMULSION PUMP Efficiently transfers bitumen emulsion or water from the truck to the spray nozzles.

2. STRAINER BASKET AND O-RING Filter to keep sediment out of the emulsion system.

4. PIN Pin in the emulsion spray nozzle assembly.

5. BRASS GLAND Seals the housing to the spray nozzle assembly.

6. HOUSING Housing for the emulsion spray nozzle assembly.

7. NOZZLE Designed for an effective and efficient emulsion spray pattern.

3. ACTUATOR Pneumatic actuator opens or closes the emulsion spray valve on each nozzle.

RM600, RM800 WASHDOWN SPRAY SYSTEM

1. HOSE REEL Retractable reel and hose storage.

2. SPRAY GUN Handle and controls for the spray wand.

3. SPRAY LANCE Screws into the spray gun and accepts various spray nozzles.

4. SPRAY NOZZLE Provides effective spray pattern.

5. WATER TANK STRAINER Initial filter to catch debris when pumping water into the tank.

6. WATER PUMP Efficiently transfers water from the tank to the spray gun.

7. WATER FILTER Filter to keep sediment out of the water spray system.

		Water Filter	161-8211	1	

* If adding a spray system to the RM400, a second touch screen display is required. Please consult your Cat dealer if adding this option.

† Build Number: 02A. To identify the build number on your machine, refer to page 6 of this document.

UPGRADES AND OPTIONS

TO INCREASE VISIBILITY AND CAPABILITY

Upgrade your Cat reclaimer with options to enhance visibility and capability. Cameras enhance visibility from multiple angles of the machine. Various lighting options provide better illumination around the machine for the job crew during operation. Machine-specific additions allow you to tailor your machine to specific operating conditions.

1. WORK LIGHTING

Various lighting options available to illuminate the machine during operation and maintenance.

2. ROADING LIGHTS

Enable on-highway transportation. Includes turn signals and front-facing LED lamps.

MIRRORS

Attached at various locations around the machine for proper visibility.

CAMERAS

Improve visibility around the machine and to the cutting chamber. Options and locations vary by machine model.

PUSH BAR

Provides a firm connection to water or emulsion truck.

TOOLBOX

Additional toolbox available for the RM400 mounted above the rotor chamber for extra lockable storage.

BOLT-ON COUNTERWEIGHT

Bolt-on 1600 kg (3,500 lb) counterweight kit for the RM500 and RM500B enhances machine performance in tough reclamation applications. Recommended for asphalt cuts 25 cm (10 in) deep or greater.

PREVENTATIVE MAINTENANCE

FOR PEAK PERFORMANCE

Regular preventative maintenance to the engine, hydraulics, fuel and rotor systems is key to keeping your equipment running during the milling season. ***Please refer to your Operation and Maintenance Manual for recommended maintenance intervals and procedures.*** The following tables include common filters and components needed to perform regular service on your equipment.

RM400 PREVENTATIVE MAINTENANCE

INTERVAL (HOURS)	SUBSYSTEM	DESCRIPTION	SERIAL NUMBER PREFIX	PART NUMBER	QUANTITY
500	Engine	Engine Oil Filter Element	AK3, R2J, R4H, Z4M	500-0483	1
		Fuel / Water Separator Filter Element		436-7077	1
	Fuel	Fuel Filter Element	AK3, R2J, R4H, Z4M	500-0480	2
	Rotor Drive	Rotor Bearing Oil Tank Breather	AK3, R2J, R4H, Z4M	183-3873	1
		Rotor Drive Differential Breather		243-0165	1

VISIONLINK®

COMPLETE VISIBILITY TO MANAGE YOUR ENTIRE FLEET

Are you ready to take the guesswork out of fleet management? VisionLink® delivers easy-to-understand actionable insights to help you make informed decisions at every turn. Get the most out of your entire fleet—from one single, intuitive, and trusted application.

DESIGNED FOR FLEETS OF 1 TO 100+

VisionLink is a cloud-based application that takes the guesswork out of managing your entire fleet – regardless of the equipment manufacturer. Review equipment data from your desktop or mobile device to maximize uptime and optimize assets. With interactive dashboards, VisionLink makes it easier for operations of all sizes to make informed decisions that lower costs and boost productivity. Your Cat Dealer can help you determine and obtain the VisionLink subscription (per machine) that best fits your business needs.

ENTIRE FLEET VISIBILITY

- + Get actionable data insights for all assets regardless of make
- + Manage mixed OEM fleets via one interface
- + Monitor owned, rented, or leased assets

UP-TO-DATE ASSET TRACKING

- + Track location, operating hours, fuel levels, health issues, and overall utilization
- + View work tool attachment locations across multiple worksites and measure working hours to predict the need for tool maintenance

MAXIMIZE UPTIME

- + Monitor equipment health, fault codes, fluid analysis, and inspection due dates
- + Reduce unplanned downtime with critical alerts
- + Order parts and schedule service within the platform

OPTIMIZE UTILIZATION

- + Manage according to projects, groups, or geofences
- + Set utilization targets and monitor performance
- + Make informed, data-based decisions to reduce operating costs

Not all features are available for every model. Please consult your Cat dealer for subscription offerings.

HOW IT WORKS

ONE-STOP SOLUTION

VisionLink is your one-stop platform for easy-to-understand data and actionable insights to optimize your assets across your entire fleet.

MIXED FLEET MANAGEMENT

Manage all your assets—regardless of brand. Connect to 3rd party and other OEM data providers or import OEM assets using Cat Product Link™ devices.

API CONNECTIONS

Application Programming Interfaces (APIs) allow VisionLink to connect with other software applications using ISO (AEMP 2.0) standards or custom APIs for more advanced data features such as geofences.

MOBILE APP

Stay on the go and manage your fleet—wherever you are. Pull up VisionLink on your desktop or mobile app for iPhone and Android users.

IN-APP SUPPORT

Navigate the app with confidence. VisionLink provides in-app help, FAQs, and tutorial videos to guide you on features and functions.

ONE INTEGRATED EXPERIENCE

VisionLink integrates with many Cat applications including: Cat Inspect, Cat S-O-SSM, Cat SIS2 (Service Information System), and parts.cat.com. Further integrations are planned.
