# RELEASE NOTES

CAT® INSPECT

February 2024

Cat Inspect: Accurate inspection data as well as a **single location** to capture and store all data, leading to enhancements in Equipment management, Condition Monitoring, CVA delivery and lead generation. It also **seamlessly integrates** with other Cat data systems to aid dealers in **generating leads** while both **improving customer productivity** in the field and **extending** the life of their equipment.

FEATURE UPDATES

Mobile *(release on February 6, 2024)*

+ 1 – Improvements added to push notifications seen on mobile/tablet
+ 2 – Ability to add supporting files on inspections
+ 3 – Improvements added to download functionality for attachments

Web *(release on February 6, 2024)*

+ 1 – Improvements to downloaded image names
+ 2 – Addition of local date format indicator in date field titles
+ 3 – Ability for all users to regenerate PDF reports
+ 4 – Ability to download PDF attachments in the help content section
+ 5 – Improvements to actions on Inspections Details page

**If an inspection has been assigned to a user, they will see a notification on their device that when selected, will take them to the Assigned tab of Cat Inspect. This feature is available for both iOS and Android devices.**

Please note that users would have to be logged in to the app for this functionality to work.
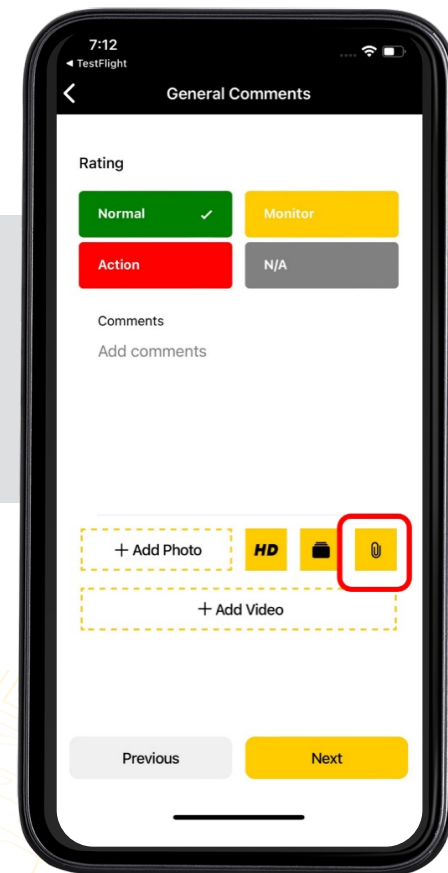

BENEFITS FOR YOU

+ Improved workflow

Users can now attach supporting files to a to the General Comments question in an inspection by selecting the attachment icon shown below.

The following file types can be uploaded: .xml, .pdf, .json, .xls, .xlsx, .csv, .txt, .tar, .tar.gz, .gz, application/pdf
Users can upload up to 5 attachments per question.

BENEFITS FOR YOU

+   Provide additional supporting context / information on inspections

CAT®

To improve general performance, when a user opens a section where attachments (multimedia or files) are found, they will then be prompted with an icon and option to download the attachment.

BENEFITS FOR YOU
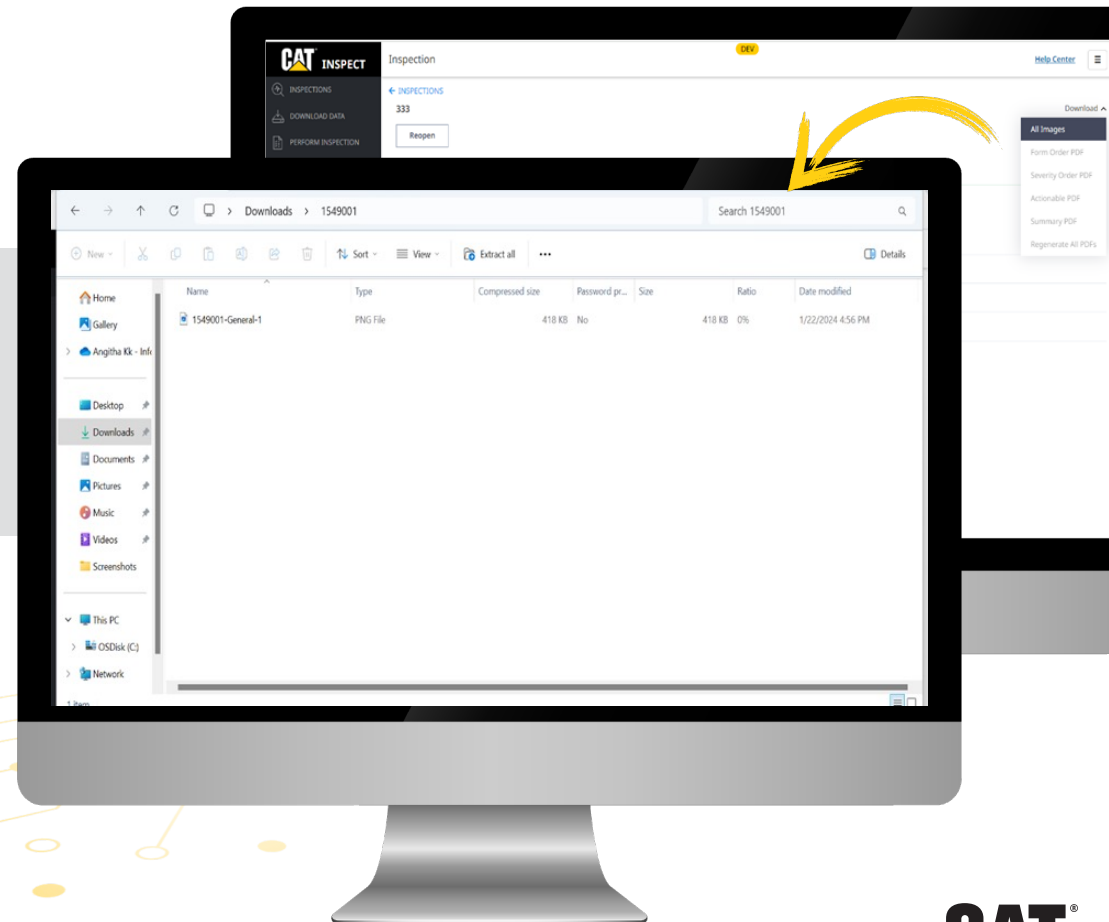

\+ Improved app performance

CAT®

The format of an image name when downloaded from Cat Inspect Web has been improved to be more identifiable and convenient to the user.

The format is: "{Form #} – {Category #}.(Question #) - {Image #}".

BENEFITS FOR YOU

+ Easier to identify images downloaded from web app
+ Standardized naming convention for consistency

The date fields' titles will now indicate the format the date will be displayed in. The format will be governed by the local settings/region of the user.

BENEFITS FOR YOU
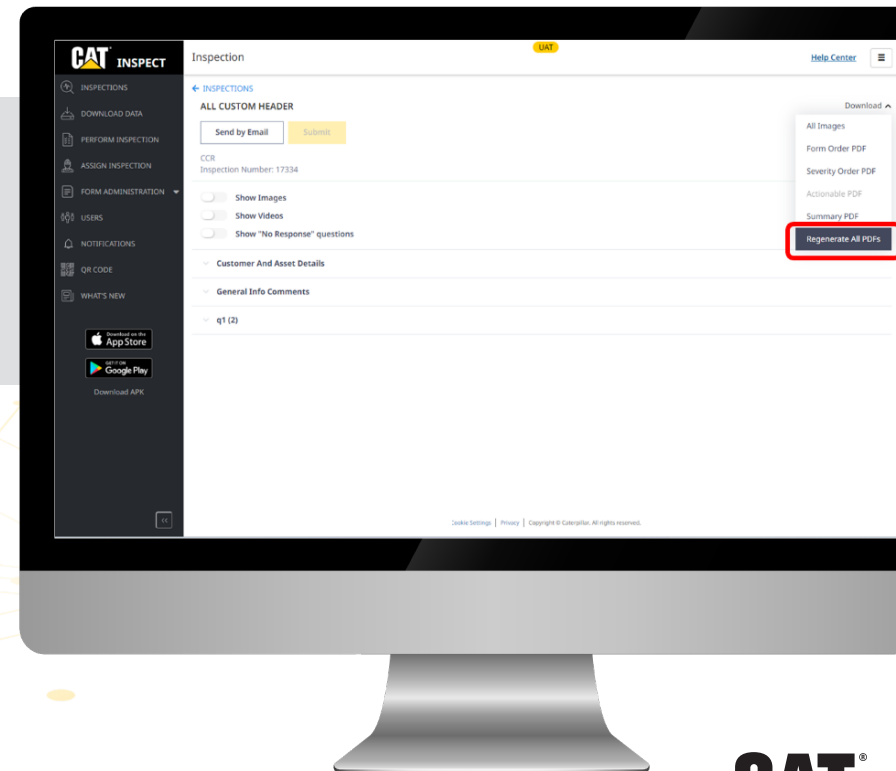

+ Improved user experience

All roles within Cat Inspect can now regenerate PDF reports on the Inspection Details page.

Previously, this functionality was available only to the Admin level role and disabled to Form Authors and Inspectors.
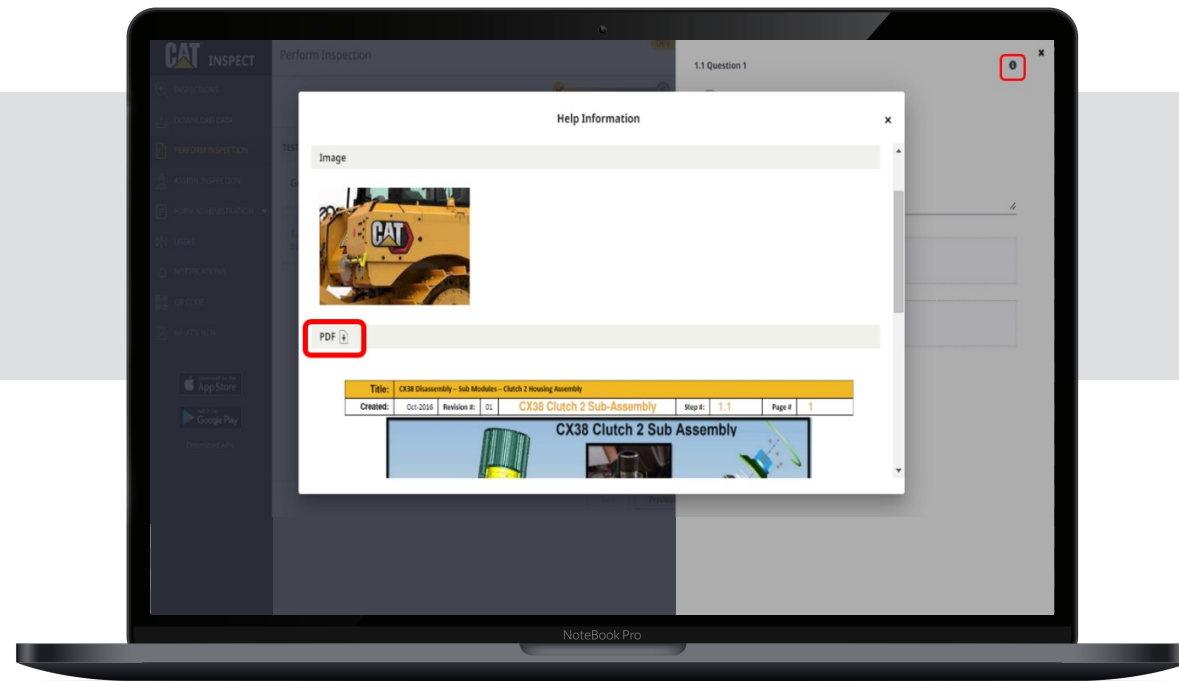

BENEFITS FOR YOU

+ Improved workflow

CAT®

If a PDF file was attached in the Help Content section when creating a form, an inspector can now download the PDF when performing the inspection.
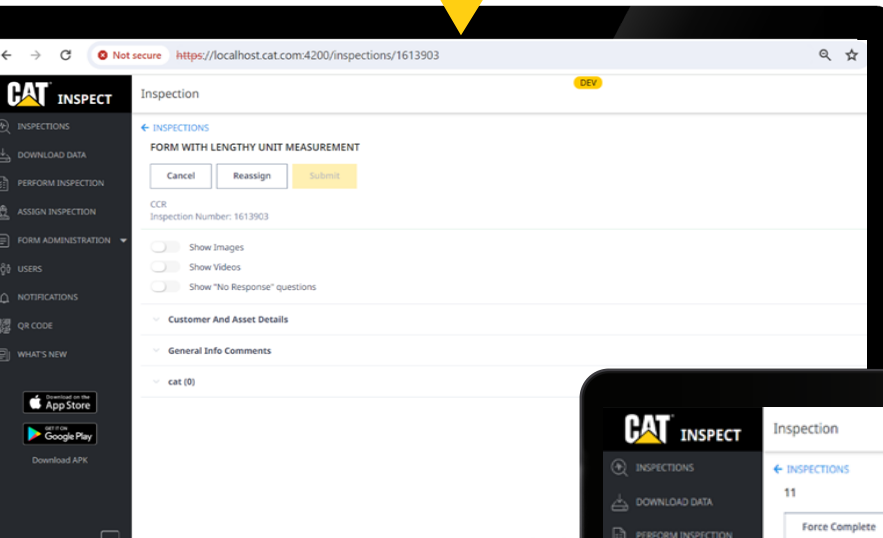

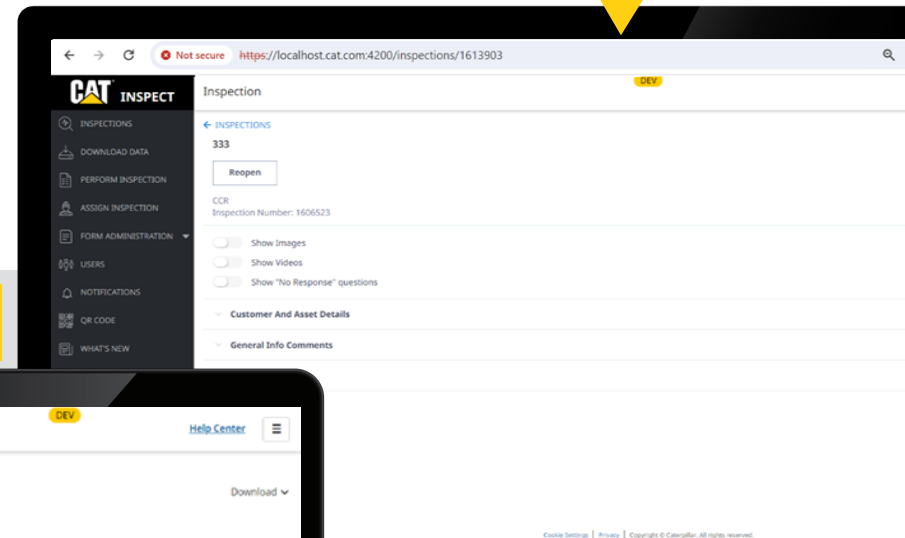

BENEFITS FOR YOU

+ Improved workflow

CAT®

The Inspection Details page has been improved – actions relevant to the inspection's state can be selected without accessing a dropdown. Furthermore, the placement of download-related actions has been updated.
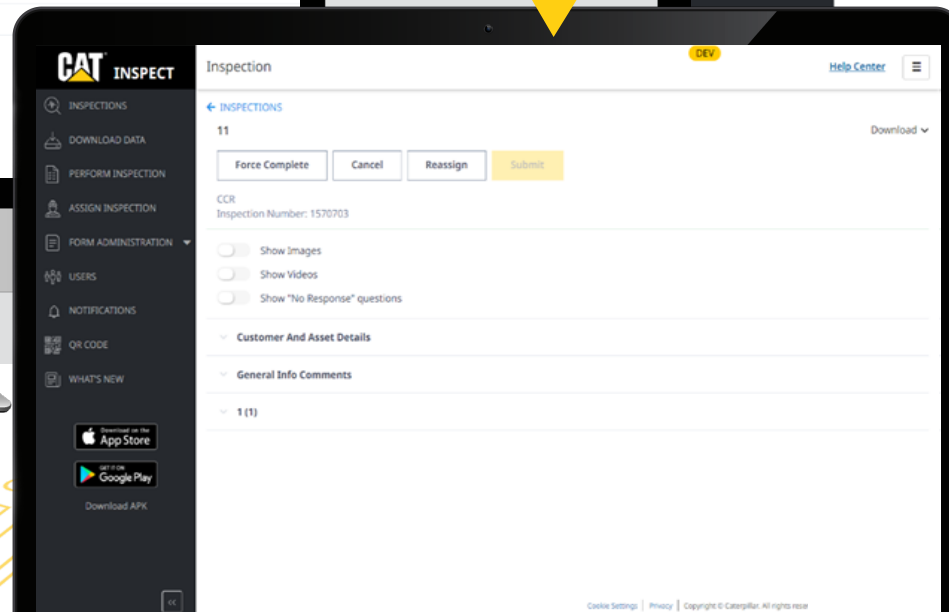

Inspection Status:
*Assigned*

Inspection Status:
Canceled

Inspection Status:
In Progress

BUG FIXES

Web/Mobile

+ General improvements added to performance and to mitigate syncing issues
+ Fix to orientation of photo when uploaded to Cat Inspect Mobile
+ Fix to session expiry banner on Cat Inspect Mobile
